PREFACE

(First Edition)

This treatise titled 'New Techniques of Prediction' is brought forth in two parts for certain conveniences of reference. The first part contains all the rudimentary elements and rules under general Astrology arranged in a systematic manner enabling easy reference. In addition to what is available in standard classic works, I have included very many new and unknown secrets after long research. My object is to render my treatise useful for both the beginner and the advanced student of astrology. As far as possible I have avoided unnecessary and hazy ides, retaining only those that have stood true by research. This part II edition is designed to contain chiefly predictive portions, the elementary ones being included in Part I. This is a rare and valuable publication containing precious dictums not known to many so far - 'A Million Dollar Worth' as one of the readers has expressed. I have tried to handle the subject in a mathematical way winnowing all alternatives and doubts. On application of my theory you will yourself realise its merits. There is nothing new - no new invention. As I have once before expressed no human being of ordinary intellect can add on even an atom to it as his own. What an intelligent astrologer should do is to merely digest the proper meaning of our classic dictums and apply them diligently. That is what I have done and that is what I expect of you all. Added to it long research work is needed. It is only by way of research that I have been able to place before you the wonderful effects of Thithi, Weekday, Star, Yoga etc. The Division Chart or Phala Kundali is a unique product of my long research which is a tangible foundation for correct

meticulous predictions. A number of illustrative horoscopes cited in this treatise is a special advantage to the students. They are all a collection of well-known charts investigated by me in detail.

The Chapter on Dasha Bhukti is exemplary. Gochara is treated by me in a new style which gives better results than the traditional method of reckoning from moon. No where you have seen the wonderful Daily and Hourly reading I have narrated. Lastly, very many controversial and misconceived subjects, which have been more or less traditional sayings without tangible truth in them are discussed at length with illustrations.

In short, this treatise is a revelation of hidden truth. I feel satisfied if the public digest these principles well and try to apply them in their future handling of horoscopes.

If a set of enthusiasts of any place in India or abroad desire to be coached on these and other lines I am prepared to honour their invitation. My chief object is to spread my theory round about India and if possible the world over.

H.R. Seshadri Iyer, M.A.
Author.

Preface to Second Edition

This Edition is an enlarged one over the first one. As some of the readers and students desired to have a ready made Table of Divisional Amshas we have added it and combined the appendix also to this book. Some of the printer's errors are set right. The book is brought up with a better get-up. See our latest edition Part III on *Race Astrology.*

Contents

Chapter I - Thithi and Yoga (07-22)

Preamble and Definitions - Yoga and Avayoga - Positive and Negative Signs and Planets - General Enunciations

Chapter II - Novel Method of Dasha Bhukti Reading (23-43) :

Preamble -Dasha Chart -Starter - Dasha Chart - Calculations of Starter - Ruler - Dasha Yogi -Evolution of one Dasha Chart from another, - Easy way of working out a Dasha Chart - How to read Dasha Chart - Rules to judge the effects of Bhukti Lords - Special effects of Dasha Lord on Ascendant .

Chapter III - Phala Kundali or Division Charts (44-81)

Preamble - Theory of Division Charts -Basic principles to frame Division Charts - Evaluation of Division Charts and their portfolios - Table of Amsa parts of D-Chart - How to use the D-Charts ? -Illustrations of D-Charts Reading .

Chapter IV - Dasha Bhukti (classical)- (82-104)

Preamble - Dasha Reading -Mathematical Navamsha Chart -Bhukti Reading -Illustratoins, .

Chapter V - Gochara (Transit) (105-118)

Preamble -Gochara as part of Astakavarga - Judgement of Transit - Secondary Directions to help transit. -Other Theories of Transit -Illustrations .

Chapter VI - Varshapravesh (solar map) (119-141) :

Preamble - Panchavargi Bala -Hadda etc. Charts -Table of

Pancha Vargi Bala - Varshapravesh - Determination of Varshapa -Harsha Balam - Year Lord -Dasha System - Sahamas - Timing of Sahama effects - Table of Sahamas - Shodasha Yogas - Illustrations.

Chapter VII - Daily and Hourly Readings and Misconceptions and Blind Beliefs - (142-155)

Preamble - Striking points guiding Day Reading -Hour of Event - Illustrations -Misconceptions and Blind Beliefs -Rahu Kalam -Thithi, New moon and full moon day -Kalasarpa Dosha -Kuja Dosha -Kalachakra Dasha -Nakshatra Dosha - Marriage Alliance Tests - Single survey of one Horoscope -Mutal Verification of both charts - Muhurtham .

Appendix (1) : Illustrated Horoscopes (155-179)

Ready-made Table to erect Division Charts - Illustrative Charts :

Appendix (2) : (180 - 184)

Fundamental Elements

NEW TECHNIQUES OF PREDICTION -II

Chapter I

Thithi and Yoga

Those that have not read my Articles on this subject may feel surprised to know that for correct predictions Thithi, Week day, Star, Yoga and Karana which form the five fundamental parts of a Panchanga (meaning Pancha Angas i.e., five limbs) are as important as other things. All of us use the star, that too under limitations; and most of us leave off the rest, with the result we are left in the lurch and the sacred science decried by our folly or ignorance. Is it not a common say that one is born a Yoga-Purusha (fortunate person)? But few know its real significance as we had not known so far the mode of using both Yoga and Thithi for Predictions. For the benefit of my friends, I disclose below the Golden Truths in Astrology. First I dwell on Thithi and Yoga, the rest will be dealt with later. In Sanskrit Thithi means Subtraction, while Yoga means Addition. *The difference in position between Moon and Sun gives thithi while the sum-total of them gives yoga.* There are 30 Thithis and 27 Yogas. Each yoga is controlled by a star in the chronological order, the first Vishkamba Yoga starting with the star Pushyami. The lord of the yoga is its stellar lord. In addition to this chief birth yoga planet, the lord of the Rasi containing the birth yoga point will also become another yogi called 'Duplicate Yogi'. [For calculation of Thithi and Yoga, please go through Chapter I of Part I.]

As for anything there is a negative for every positive, there is Avayoga planet (Adverse) for every Yoga planet and they are as shown here :

Yogi	Avayogi or Enemy	Triple sets of planets
Sun	Shani	
Moon	Budha	
Kuja	Ketu	① Ketu, Moon, Guru
Budha	Kuja	② Shukra, Kuja, Shani
Guru	Sun	③ Sun, Rahu, Budha
Shukra	Guru	
Shani	Moon	
Rahu	Shukra	
Kethu	Rahu	

As per this theory there is only one enemy for each planet and all the 9 planets are grouped into 3 sets of 3 each. The 3 planets in each set belong to one group of common friendship. Thus when any one of the three planets becomes a yogi the other two automatically imbibe yoga character and this is specially noticed in the case of Rahu. When Sun or Budha becomes yoga planet, Rahu becomes yoga like planet.

Effects of Lunar Day or Thithi

In addition to the laid down broad principles of judgement, Thithi has a predominating influence on the life of a person. Except on full moon and new moon days every Thithi has at least two Rasis called 'Dagdha' or burnt ones. For details please see Chapter-1 Part I. For the sake of convenience I call these Dagdha Rasis as Zero Rasis hereafter. Bhavas counted by them, their lords and

planets in such Rasis lose their power, unless retrograde. That is why sometimes predictions go wrong. Add on to the usual canons of judgement the theory of Zero Rasis and Yoga and then predict. You will never fail. Effects of birth in a year, month, day, thithi, star, yoga and karana are cited in several books. Of them it is only yoga effect that stands to test. So I have narrated yoga effects in Chapter I of Part I.

I now lay down the canons of judgement relating to thithi and yoga effects. To make the subject easy, I give my own Nomenclatures as follows :

Positive Rasis : Own house
Negative Rasis : Zero Rasi or house of debilitation
Positive Bhavas : Auspicious Bhavas (1,2,4,5,7,9,10,11)
Negative Bhavas : Dustana (3-6-8-12)
Positive Planets : Lords of Positive Bhavas which are not Zero Rasis and Birth Yogi and Duplicate Yogi.
Negative Planets : Lords of Negative Bhavas, Lords of Zero Rasis, Birth Avayogi.
Positive Stars : Stars of Positive Planets.
Negative Stars : Stars of Negative Planets.

Note : Just as in mathematics :

+	X	+	=	+
+	X	-	=	-
-	X	+	=	-
-	X	-	=	+

Even here the same theory holds good.

(1) Positive Planet in Positive Bhava or Rasi or Star becomes positive.

(2) Positive Planet in Negative Bhava or Rasi or Star becomes negative.

(3) Negative Planet in Negative Bhava or Rasi or Star becomes positive.

(4) Negative Planet in Positive Bhava or Rasi or Star becomes negative.

Positive Planets give favourable results while Negative planets cause distress.

The above cited formula will suffice to judge the effects correctly. For clearer understanding, I cite the following corollaries with illustrations.

General Enunciation

(01) Yoga planets though attaining negative character still retain their yoga character.

(02) Yoga planets or those that are in their stars give beneficial effects while Avayoga ones give malefic results.

(03) Yoga planet must be in positive Rasi, Bhava or Star while Avayogi must be in negative Rasi, Bhava or Star or Eclipsed.

(04) If 6, 8 and 12 Bhavas are Zero Rasis, good results arise; viz. no enemy, no debt and no loss.

(05) Positive planets in negative Rasis give tolerable good results when retrograde.

(06) Negative planets should not be retrograde as they become more powerful to do evil.

(07) Rahu and Ketu are natural negatives. When they are in Zero-Rasis they become extremely good. Of them Rahu is exceptionally good.

(08) Weigh your judgement from the position and condition of the steller lord.

(09) Negative planets in Zero-Rasi or negative Rasi or Bhava are good but become bad if they are retrograde.

(10) Of the 2 Rasis owned by a planet (except sun and moon who own only one Rasi) that Bhava which is Zero-Rasi suffers and not the other. If that planet is powerfully and positively situated it does more harm to the *Zero-Rasi-Bhava* but may give good of the other Bhava. If on the other hand such a planet be negatively placed or eclipsed the effect of the Zero Rasi-Bhava becomes good while the other goes bad.

(11) Planets in conjunction with or aspected by Yoga or Avayoga planet imbibe their character also in addition to their own.

(12) Duplicate Yogi in the star of birth yogi or *vice-versa* confers high yoga.

(13) Avayogi in enemy's star is good.

Illustrated Theories

A detailed discussion on the principles involved in the theory of Thithi and Yoga effects is made hereunder citing examples. Schedule of charts appended hereto and in all the discussions their serial numbers only will be quoted. Readers will please verify from the respective charts.

Theory (1-7)

(1) Positive planet in positive Bhava and positive Rasi -*good*

(2) Positive planet in positive Bhava but negative Rasi *-reduced good*

(3) Positive planet in negative Bhava or negative Rasi or Eclipsed but not Retrograde *-bad*

(4) Positive planet if under 3 above, it be Retrograde *- a little better*

(5) Positive planet in positive star *-good*

(6) Positive planet in negative star *- bad*

(7) Positive planet though in negative Bhava or Rasi if it is in its own star *-good after hurdles*

Illustrations

Chart : 1-Sun, lord of 9 (Father) though in 7th with many good planets has neither lifted his father's status nor conferred paternal good to the native for the very reason of being in Zero-Rasi. Guru, lord of 1 and 4, with all the best traits could not give him full satisfaction of education or bodily strength as he is Zero-Rasi.

Chart : 3-Budha, lord of 2 and 11 though in 5 killed his elder brother and disturbed his finance being in Zero-Rasi.

Chart : 6-Guru, lord of 9 is in Aridra (Rahu's star) and Shani, lord of 11 though in 11 being in Shathabhisha (Rahu's star) both proved very bad during their Dashas.

Chart : 33- Guru, lord of 1 and 4 in 5, being in Ashwini (Ketu star) showed his bad during his Guru Dasha though not to a great extent as both belong to one group.

Chart : 12-Shukra, lord of Lagna in 11, though in Zero-Rasi gave some good effects amidst some bad as he is in his own star (Pubba).

Kethu is in Anuradha (Shani's star who is yogi). So Ketu Dasha was good.

Theory (8 to 13)

(8) Negative planet in positive Bhava and positive Rasi not being eclipsed causes - *bad*

(9) Negative Planet in positive Bhava but negative Rasi or set gives -*good*

(10) Negative Planet in negative Bhava -*good*

(11) Negative Planet in all negative positions and set gives *excellent results.*

(12) Negative Planet in positive star -*bad*

(13) Negative Planet in negative star -*very good*

Illustrations

Chart : 1-Budha, lord of 7 and 10 (both Zero-Rasis) is in 7th (Zero-Rasi). He was married in a high family and his profession was also tolerably good.

Chart : 7-Moon, lord of 10 (Zero-Rasi), is in 8th and in his own star (Rohini). So his profession is of good rank.

Chart : 34-Budha, lord of 7 and 10 (both Zero-Rasi) is in 3rd (bad Bhava). His wife and profession have been very good.

Chart : 27-Shani, lord of 2 (Finance) though in 12 has given him heavy finance. Why? As lord of Zero-Rasi (2nd) he is in Dustana as well in the star of Shukra, lord

of 5 (another Zero-Rasi). Similarly Shukra is situated in Shani's star.

Chart : 18-Kuja as lord of 10 (positive bhava) is in 1 debilitated and also in Pushyami (Avayogi star). So in Kuja Dasha he did not feel happy with profession.

Chart : 24-Guru, as lord of 3 and 6 (Dustanas) which are also Zero-Rasis being in Anuradha (Avayogi star) raised him during Guru Dasha to the status of Head of Department. Mere Rasi prediction shows all bad.

Chart : 23-Shukra, as lord of 7 (Zero-Rasi) and lord of 12 (Dustana) is debilitated. So his Shukra Dasha was good.

Chart : 7-Guru, lord of 3(Zero-Rasi) and 6 is in Ashwini (Avayogi star) lifted him up to good position.

Chart : 10-Kuja, lord of 6 (Zero Rasi) in Ashwini (Ketu) star-an enemy's star gave good during Kuja Dasha. As lord of 11 caused heavy expenditure and loss also.

Theory 14

A planet (positive better, negative not bad) in Yoga star gives good.

Illustrations:

Chart : 32-Shani, lord of Lagna, in Dhanista (Yoga star) lifted him up in Shani Dasha to the rank of Rs. 1000 per month.

Chart : 33-Rahu in lagna is in Uttarashada (yoga planet's star). So his Rahu Dasha was Yogaic.

Chart : 27-Ketu in 9 should have affected his father

or prosperity, but being in Hastha (Yoga star) he does immense good.

Chart : 10-Shukra, lord of 5, is in Punarvasu (Yoga star). It is Shukra Dasha that started his Yoga as a civil service officer (M.C.S.).

Chart : 12-Ketu in Anuradha (star of Birth Yogi) gave good to family in Ketu Dasha being in 2 (house of family).

Theory 15

Positive planet in enemy's star is bad, but negative planet in enemy's star is good.

Chart : 4-Budha, lord of 2 and 11, is not only in 6th but is also in Dhanista (Kuja's star) an enemy's star. During Budha Dasha he lost heavily by enemy actions.

Theory 16

A planet of the Yogi-group gives good while that of Avayogi group causes evil.

Chart : 29-Shani, lord of Lagna, in 9 and in Swati star should have gone bad. But note that its lord Rahu is of Yogi-group of Budha. So it is only in his Shani Dasha that he attained Gazetted Rank.

Theory 17

A planet in conjunction with or aspected by Yogi becomes good while with Avayogi becomes bad.

Illustrations :

Chart :8 - Kuja in 12 no doubt gave bad to the

native during Kuja Dasha, but due to his association with Yoga, Rahu alongside he also caused some Yoga.

Chart : 4 - Budha with Avayogi Rahu caused heavy distress in Budha Dasha.

Chart : 29 - Rahu is in Purvabhadra (Guru's star) who in turn is with Yoga Budha. Simultaneously the same Rahu is aspected by Avayogi Kuja. During Rahu Dasha he experienced both good and bad.

Chart : 6 - Shani, lord of 11 is with Yogi moon. During Shani Dasha he had some beneficial effects. But moon being his enemy it did not stay long.

Theory 18

Yogi in Negative Bhava or Rasi - Not much good.

Chart : 1 - Yoga Rahu being in 8 could not give solid Yoga in his Dasha.

Theory 19

Yogi, though owning Negative Rasi or Bhava gives some good at least.

Chart : 3 - Guru owns 2 Zero-Rasis and yet he has given him Yoga but of a low order because he is Yogi.

Chart : 16 - Guru (Yogi) even here owns 2 Zero-Rasis. As he is exalted in Lagna he has retained his high Yoga effects during Guru Dasha.

Theory 20

Duplicate Yogi also acts as Birth Yogi.

Chart : 22 - Guru being Duplicate Yogi, the Native became the Head of a Department in Guru Dasha by his Retrogression though in Zero-Rasi.

Theory 21

Avayogi in the positive star is Bad.

Chart : 18 - Avayoga Shani is in Rohini (positive star) in 11 (a positive Bhava also); so his Shani Dasha ended his life.

Theory 22

Avayogi in Negative Bhava, Rasi or Star or Eclipsed becomes good.

Illustrations:

Chart : 1 - Shukra (Avayogi) is in 6 in the Star of Moon (Lord of 8). So, Shukra becomes good.

Chart : 2 - Avayogi Guru is in 8, debilitated and in the Star of Lord of 6. So her Guru Dasha has been Yogaic. Rasi chart does not say so.

Chart : 17 - Avayogi Budha is in 8th and in his own star. He was coronated in Budha Dasha.

Chart : 10 - Avayogi Sun is the owner of 3 and Zero-Rasi. In Ravi Dasha he was progressing. Further he is in the star of Duplicate Yogi (Budha).

Chart : 5 - Avayogi Ketu is in Zero-Rasi and further in the star of Ravi (Zero-Rasi owner and lord of 3). His maximum attainment was in Ketu Dasha, drawing Rs. 1000 p.m.

Chart : 14 - Avayogi moon is the Lord of 3 and Zero-Rasi and is debilitated and further in Yoga in Shani star

and also with Yoga Shani. All these confer a very high Yoga during moon Dasha when his pay is raised from Rs. 500 to Rs. 1000 grade.

Chart : 35 - Avayoga Shani being in Shatabhisha (Rahu star) gave Gazetted Rank during Shani Dasha only.

Chart : 11 - Avayoga Shani is in Dhanista (Kuja's star) and thus in the star of the lord of Zero-Rasi and 12th Bhava. In Shani Dasha she had her best days.

Chart : 8 - Avayoga Shukra is in Ketu star. So good.

Chart : 27 - Avayoga Budha is in 8 and in Ketu star. He is having a high Yoga of Rs. 500 p.m. in Budha Dasha. You cannot read so in Rasi chart alone.

Theory 23

Avayogi in the star of Birth Yogi or Duplicate Yogi gives Yoga after hurdles.

Chart : 14 - Avayogi Moon in the star of Birth Yogi, Saturn and himself a Duplicate Yogi has given high Yoga during Moon Dasha.

Chart : 23 - His Ketu Dasha ran well as Avayogi, Ketu being in Dhanista has gone to Yoga Kuja's star.

Chart : 31 - Avayogi Kuja is in Sravana (the star of Duplicate Yogi). His Kuja Dasha is excellent. He draws Rs. 1000 p.m.

Theory 24

Avayogi as lord of Zero-Rasi - good.

Chart : 14 - Avayogi Moon owning Zero-Rasi became good.

Chart : 25 - Avayogi Guru owning Zero-Rasis his Guru Dasha was good.

Chart : 10 - Avayogi Sun being Zero - Rasi owner was good.

Theory 25

Avayogi getting worse, increases the prosperity vice-versa.

Chart : 26 - Here Avayogi Kuja is in 8, is the lord of 9th Zero-Rasi, and in the star of Shani who is lord of 6 and Zero - Rasi. So during Kuja Dasha he is elevated and happy in all ways of a far higher order.

Theory 26

Avayogi in his enemy's star gives good results.

Chart : 12 - Avayogi Moon in Jyesta (The star of Budha, enemy of Moon). So his profession is good.

Chart : 18 - Avayogi Shani in Rohini (enemy's star). So his Shani Dasha was good enough.

Theory 27

Rahu and Ketu in Zero Rasi or in the star of the lord of Zero Rasi give favourable results.

Chart : 12 - Ketu Dasha was good as he is in Zero-Rasi.

Chart : 5 - Ketu Dasha was excellent as he is both in Zero-Rasi and in the star of Zero-Rasi lord Sun.

Chart : 8 - His Rahu Dasha is the best part in life as Rahu is in Zero-Rasi.

Chart : 13 - His Rahu Dasha was good, Rahu being in Zero-Rasi.

Chart : 25 - Rahu Dasha was good as Rahu is in Zero-Rasi.

Chart : 11 - Rahu in 9th in Zero-Rasi. In Rahu Dasha her father prospered.

Theory 28

Rahu and Ketu even with Avayogi or in his star give good.

Chart : 24 - Rahu in 10th is both in Shani's star (Pushyami) and with Shani. In Rahu Dasha he scored M.C.S. and became a civil service officer. Note that Shani here is Avayogi. This rule is an exception to Rahu and Ketu as they are natural Negatives.

Theory 29

Rahu in the star of Ketu is good and not Ketu in Rahu star as in the latter case he goes to his enemy's star.

Theory 30

A Retrograde planet in Negative Rasi is protected from falling down.

Chart : 8 - Kuja lord of 2 and 7, in 12 and in Zero Rasi should have smashed his finance, family and wife had he not been Retrograde.

Chart : 22 - As Guru, lord of 9, is in Zero Rasi he should have affected his prosperity. Instead he was a powerful high officer in Guru Dasha as Guru is Retrograde

Theory 31

The effect of a planet gets modified by the condition, situation, conjunction or aspect of its stellar lord.

Chart : 15 **- Shukra, lord of 4 and 9 is with Avayogi Kuja and also in moon's star and that moon is further aspected by Avayogi Kuja. In her Shukra Dasha both her parents lost their finance, name and wealth and were practically reduced to penury. See how her sun's Dasha has remodelled. Sun in Ashwini (Ketu Star) should have spoiled her Ravi Dasha. On the other hand it was in her Ravi Dasha that the entire family prospered. See this stellar lord Ketu is with Budha (Birth Yogi). Hence the modified good effect.**

Chart : 26 **- Both Sun and Moon being in Ketu stars the two Dashas should have spoiled the Native's prospects, but they were the best periods. Ketu is not only in 6 but in Zero-Rasi.**

Theory 32

When there is mutual exchange between the Steller Lords of any two planets the effect of the one will be felt during the period of the other.

Chart : 15 **- Here Moon and Shukra have their stellar lords mutually exchanged. Shukra, lord of 4, being in Moon Star (Lord of 6 aspected by Kuja) should have caused illness to mother. But this evil was postponed to Moon Dasha when her mother all of a sudden had a paralytic stroke.**

Theory 33

Of the two Rasis owned by the planet, if one is positive and the other Negative the effects will be varied.

Chart : 15 - Shukra is the lord of Positive 4 and Negative 9 (as 9 is Zero-Rasi). As lord of Positive 4 in the star of lord of 6, he causes illness to mother. As lord of Negative 9 in the star of lord of 6 his father's prosperity is revealed. That is exactly how it has happened in her Moon Dasha (due to mutual exchange). Mother- a paralytic patient while father was earning Rs. 500/- p.m. and healthy.

Theory 34

If Lagna be in Birth Yoga Star he will be prosperous from birth to death. Reverse will be the case if born in Avayoga Star.

Chart : 27 - Lagna is at Sravana (the Star of Yogi Moon). So since birth he has been prospering.

Chart : 10 - Lagna is exactly in Birth Yoga star (Punarvasu). from birth to death, he was highly prosperous.

Chart : 36 - Lagna is at exact Birth Yoga star (Uttara). Since birth he is happy.

Rules given by the author are clear. They require no comments. They are correct in our daily experience. -Ed

Chapter II

Novel Method of Dasha Bhukti Reading

Of all the chapters in Astrology Dasha Bhukti is of paramount importance as the timing of the events is what is required by all. A horoscope may contain Yoga but when will it come to fruition is the anxiety of a consultee. A poor horoscope backed by good Dashas is far better than a rich horoscope with poor dashas. Sometimes it may so happen that such Yoga Dashas may not at all act in one's life when the native will be simply dreaming of his prospects. Or, it may intervene in childhood teens or old age when he would not be in a position to enjoy it. So it is absolutely necessary that Yoga Dashas should operate in one's life at proper age of enjoyability. What purpose would it serve if the Dasha of a planet which is good for conjugal happiness or professional felicity operates either in childhood or dotage? In such cases he may have only the mental satisfaction rather than physical.

Next comes the most intricate problem of ascertaining the effect of Bhukti Lord. One may be successful with Dasha Reading but very many are likely to falter in the proper handling of Bhukti effects. We have seen several texts on this subject. After all they follow a rigmorole way far from actuality. *"Sarvartha Chintamani"* and *'Krishna Misriam'* are voluminous editions that narrate a lot on this topic. Alas, they are not helpful for candid prediction. In my ensuing Chapter, I deal with the same but more intelligently handling the subject. Still under this usual method of Dasha Bhukti Readings sometimes doubts may arise. Hence, we must find a way out of this ambiguity. We experience that the same Bhukti

Lord under different Dasha Lords gives different effects. It is therefore necessary to find a method to discriminate such differential effects. I expound in this chapter a system by which proper assessment of Bhuktis may be made at a mere glance without ambiguity. The changing nature of Bhukti Lord may be easily seen from the theory involved in the framework of this Novel Dasha Chart- not known so far to most of us till at least the publication of my articles in the Astrological Magazine. In my Chapter - I, Part I on Thithi and Yoga, I have stated that for correct prediction Thithi, Yoga, Nakshatra and Week Day are needed. Of these I have used the first three elements. Now I use the Week Day also. Under this theory the effect of Dasha Lord has to be read out from the Birth Chart reckoning Thithi, Star and Yoga as detailed in Chapter - I of Part - 1, except some special features that will be pointed out later. The effects of Bhukti lords have to be read out from the Dasha chart treating their *'Starters'* and *'Rulers'* akin to their Stellar Lords and applying all the Rules enunciated in Chapter-I of Part - 1 on Thithi and Yoga. Thus *the Dasha has to be read out from Birth Chart only while the Bhukti has to be analysed from both the Birth and the Dasha Charts.*

1. Dasha Chart

Form a chart of 10 rows and 12 columns. In the first row from 3rd col. onwards place all the planets (one in each square) in their natural Week Day order from Sun to Shani and then Rahu, Ketu and Lagna. In Col. 2 from 2nd Row downwards place in each square from Sun to Moon (one in each square) in the descending order of Udu Dasha. This gives the fragile Dasha Chart.

2. Starter

It is an undisputed fact that of all the planets Sun and Moon play a very important role both on human beings and also on the other planets. In fact they are named Luminaries and the rest as planets. Any light or power to others should emanate only from these Luminaries. It is this basic principle that is made use of here. As we deal with Udu-Dasha we are mostly concerned with stellar positions rather than Rasi positions. When we deal with a Dasha based on Rasi, then Rasi positions should be taken. The two should not be mixed up. So the stellar positions of planets are the guiding factors to determine this Dasha Chart. You will also see that the effect of the Bhukti lord is read only after proper blending with Sun and Moon.

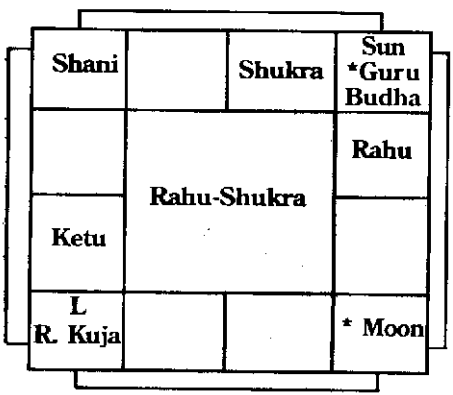

Chart 1 of 19-6-1907

For Guru Dasha Chart :

Sun = Mrigasira - 4 Shukra = Rohini - 1
*Moon = Vishaka Shani = U-Bhadra - 1

Kuja	= Poorvashada - 4	Rahu	= Punarvasu - 4
Budha	= Punarvasu - 3	Ketu	= U-Shada - 2
Guru	= Punarvasu - 2	Asc.	= Moola - 4

Though at Birth, Moon is in Uttara - 4 while working Guru Dasha Chart we should reckon the star of Moon as Vishaka (vide reasoning Infra).

Birth Day	=	Wednesday
Birth Yogi	=	Rahu (Shathabhisha)
Birth Avayogi	=	Shukra (Pubba)
Zero Rasis	=	Mithuna and Kanya*
Guru Dasha Yogi	=	Ketu (Makha)
Guru Dasha Rajayogi	=	Moon

With reference to Guru Dasha Chart on Page 27 :

1. Starters are marked in Capital Letters.

2. Rulers are marked in Small Letters.

3. When Starter and Ruler are the same, they are in italics.

4. Squares under Col. 1 and Rows 5 and 8 are left blank as there are no Starters in those Rows. So by the chronological order of Ketu, Guru, Chandra-the two squares are filled up by Ketu.

5. Note for brevity only, the notations of planets as described in Chapter - I of Part - 1 are used.

To work out a Dasha Chart the stellar positions of all the planets and Lagna except that of Moon are kept constant for all Dashas while Moon's star will be progressed by one star for each successive (advance) Dasha.

Guru Dasha Chart of Chart No. - 1 (19-6-1907)

	1	2	3	4	5	6	7	8	9	10	11	12
1			RV	CH	KJ	BD	GR	SK	SN	RH	KT	ASC
2	Kt	RV	bd								KT	
3	GR	K			GR			rh				
4	Ch	T									rv	*Ch*
5	KT	BD				sk						
6	Gr	SN							Gr			
7	Ch	Gr		CH		CH	*Ch*			CH		
8	KT	RH								kj		
9	Gr	KJ	GR		ch							
10	Ch	CH		gr				CH				

To have a clear perspective of a Dasha it is not enough if the mere name of the Dasha Lord is said. In addition, the actual Dasha Star has to be known. For example, in the cited Chart-1 of 19-6-1907 at birth time it was Uttara-4, Sun Dasha situated in tenth Bhava. You know there are 3 varieties of Sun Dasha viz., Uttara in 10, U-Shada in 1 and 2 and Krithika in 5 or 6. Each one is of a different trait obtaining from its situation with reference to Lagna and the nature of the Stars. For the nature and characteristic of stars, please refer to Chapter-II of Part-1,

I said that at birth it was Uttara-Sun Dasha; next follows Hasta-Moon Dasha, Chitta-Kuja Dasha, Swati-Rahu Dasha, Vishaka-Guru Dasha, Anuradha - Shani Dasha and so on. While working out a Dasha Chart the star of Moon should be taken as the actual star of Dasha in question. For example, while erecting Guru Dasha Chart in the above horoscope treat Moon's star as Vishaka and for Shani Dasha Chart as Anuradha and so on.

Mode of Calculation for Starter

First write down the Stars of all the Planets and Lagna

(1) Count the no. of the stars from Sun's Star to the Bhukti Lord's Star and multiply it by 2.

(2) Count the no. of stars from Moon's star to that of Bhukti Lord.

(3) Count the no of Birth Week Day from Sunday in regular order of Week Days.

Add the above three results and divide the sum by 27 (the no. of stars) and count the remainder from Krithika. You get the star of the starter of that Bhukti Lord. Similarly work out for all Planets and Lagnas. You get all the starters. How to fix them up in the Dasha Chart? In the square formed by the Planets column and its stellar Lords Row, the concerned Starter falls. Instead of putting the star write out its lord (as per Udu Dasha Lordship). Then that Planet becomes the starter of that Bhukti lord. Here you will notice one symmetry among starters. In any Dasha all the starters belong only to one group of triple planets viz., (1) Ketu, Moon, Guru, (2) Shukra, Kuja, Shani and (3) Sun, Rahu, Budha. This I have explained at length in Chapter - I, Part -1 on Yoga. Likewise their enemies are also fixed up. For the ready reference of my readers I repeat them here.

To the first set of planets the second set are enemies as follows :

Sun-Shani, Moon-Budha, Kuja-Ketu, Budha-Kuja, Guru-Sun, Shukra-Guru, Shani-Moon, Rahu-Shukra and Ketu-Rahu.

Example to work out Starter :

In the above chart, suppose we want the starter of Rahu in Guru Dasha, Sun star (Mrigasira) to Rahu star (Punarvasu) is 3. Double of it is 6. To this add the no of stars from progressed Moon's Star (Vishaka) to that of Rahu (Punarvasu) i.e., 19. Thus total is 25. This added to Birth week day (Wednesday no.4) makes 29.

As this exceeds 27 (one cycle of stars), dividing by 27 we get 2 as remainder. Reckoning always from Krithika, the 2nd star is Rohini. Thus the starter of Rahu

in Guru Dasha falls at Rohini and the planet is Moon. Place this Moon under Rahu col. against Guru Row as Rahu's star is Guru. If you work out in full you will see that all the starters belong to the group of Ketu, Moon and Guru. This trio are mutual friends and if any one of them becomes a Yoga planet, the other two automatically become Yoga-like planets.

3. Ruler

Once you locate the Starter it is easy to find the Ruler. The Starter is obtained by equating the planet with its Stellar Lord. What he would be if he were himself is what fixes the Ruler. See how many squares down is the Row of the planet from that of its Stellar Lord and progress so much from that starter in the order of Udu-Dasha. That planet becomes the Ruler. Fix him up in that square. Similarly work out for all. Note that in the case of Lagna, the Starter and the Ruler is one and the same planet. On the other hand if you move upwards you will have to digress the order. For example, to find the Ruler of Rahu in Guru Dasha of the above chart : Rahu equated with his stellar lord Guru becomes Moon (Starter), but equated with himself what he would be? In the Dasha Chart the square of Rahu Col. and Rahu row is situated one place down the Starter (Moon). So progress the Starter Moon by one more Dasha. You get Kuja. Put him in that square. Thus the Ruler is Kuja. In Guru Dasha, Moon is the Starter (Rohini) and Kuja is the Ruler (Mrigasira being next to Rohini). Thus you are able to locate not only the planets but their actual stars which will be very useful for *Gochara.*

4. Dasha Yogi

Like the Birth Yogi acting throughout lifetime there is Dasha Yogi playing an equal part in that Dasha. To evolve it, add to the longitude of Birth Yogi twice the longitude of the Dasha Lord. You get the point of Dasha Yogi located. Why twice the Dasha Lord? Once for Sun and again for Moon round which all factors revolve. This holds good in the case of all planets except Moon, Rahu and Ketu whose Dasha Yogis have to be struck by special Rules.

Dasha Yogi of Moon : It is the same as Birth Yogi.

To find the Dasha Yogi of Rahu and Ketu

Between the Stellar Lords of Rahu and Ketu see who is the enemy of the other (usually they will be in inimical stars). First work out the Dasha Lord as in the case of other planets with respect to the latter, i.e. the stellar Lord of this first planet not being inimical to that of the second. After ascertaining the Dasha Yogi of the first of the two the Dasha Yogi of the other automatically becomes the planet who is the enemy of the above Dasha Lord.

Example : (Refer the above chart on page 27).

To find the Dasha Yogi of Guru Dasha :

Birth Yoga point is	10-17-49
Twice Guru Longitude	05-18-14
(Guru is 02-24-07)	
Total	16-06-03
Subtracting 12 Rasis	12-00-00
We get	04-06-03

So Guru Dasha Yogi is situated at 6 deg. 3 min. in Simha, i.e. Makha Star ruled by Ketu.Thus Guru Dasha Yogi is Ketu.

To work out Dasha Yogi of Rahu and Ketu :

Rahu is in Punarvasu (Guru Star) and Ketu in U-Shada (Sun Star). Sun is Guru's enemy. So we must first work out for Guru controlled Rahu.

Rahu's natal position is	03-02-17
Double that is	06-04-34
Add Birth Yoga point	10-17-49
We get	16-22-23

Subtracting 12 Rasis we get 04-22-23 (Pubba). So its lord Shukra becomes Rahu Dasha Yogi. Automatically Shukra's enemy, Guru becomes the Dasha Yogi of Ketu.

On the other hand if Ketu was in U-Shada (Sun) and Rahu in Pushyami (Shani) then you should first work for Ketu and then conclude for Rahu.

5. Evolution of one Dasha Chart from Another

Under this system to predict the effects of Bhukti Lords in a Dasha you have to erect a seperate chart for each Dasha which may look cumbersome and taxing. But it is not so. In a second you can work out any Dasha chart from one worked out chart as there is symmetry in the theory. For every advanced Dasha the Starter and Ruler recede by one stage (reckoning being in the order

of Udu Dasha). Similarly for a previous Dasha they advance by one stage. In this way by increasing or decreasing as the case may be by as many stages as the difference of a Dasha is from one worked out, you may work out at mere sight the Dasha Chart you need. This holds good in all cases except Moon. In the case of Moon the starter of an advanced Dasha will be three stages higher and for a previous Dasha three stages lower. Here you must first work out the Starter and then find out the Ruler independently for a Dasha as no symmetry follows for Ruler as in the case of other planets.

6. *Easy way of working out a Dasha Chart*

The method of erecting a Dasha chart reckoning the Stars occupied by planets has been discussed in detail before. Now I am going to show a more easy method worked out. As per this theory you get the planets (starter and ruler) direct but not the particular star. But you may guess the star also with a little practice.

Method : Have four columns marked at top (1) Planet, (2) Stellar Lord, (3) Starter, (4) Ruler. Write out the planets and their Stellar Lords under cols. 1 and 2 respectively; then, note that the stellar lord of Moon is the Dasha Lord himself.

To find the Starter of a Planet :

(1) Count from the stellar lord of Sun to that of the Planet concerned and double it (Counting in Udu Dash order).

(2) Count from the Dasha stellar lord of Moon (i.e. the Dasha lord) to that of the Planet.

(3) Count the birth week day from Sunday. Add the above three; if it exceeds 9, divide it by 9 (no. of

planets) and take the remainder. This remainder number counted from Sun in Dasha order gives the Starter.

TO FIND THE RULER :

See by how many stages (Dasha order) higher up is the stellar lord from the planet. Increase the Starter by so many stages. You get the Ruler.

Example (the above cited chart) : Guru Dasha Chart.

Planet	*Stellar lord*	*Starter*	*Ruler*
Sun	Kuja	Guru	Budha
Moon	Guru	Moon	Guru
Kuja	Shukra	Guru	Moon
Budha	Guru	Moon	Shukra
Guru	Guru	Moon	Moon
Shukra	Moon	Moon	Rahu
Shani	Shani	Guru	Guru
Rahu	Guru	Moon	Kuja
Ketu	Sun	Ketu	Sun
Lagna	Ketu	Moon	Moon

Working : Say we want the Starter Kuja.

(1) Shukra, the stellar lord of Kuja is 7 stages higher than Kuja-the stellar lord of Sun. (Kuja-Rahu-Guru-Shani-Budha-Ketu and Shukra). Double it ; you get 14.

(2) The same Shukra (stellar lord of Kuja) is 5 stages higher than that of Moon (Guru).

(3) Birthday, being Wednesday, its number is 4.

Adding the above three numbers we get 14 + 5 + 4 = 23. Dividing this by 9 we get 5. Counting from Sun the 5th

Dasha lord is Guru. So Guru is the Starter of Kuja in Guru Dasha.

TO WORK OUT ITS RULER :

Shukra (Stellar lord of Kuja) is 7 stages higher than Kuja himself. So the 7th higher Dasha planet from Guru (Starter) is Moon. This Moon is the ruler of Kuja in Guru Dasha.

Note 1: When a planet is in his own star, its Starter and Ruler is the same planet. That is because such a planet which does not get itself mixed up with any other will be a pure one giving a uniform effect of its own during its entire period.

2. The Starter and Ruler of Lagna is the same always.

To evolve one Dasha Chart from another :

Now we have Guru Dasha Chart. Suppose we want Shani Dasha Chart. As that is one in advance, decrease all the Starters and Rulers by one stage except in the case of Moon. For Moon you have to increase the Starter by 3 stages. The Starter of Moon in Guru Dasha being Moon in Shani Dasha it becomes Rahu. Then you have to work out its Ruler as per usual Rules. Being Shani Dasha, Moon's stellar Lord is Shani. As this Shani is 5 stages higher than Moon the 5th Dasha Lord from Rahu is Ketu. So Ketu is the Ruler.

Likewise, for every receding Dasha increase by one stage for all planets but Moon; both for Starter and Ruler and Moon decrease by 3 stages for Starter only and then work out its Ruler independently.

7. How to read this Dasha Chart ?

Except some special mentions stated below regarding the effects of Dasha Lords it is only the Bhukti effects that have to be read out from this chart. To know the effect of a Bhukti, see who are the Starter and Ruler. Findout from Birth Chart their ownership and situation as well as that of the Bhukti Lord. See how the Starter and Ruler are disposed towards the Bhukti Lord - Friend, Enemy, Birth Yogi, Avayogi, Dasha Yogi, Raja Yogi, Positive or Negative Planet etc. Judging in the manner prescribed for Dasha Reading in Chapter-II, Part-II read the effects of the Bhavas relating to Bhukti Lord, Starter and Ruler. The Starter shows the commencing effect while the Ruler the final effect. As we are chiefly concerned with finality whatever be its beginning the Ruler is most important. So while reading Bhukti effects you may even ignore the Starter and go straight to Ruler. For example, at the initial stage of a Bhukti there may be disappointments in life but in the latter portion all may tend to be happy. So it is enough if you read the Bhukti effect as being finally good.

8. Rules to Judge the Effect of Bhukti Lords

In addition to the general rules enumerated in this Chapter the following additional rules may be followed :

(01) Negative Planet crossing himself or another Negative Planet gives *good results.*

(02) Negative Planet crossing any of the three Yogis.(Birth Yogi, Das'a Yogi or Raja Yogi) causes Yoga in the end after hurdles.

(03) Positive planet crossing himself or another positive planet or any of the above stated three Yogis - *Good*

(04) Negative Planet being himself a Yogi (one of the above three) crossing any planet gives *Yoga, but of a lower order.*

(05) Yogi crossing any other *Yogi-excellent*

(06) Positive planet crossing Negative Planet as Starter and then Positive or Yoga Planet as Ruler-*First bad and then good.*

(07) Negative Planet crossing Negative Starter and Positive Ruler - *First good, later bad.*

(08) Positive Planet crossing Positive Starter and Positive Ruler or Negative Planet crossing Negative Starter and Negative Ruler-*The entire Bhukti is good.*

(09) Positive Planet crossing a Yogi who is the former's enemy-*Both inimical and Yoga effects happen.*

(10) Negative Planet crossing a Yogi who is former's enemy-*excellent results.*

(11) Birth Yogi crossing Negative enemy-*good.*

(12) Birth Avayogi crossing Negative enemy-*Excellent attainments through enemies.*

(13) Negative Retrograde Planet crossing himself or another Negative Planet - *good.*

(14) Birth Avayogi crossing his enemy-*good.*

(15) Birth Yogi crossing his enemy-*bad.*

(16) Rahu crossing Rahu when Shani is Yogi-*good.*

(17) Ketu crossing Ketu when Kuja is Yogi - *good.*

(Note : Ketu is like Kuja and Rahu is like Shani).

(18) Positive Planet crossing Birth Avayogi or Negative planet or an enemy -*Bad.*

(19) Birth Avayogi crossing Positive Planet not being any of the Yogis - *Bad.*

(20) Birth Yogi crossing a Negative Planet or his enemy-*Bad.*

(21) Raja Yogi or Dasha Yogi crossing Birth Avayogi - *Bad.*

(22) Positive Planet crossing the enemy of Birth Avayogi - *Good.*

P.S. :- In all the above Rules the crosser is Bhukti Lord and the crossed one is Starter and Ruler.

Dasha Raja Yogi

Prepare a table of the Dasha Chart in the form shown on page 27. Find the planet that is common under Cols 1 and 2. He becomes the Dasha Raja Yogi. For example in this case Moon repeats in both columns and so Moon is Dasha Raja Yogi of Guru Dasha.

9. Special Effects of Dasha Lord and Ascendant

(01) If in the Birth Chart the Birth Yogi and Birth Dasha Yogi or Birth Dasha Raja Yogi are powerfully situated in the Ascendant it will confer Raja Yoga from birth to death. In Sri Krishna Raja Wadeyar's Chart, Birth Dasha is Kuja. Birth Yogi is Guru and Birth Dasha Raja Yogi (Kuja Dasha Raja Yogi) is Shukra. These two planets Guru and Shukra are in Lagna-Guru being exalted.

(02) If the Lord of the Ascendant sign or its stellar lord (Sthoola or Sookshma lord) be Birth Yogi he will enjoy Yoga from birth to death. *For Sthoola and Sookshma lords see Part-I.*

(03) If the stellar lord Ascendant be in the same star or in the Ascendant then it should be construed as lord of Ascendant being in his own house. If such a stellar lord be himself the Birth Yogi or in the star of Birth Yogi he confers Yoga all through his lifetime.

(04) Some special features of Ascendants :

(a) Even Negative Planet in the star of Ascendant is good.

(b) Even Negative Planet as lord of Ascendant is good.

(c) Though Lagna is Zero-Rasi its Lord gives good.

(05) From Ascendant col. judge such total effect : Longevity, Bodily health, Character etc. This confirms the changing nature of persons as Dashas change.

(06) During a Dasha if the Bhukti Lord crosses the enemy of Dasha Lord and if that Dasha Lord is weak at Birth, Bhavas of that Bhukti Lord suffer during that Dasha.

(07) To read a particular effect during a Dasha consider the planet who is the natural or functional owner of that effect from its Starter and Ruler. For example to know the educational aspect in a Dasha, read the effects of Budha (Karaka) and Lord of fourth Bhava (House of Education). The effects will be predominantly felt during their Bhuktis.

(08) If Birth Yogi crosses Dasha Yogi then that Dasha becomes very powerful and affluent while the rest of the Dashas get spoiled. In Sri Krishnaraja Wadeyar's Shani Dasha Chart, Birth Yogi Guru crosses Dasha Yogi Shani. His Yoga ended with Shani Dasha as he died in Shani Dasha.

(09) Birth Yogi crossing himself-Neutral Dasha.

(10) Birth Avayogi crossing Birth Yogi-final success during the Dasha after strain.

(11) Birth Yogi crossing Dasha Lord-Good Dasha.

(12) If both the Birth and Dasha Yogis are same that Dasha is excellent. In Sri Jayachamaraja Wadeyar's Budha Dasha, Moon is both Birth Yogi and Dasha Yogi. He ascended the throne in Budha Dasha.

(13) Birth Yogi or Dasha Yogi crossing Dasha Lord that Dasha is very good. In Sir Mirza's Moon Dasha, Sun who is Birth Yogi and Ketu Dasha Yogi cross moon as Rulers. His Moon Dasha was superb.

(14) Among Dasha Lord Birth Yogi, Dasha Yogi and Dasha Raja Yogi, if one crosses the other very good results occur during the Dasha.

(15) In judging a Dasha the friendship or otherwise between Birth and Dasha Yogis counts. In the cited Chart I of 19-6-1907 in Guru Dasha, Birth Yogi Rahu is the enemy of Dasha Yogi Ketu. So during Guru Dasha he experienced both good and bad effects.

(16) If the Starter or Ruler belongs to the group of Yogis-*good.*

(17) If Birth Yogi is the enemy of Dasha Lord during this Dasha all the good so far attained vanishes.

(18) Rahu and Ketu playing special role. The defect caused by a Birth Yogi becoming also a negative planet would be remedied, if Rahu or Ketu being its group planet is associated with that planet as stellar lord- Starter or Ruler.

Example : When Guru or Moon is a negative Birth Yogi the effects of its Bhavas would be remedied if its group planet Ketu be associated. Similarly Rahu for Sun or Budha.

(19) In Chapter-III of Part - II, I have given the Mathematical Navamsha Chart. As per that chart, find out the following three stars.

(a) The star in which the Dasha Lord is situated.

(b) The star to which the above star gives its Navamsha.

(c) The star that falls on the Radix position of Dasha Lord in Navamsha.

These three stars play an important part in shaping the nature of Dasha Lord.

If the Dasha Lord is a positive planet and the above stars are also positive (A star is positive when its Lord is positive) good effects follow. Likewise the rest of the readings.

Example : Chart No. 10.

Here, Rahu is in U-Bhadra 3 in Radix position. On this point Uttara 4 falls in Navamsha Chart, i.e. Sun Star. To this Native, Sun is Birth Avayogi and lord of 3 in 2. Thus Rahu assumes the character (death inflicting trait) of Sun. He died in Rahu Dasha.

Chart-7- Here, Guru is in Ashwini 4 at Birth. On this falls Makha I (Ketu Star). Guru is a negative planet (Lord of 3 and 6 and also lord of Zero-Rasi). Ketu is both a natural negative and Birth Avayogi. Thus the negative Dasha Lord Guru being associated (by stellar

positions) with two-fold negative Ketu has conferred on the native during Guru Dasha Yoga of a far higher order. His Jupiter Dasha was the only period par excellent in his life-time. You cannot read this from the fragile Rasi Chart under the old principles.

Examples of Bhukti reading under Guru Dasha of Chart No. 1 cited before.

Guru Bhukti : Guru Lord of 1 and 4 crosses Moon, lord of 8 in 10 but Zero-Rasi thus assuming the character positive. Further this moon is Raja Yogi. So with initial failure finally in the latter part of Guru Bhukti, there was change of profession for better.

Shani Bhukti : Shani, lord of 2 and 3 in 4 crosses Guru, Lord of 1 and 4 in 7 as both Starter and Ruler. This Guru is of the group of Dasha Yogi Ketu and Raja Yogi Moon. During this period his finance improved. He was also happy.

Budha Bhukti : Budha, lord of 7 and 10 (both Zero-Rasis) in 7 crosses Shukra as Ruler, Shukra is Birth Avayogi and lord of 6 in 6. Thus Shukra has become positive planet. Budha, by reason of his being posited in Zero-Rasi has also become positive. So during this period profession was good. Though wife's health was upset, it ended happily.

Ketu Bhukti : Ketu in 2, who is the Sookshma lord of Lagna, crosses Sun as Ruler. Sun is lord of 9 in 7 belonging to Birth Yogi Rahu group. Period was good for finance etc., but bad for father as Ketu is a natural negative.

Shukra Bhukti : Shukra, Birth Avayogi crosses Rahu (Birth Yogi) as Ruler-*good time.*

Sun Bhukti : Sun - Lord of 9 in 7 crosses Budha-lord of 7 and 10. He celebrated marriage and was happy.

Moon Bhukti : Moon - lord of 8 in 10 (a Zero-Rasi) thus becoming positive crossing Guru (lord of 1 and 4) as Ruler-*happy.*

Kuja Bhukti : Kuja - lord of 5, crossing Moon (positive) and Raja Yogi-*good.*

Thus you have Sun, Moon, Budha, Guru and Rahu as positive planets, Ketu as negative planet and Kuja, Shukra and Shani as mixed planets.

This as basis, judge their merits from their Stellar Lord or Ruler. In the above case Sun (positive) in Mars (positive) gives good for 5th and 9th Bhava. The same Mars (being negative 12), it also affects 9th Bhava. Likewise judge the rest.

Further research is needed. The author also had expressed this view in his studies.

-Ed.

Chapter III

PHALA KUNDALI OR DIVISION CHARTS

I. PREFACE

In this chapter I deal with my specialised subject of *'Phala Kundali'* or *'Division Charts'*, the outcome of my hard labour, long research and intuition. I prefer to call it Phala Kundali as I read Phalams (effects) from these charts which are hitherto treated as mere Division Charts that are being used for a different purpose-chiefly to ascertain the sum-total strength of a planet. But I use each Division Chart for reading the effect and its magnitude of a particular aspect in life.

A Rasi in Sanskrit means a heap of things and so a Rasi or Zodiacal Sign contains a multitude of elements. It is common experience that all these portfolio effects of a sign may not be simultaneously good, bad or mixed in one's life. Some of them may be good, some bad or mixed. Also that which is good at a particular time may not be good at a different time. So time is also a factor in addition to differentiation of effects. For example, the fourth Bhava connotes Education, Happiness, Mother, Property etc. A highly educated man may be wanting in happiness. A wealthy man may not have much of education. The mother may be quite happy but on her account the son may feel unhappy and so on.

Also, it may so happen that happiness at one time may dwindle into misery at some other period. Texts have said of particularisation of effects by considering the Bhava and Karaka, but experience does not support it. A very high class or a very low class horoscope is

easy to handle as all things are good and bad respectively. Some of the so-called notable Astrologers who have made their names by sheer chance of luck have had the advantage of handling the charts of only notable persons. This happens when the Astrologer himself is running a good period. When the same Astrologer runs a bad period, middle class people will approach him only to bring down his name. It was therefore my cherished desire to make this sublime science as mathematical as possible, myself being a Mathematics Graduate and thus render it to be correctly handled by all at all times. For several years I laboured to find a way out. All methods failed. At last a day of intuitive flash dawned in my life when a new light struck me and that when I was running proper Dasha for it. Its outcome is this Division Chart - *'A Million Dollar Worth'* as one of my readers has stated.

This is not unknown to you but you may not be aware of the mode of operandi. As I have expressed before I am no inventor. In fact nobody can take that role in a Vedic Science. I am only an exponent of the mode of application of the well laid classic principles. All these years I was under the misconception that Varahamihira's Brihat Jataka was not at all helpful for prediction as many things said therein did not aid accurate prediction. For example, the exalted position of a planet, Gajakesari Yoga and all the other Yogas including Nabhasadi Yogas cited in the text do not act in many cases if Rasi Chart alone is considered. I have seen many horoscopes with Gajakesari Yoga and many exalted planets. Unfortunately, they are after all very ordinary persons. Some of them are even servers and cooks in hotel . Can then the spell of such a Daivagna go wrong was what was perplexing me all these

years. When I found out the theory of Division Charts it convinced me that every word of Varahamihira or Parashara is gospel truth. The mistake lay with us. We did not know how to apply them.

The method of Division Charts is quite handy, intelligible, mathematically precisive and splendid too which has been very much appreciated by all the readers of my previous Articles in *Prof. B.V. Raman's Astrological Magazine.* With this brief preamble I take my readers now to the theory of Division Charts.

II THEORY OF DIVISION CHARTS

The Division Chart is the Varga Kundalis used to ascertain the Sthana Bala of a planet such as Rasi, Hora, Drekkana, Navamsha, Dwadashamsha, Trimshamsha etc. called Shadvarga Bala or sixfold strength of a planet. Varahamihira and Sripathi have narrated only 7 Vargas while Mantreswara quotes 10 Vargas. In *Brihatparashara Hora Shastra* you get many more. Still for prediction some more are needed. I have supplied the deficiency out of a rare publication. Hereafter I call the several Vargas by notation as follows. Rasi as Division 1 or by shorter notation as D-1, Hora as D-2, Drekkana as D-3, Chaturamsha as D-4 and so on, the numerals representing the order of the Division. As stated before each Division Chart is used to ascertain the nature of a particular aspect in life. As present I have been able to cull out 20 Divisions and they are Divisions 1-2-3-4-5-6-7-8-9-10-11-12-16-20-24-27-30-40-45-60. Of these, I omit 2nd and 60th Divisions for reasons explained later. The other 18 Divisions have Zodiacal Maps from which the respective portfolio effects may be read out as per rules that are stated *Supra.* Some texts state the mode of

using these charts but they are not satisfactory. Some differ in the framing of some of these charts. By research I have found out that my method is genuine.

III. BASIC PRINCIPLES TO FRAME DIVISION CHARTS.

Generally, I do not like things said at random like a particular combination of planets causing a particular effect at a particular age or that a particular chart has to be worked out as per particular rule and so on suppressing the fundamental basic principles on which these theories are built. Any of us desire to know the fundamentals than their off-shoots. I would not relish such suppressed knowledge. You may publish a book of thousand planetary combinations. But how far will that help you? To locate your particular combination it taxes you much and it may so happen that your combinations may not at all be there or if there be the readings may not turn out to be true. Instead, if the fundamental basic principles are given out one can emulate not thousands but even crores of combinations.

In this case texts lay down rules for the framing up of these charts. One is different from the other. Then a doubt arises as to whether these rules are dictated at random by any celestial personality or one framed out of fundamental basic principles. If it is former, we have no further voice in the matter when it does not become scientific. So we still believe that there are those basic principles on which the rules are framed. My mind always works that way and I request my readers also to be research-minded.

My approach to this subject will be better understood by classifying the Division Charts into five groups as follows :

(a) D-1
(b) D-2, D-30, D-60
(c) D-3, D-4, D-12
(d) D-11, D-24, D-40 D-45, D-10
(e) D-5, D-6, D-7, D-8, D-9, D-16, D-20, D-27

In framing all these charts, please note that all the parts of a Division must be equitably and wholly and symmetrically or consecutively distributed among the 12 signs of the Zodiac. This must be satisfied in all charts. Then we shall discuss each group.

Group-1 : D-1 is original chart known to all.

Group-2 : D-2 By its very name Hora all parts must be related to Ravi Hora and Chandra Hora only-so in their Rasis.

D-30 It is spoken of not in terms of Rasis but in terms of Planets. Even then a chart is evolved perhaps by sheer intelligence.

D-60 The names only are given out and not their location. So we should not worry with this.

Group-3 : D-3 Its parts are distributed at equal distances. D-4 is similar to D-3.

D-12 It completes one cycle of Zodiac.

Group-4 : As these cannot be distributed evenly in the entire Zodiac some special rules are laid down for these. God only knows how and why they are so defined.

Group-5 : All these charts are framed as per a definite basic principle as follows : In all these cases start always from Mesha. Keep on the regular order and continuity of Rasis and Parts in succession. You get the evolution.

For example : D-6 Starting from Mesha its 1st part of D-6 stays there alone, the second part of Mesha goes to the next rasi - Vrishabha and so on till the 6th (last) part of Mesha goes to Kanya. Further parts commencing from next Rasi Vrishabha must be continued from the next to where the last part of Mesha falls, i.e. Thula. Similarly, the six parts of Vrishabha range from Thula to Meena and again the six parts of the next Rasi Mithuna fall from Mesha (next to Meena) to Kanya and by working further you will reach a symmetry which can be summed up as- in odd Rasis it commences from Mesha and in even Rasis from Thula.

Likewise, if you work for all these charts you will yourself establish the Rule without troubling yourself to remember the Rules parrot-like.

Take D-7 : Starting from Mesha its last 7th part goes to Thula. Next the parts of Vrishabha continue from Vrischika to Vrishabha. Next parts of Mithuna continue from Mithuna to Dhanus and so on. The symmetry struck here may be stated as follows. In odd Rasi it commences from itself and in even Rasi from its seventh.

Take D-8 : Mesha parts cover from Mesha to Vrischika, Vrishabha parts from Dhanus to Kataka and Mithuna parts from Simha to Meena and again the same order of Mesha, Dhanus and Simha repeats. Thus in movable Rasi it starts from Mesha, in fixed from Dhanus and in common sign from Simha.

I hope that these examples will do to enlighten the readers properly.

IV. DIVISION CHARTS AND THEIR PORTFOLIOS

(I) Division-1 (30°)-Rasi (All effects).

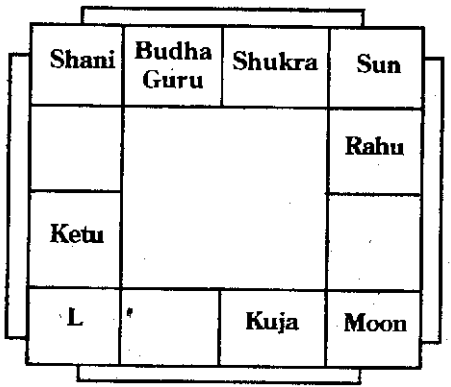

This is known to all and it is the essential basic chart upon which others are evolved. It comprises the sum-total effects in one's life. This must be first perused along with Bhava Chart before going to other Divisions. Lordship of planets should always be looked into only in Rasi Chart and not in other charts except the lords of Ascendants of Division Charts. Results arising due to the characteristics of Rasis and Stars should be read out only from this Rasi Chart; the rest such as friendly, inimical, own or exaltation house, its conjunctions and aspects, its position from Ascendant and other planets and all Yogas, being judged from all charts. Please note that a planet in combustion is always an eclipsed planet in all the charts. You know how to erect this chart (See Part I).

(II) Division -2 (15°)-Hora (Wealth)

In odd signs the first Hora belongs to Sun ranging from 0 to 15 Degrees while the latter half is of Moon. In even signs it is reversed. So no separate sign positions are allotted to form a full chart. Some suggest placing Sun hora planets in Sun's Rasi (Simha) and the others in Moon Rasi (Kataka). If this is adopted all the planets and Lagna fall in either of the two signs only and readings based on such a chart have not been correct. *Satyachariar* suggests a novel method to fix up a complete Hora chart.

A planet in the first Hora of a sign remains there alone while that in the second Hora gives its Amsha to the eleventh sign from it. Here there is no mention of

Sun or Moon. As per this theory the Hora Chart of Chart No.1 of 1907 will be :

As I am not fully impressed with the use of this division, I leave it to my readers to research.

(III) Division-3 (10°) - Drekkana (Brothers and Sisters) :

Varahamihira's theory of reckoning in the order of 1-5-9 Rasis for all signs proves to be correct. Each Division has 10° span and matters relating to the prospects, longevity etc. of the coborns have to be judged from this Division.

(IV) Division-4 ($7\frac{1}{2}$°) - Chaturamsha (Net Assets) :

In each sign the Amshas are distributed to Kendras (1-4-7-10) from it. The span of an Amsha is $7\frac{1}{2}$°. Any net savings such as Cash, Gold, Deposits, Investments and Property will have to be judged from this chart.

(V)Division-5 (6°) - Panchamsha (Spiritualism) :

In Chara Rasi it starts from itself and moves in successive signs. In Sthira Rasi from its fifth sign and in

Dwiswabhava Rasi from its ninth sign. Each Amsha is of 6^0 span. Matters relating to Spiritualism, Godliness, Saintliness etc. have to be judged form this chart.

(VI) Division-6 (5^0) - Shastyamsha (Health) :

In odd Rasi start from Mesha and move in succession till Kanya. In even Rasi, start from Thula and move till Meena. Its span is 5^0. Health is the chief portfolio of this chart.

(VII) Division-7 ($4\frac{2}{7}^0$) - Sapthamsha (Issues) :

In odd sign start from itself and move in succession. In even sign start from its seventh sign and move in succession. Its span is $4\frac{2}{7}^0$. It connotes issues. In the case of female horoscopes sometimes it is found to throw light on husband's prosperity especially when one is childless. Research on this point and see. This is my latest observation and it is in consonance with the theory of peculiarity with female Horoscopy.

(VIII) Division-8($3\frac{3}{4}^0$) - Astamsha (Longevity) :

Start from Mesha in the case of Chara Rasi, from Dhanus for Sthira Rasi and from Simha for Dwiswabhava Rasi and move in regular order. Its span is $3\frac{3}{4}^0$. Longevity is its portfolio.

(IX) Division 9 ($3\frac{1}{3}^0$) - Navamsha (Partner in life) :

In Chara Rasi start from itself, in Sthira Rasi from its 9th Rasi and in Dwiswabhava Rasi from 5th and move in regular order. Please note that I show you here a special feature of this chart. All know how to cast this chart but very few know at what exact point in Navamsha -sign a planet has to be placed akin to its degree position in the Rasi (D-1 Chart) Chart. I call this as

'Mathematical Navamsha Chart' which reveals wonderful results. This has been wrongly shown in. The Astrological Magazine under my Article due to press mistake. I give the correct chart in this chapter later.

(X) Division-10(3°) - Dashamsha (Profession and Status Quo) :

In odd sign start from itself and in even sign from its 9th sign. This is a very important chart. All of us are desirous to know our status quo. Its span is 3°. All about one's attainments by personal efforts, professional status and income thereon, promotions or demotions in the same profession not affecting emoluments have to be read out from this chart while un-earned income, easy money, windfalls in life, elevation to higher status without one's trial have to be read out from Division-11. All promotions in the same post effecting emoluments have to be read out from D-11 and fresh posts from D-10.

(XI) Division-11($2\frac{8}{11}°$) - Labhamsha (Profit and Loss) :

This is next in importance. For, even if one's profession and status - quo is not good a happily situated XI Division Chart will confer on the native financial felicity tending his Balance Sheet towards profit side even without the least exertion for the same due to his past good Karma (Prapathi). The formation of this chart is peculiar. In all Rasis start from Mesha only and go in reverse order. Thus you see that the sign Vrishabha goes without any Amsha as the last eleventh Amsha closes with Mithuna.

Note : Division-10 represents earned income, while Division-11 represents unearned income as patrimony, easy income, side income, lottery, gambling etc.

(XII) Division-12 ($2\frac{1}{2}^0$) - Dwadashamsha (Parents) :

Always start from the same sign and go in order. Its span is $2\frac{1}{2}^0$. All matters relating to parents will have to be read out from this chart. A little care is needed to differentiate Father from Mother. For this you must supplement this chart with Rasi Chart and Karaka.

XIII Division-16 ($1\frac{7}{8}^0$) - *Shodasamsha (Happiness and Vehicles) :*

Here there are two versions. *Brihatparashara Hora Shastra* states that the amshas of Chara, Sthira and Ubhaya Rasis start from Mesha, Simha and Dhanus respectively and go in regular order. But Mantreswara lays down a different Rule. In odd sign start from itself and move in regular order till the 12th sign and 13th, 14th, 15th and 16th are known as Brahma, Vishnu, Iswara and Sun. In even sign the order is Sun, Iswara, Vishnu, Brahma are the first four amshas and the rest commencing with the fifth amsha go from the 12th sign from it in reverse order. As expressed by me before whenever there are alternative theories conclusion should be made by practical applications. By research I have found Mantreswara's rule satisfactory. But here there is a flaw. If lagna or a planet be in one of the four non-zodical amshas, viz. Brahma, Vishnu etc., what to do? Latest research has proved that these Amshas may also be brought inside the chart by continuing the counting further in the same order. In odd signs 13th to 16th amshas fall in 1st to 4th signs from itself and in even signs the 4th falls in 1st sign itself, 3rd amsha falls in 3rd from the sign and the 1st amsha in 4th sign from that sign. Thus all the amshas are brought inside the chart.

(XIV) Division-20($1\frac{1}{2}^0$) - Vimhsamsha (Upasana)

Just like Division-8 you have to start from Mesha. Dhanus and Simha for Amshas of Chara, Sthira and Ubhaya signs respectively in regular order. Its span is $1\frac{1}{2}^0$. Worship of a deity and having its blessings, Upasana Shakti has to be read out from this chart.

(XV) Division-24 ($1\frac{1}{4}^0$) - *Siddhamsha (Education) :*

In odd Rasis start from Simha and in even Rasis from Kataka and move in regular order even after completing the first cycle of Zodiac. Its span is $1\frac{1}{4}^0$. Its portfolio is Education. By education all types are included; General, Vedic, Psychic, Mantric, Scientific, Cultural, Physical etc.

(XVI) Division-27(1 1/9^0)-*Nakshatramsha (Strength) :*

In Mesha and its trinal signs (Simha and Dhanus) start from Mesha.

In Vrishabha and its trinal signs (Kanya and Makara) start from Kataka.

In Mithuna and its trinal signs (Thula and Kumbha) start from Thula.

In Kataka and its trinal signs (Vrischika and Meena) start from Makara.

In all the above cases go in regular order any number of times round the Zodiac till you reach your point. Please note that a sort of symmetry exists here. The amshas start from Mesha or its Quadrants (1-4-7-10). On the other side the Trinal Rasis form one group. Thus there is trinal position on one side and Quadrantial on the other side. It is called so because of there being 27 stars. Physical strength and stamina of the body has to be judged here.

(XVII) Division-30 (1^0) - Trimshamsha (Happiness and Misery)

In odd Rasis the Thrimshamshas are distributed to planets as follows : The first 5^0 to Kuja, the next 5^0 to Shani, the next 8^0 to Guru, the next 7^0 to Budha and the last 5^0 to Shukra. In even Rasi the reverse is the case. Shukra 5^0, Budha 7^0, Guru 8^0, Shani 5^0 and lastly Kuja 5^0. The text stops with this but does not say anything about their position in the Zodiac. But I try to fix them up as follows :

If lagna or planet be in odd Rasi place, it is the odd Rasi of the lord of that division. If even place, it is even Rasi.

(XVIII) Division -40 ($\frac{3}{4}^0$) - Swavedamsha (Auspicious or Inauspicious effects) :

In odd Rasi count from Mesha, in even from Thula. This is akin to Division-6. Its span is $\frac{3}{4}^0$ and anything good or bad has to be read out here.

(XIX) Division - 45 ($\frac{2}{3}^0$) - (Character and Conduct) :

Just like Division - 16, start from Mesha Simha and Dhanus in the Rasis of Chara, Sthira and Ubhaya respectively. Its span is $2/3^0$ and its portfolio is character reading.

(XX) Division - 60 ($\frac{1}{2}^0$) - Shastyamsha :

Only the names are cited and they are termed good or bad.

You have to infer the effects from its name only. No specific place is assigned to them in the Zodiac. Its span is $\frac{1}{2}^0$.

V. Table of Amsha Parts in Degrees and Minutes

Amsha Numbers	Divisions Chart Numbers								
	7	8	9	11	16	24	27	40	45
1	4-17 1/7	3-45	3-20	2-43 7/11	1-52 1/2	1-15	1-06 2/3	0-45	0-40
2	8-34 2/7	7-30	6-40	5-27 3/11	3-45	2-30	2-13 1/3	1-50	1-20
3	12-51 3/7	11-15	10-00	8-10 10/11	5-37 1/2	3-45	3-20	2-15	2-00
4	17-08 4/7	15-00	12-20	10-54 6/11	7-30	5-00	4-26 2/3	3-00	2-40
5	21-25 5/7	18-45	16-40	13-38 2/11	9-22 1/2	6-15	5-33 1/3	3-45	3-20
6	25-42 6/7	22-30	20-00	16-21 9/11	11-15	7-30	6-40	4-50	4-00
7	30-00	26-15	23-20	19-05 5/11	13-07 1/2	8-45	7-46 2/3	5-15	4-40
8		30-00	26-40	21-49 1/11	15-00	10-00	8-53 1/3	6-00	5-20
9			30-00	24-32 8/11	16-52 1/2	11-15	10-00	6-45	6-00
10				27-16 4/11	18-45	12-30		7-30	6-40
11				30-00	20-37 1/2	13-45		8-15	7-20
12	Trimshamsha :				22-20	15-00		9-00	8-00
13					24-22 1/2				
14	Kj Sn Gr Bd Sk				26-15				
15	5 5 8 7 5 - in-odd Rasi				28-07 1/2				
16	Reverse Order - in even Rasi				30-00				

How to use the above Table ?

This table does not show Amsha parts of all Divisions. Divisions 2-3-4-5-6-10-12-20 and 60 are not tabulated as they may be readily struck being wholesome measurements not involving fractions as in the case of the Divisions included in this table.

Divisions 7-8-9-11 and 16 are worked to 12 stages only and Divisions 27 up to 9 stages only. The reason is this :

For example, while working the D-24 for planets situated within 15 degrees count the parts as shown in the Table. If a planet is more than 15 degrees then subtract 15^0 out of it and find the part represented by the balance. That represents its count.

Similarly in the case of D-40 divide the planetary position in Degrees etc. by 9 and find the part corresponding to the remainder.

Likewise for D-45 divide by 8 and take the remainder. In the case of D-27 up to 10 degrees find the parts. Exceeding 10^0 and below 20^0 divide by 10 and reckon the part corresponding to the remainder and add 9 to it. The total is the part. But if the planetary position be more than 20^0 find the part corresponding to excess over 20^0 and add to it 18(9+9) or say 6(18-12 *one Zodiac*) that gives the part.

(VI) HOW TO JUDGE THE EFFECTS FROM DIVISION CHARTS?

Prior to getting into this subject one must have a thorough knowledge of all the general principles laid down by Varahamihira, Parashara, Jaimini, Mantreswara,

Satyachariyar and other classic masters. For the benefit of the readers I cull out in a nutshell the most important ones that are of much importance here. While dealing with a Division Chart treat it as if that is the principal chart and apply all the general rules. You get the result so far as that portfolio is concerned. While looking into a D-Chart, confine only to the particular effect of that chart. The effect will be experienced only during their periods. The following rules may be noted in handling D-chart.

(1) The most important and necessary condition for a planet to give beneficial effect of the D-chart is its relative good position from the Lagna of that D-chart irrespective of other factors such as being in inimical or debilitated sign or aspect or conjunction with other planets. Thus under this theory primary factor is its position from D-Lagna. If the planet be in places other than 3,6,8 and 12 (Dusthanas) it gives good results, its magnitude depending on other factors. But if they are in Dusthanas they always give bad results whatever their other positions be.

But there are some exceptions to this rule :

(a) Kuja even in 6th in all D-charts does good. For he aspects lagna from 6th.

(b) Budha even in 8th in D-4 only gives good. Note the general theory of Budha in 8 as being exceptionally lucky. It is only here and not in other D-charts.

(c) Shani though in 8 does not kill, is the general say. This holds good only in D-8 chart when Shani is in D-8-Lagna and not elsewhere. Thus the above three exceptions have to be remembered.

(2) Consider both the Rasi chart (D-1) and the Division chart to weigh an effect. As stated above, position in D-chart surpasses that in D-1 chart. Even though a planet is in bad Bhava in D-1, he gives good effects of a D-chart if he is there in good position from D-Lagna. Likewise however powerfully and favourably a planet is situated in D-1, if he is in Dustana in the D-chart he gives bad effects of that D-chart.

(3) Having concluded the good or bad effect as per Rules 1 and 2 above the magnitude of the effect has to be judged from both D-1 and D-charts as follows :

(a) If the planet has any kind of Shadbalas [Temporal (Kalaja), Motional (chesta), exaltation (uccha), Directional (Digbala), Declinatory (Ayanabala) or Positional (Sthanabala)] in D-chart and favourably situated from its Lagna it gives good effects of a higher magnitude, the more the quantum the more the simultaneous varied strengths. If in addition to this the planet is also powerfully situated in D-1 also excellent results of a superior degree happen.

(b) Even a mere ordinary good position in D-chart coupled with a strong position in D-1 (though in Dusthana in D-1) gives effects of higher order.

(c) But, however strongly and favourably situated in D-1 if the planet be in Dusthana in D-chart he does bad to that chart portfolio even if he is exalted or in his own house in that D-chart. All these establish the necessity of a planet being in good positions from D-lagna to give good results.

(4) A combust or vanquished planet (in planetary fight) in D-1 is of no avail in D-chart even if he is well

and powerfully situated in D-chart. He will give worst results to that D-effect if he is also badly placed in D-chart. It practically amounts to dealing with a dead object.

(5) If a planet situated favourably in D-chart is debilitated it gives good effect if it attains Neecha Bhanga. For tests of Neecha Bhanga read Part-1 on Yogas.

(6) Of all the powerful positions the most important are (i) Exaltation, (ii) Vargottama, (iii) Own house and (iv) Digbala. All these have to be applied to all the D-charts. In this connection I wish to point out that a planet situated in the same sign both in D-1 and any other D-chart must be construed as being in Vargottama position with respect to that D-chart and effects of that D-chart read thereon. Unfortunately, this aspect is being judged only by Navamsha position (D-9). When you apply this theory you get convinced of my argument.

(7) For reasons stated above exaltations in 3,6,8 or 12 in D-chart are of no avail.

(8) See if any of the general Yogas exist in the D-chart. If so gauge the magnitude by their strengths as stated above.

(9) The effects of planets in D-chart get modified by conjunction or aspect of other planets in the D-chart. Here only the natural benefics and malefics are to be taken and not the functional ones. Among benefics, I consider Guru as the only planet to alleviate the evil indicated by a planet in bad position in D-chart. If that Guru is powerfully situated in that D-chart his aspect is certainly of effect, but a debilitated Guru cannot be banked upon.

(10) The Birth Yogi and Avayogi have to be noted here. If the Birth Yogi is in good place in D-chart, he gives Yoga to that effect but in bad position he is lost. Similarly, Birth Avayogi in a favourable position in D-chart will while causing good to that effect create hindrances, anxieties and ruptures hand in hand.

(11) Lordship of Bhavas are to be considered only in D-1 and not in D-charts except lord of D-lagna.

(12) A debilitated planet in D-chart though in good position gives bad, if there be no Neecha Bhanga.

(13) D-Lagna becoming Vargottama is itself an indication of the effect of that D-chart going very high provided its lord is well placed there. If he is in Dusthana in such a D-chart, only dreamy effects are felt by the native. In addition to D-lagna being Vargottama its lord be also likewise or otherwise powerfully and favourably situated in D-chart, he gives excellent results.

(14) 3rd and 8th places are death-like places. A planet in 8 or 3 in D-chart causes death to that effect. In D-9 to wife, in D-10 to profession. Death may be construed as also severance. A planet in 3 in D-10 causes retirement from service (severance). Please note the exception of Shani in 1 in D-8 and Budha in 8 in D-4.

(15) 2nd house is said to be neutral house. A planet in 2 in D-chart also behaves likewise.

(16) A planet in 6th in D-chart in a powerful Rasi gives good first and bad later on.

(17) It is said in general Astrology that the more the number of planets aspecting Lagna, the more powerful the native becomes. The same theory applies to D-chart also.

(18) Benefics on either side of Lagna is said to confer Yoga. True even in the case of D-chart. But in such a situation if any malefic joins the benefic, the Yoga gets marred. Similarly, malefics on either side though spoils first, gets better if any benefic joins them. What is said of Lagna holds good with respect to the seventh house too.

Here one thing has to be noted. In the case of malefics if they are Birth Yogi or in their own house in D-chart they give modified good effects.

(19) Just as the 2nd and the 12th places from lagna were dealt within 18 above, if planets are placed equidistantly from lagna such as 2-12, 3-11, 4-10, 5-9, 6-8, 1-7 they cause effects as stated above depending on their natural benefic or malefic character. This is a special mention of *Jaimini,* known as *Sankhya Yoga.*

(20) In D-12 if Moon is with Kethu invariably the native's mother becomes a widow.

(21) Planets or Bhavas hemmed in between malefics is declared to go bad. Similarly a planet in a D-chart or D-Lagna hemmed in between malefics becomes bad.

(22) Malefics in 12, 1 and 2 in D-chart-*bad.* Benefics in 12, 1 and 2 in D-chart-*good.*

(23) An incident such as marriage day, commencement of profession or fresh undertaking, birth of an issue, etc. happening during the period of a planet situated badly in the respective D-chart may not end happily.

(24) Accession, Election and other positions of conferrable nature are to read from D-11.

(25) Uccha with Neecha or one with his enemy-*not good.*

(26) Of the two planets on either side of lagna or equidistant from D-lagna if one is benefic and the other malefic, then bad results only during the malefic period.

(27) A planet, though in 8 in D-chart, does not harm if aspected by powerful Guru.

(28) Female horoscope is specially treated by classics confining at least to our Indian womanhood. Our females are mostly subordinates to either their husbands or their care takers except in the case of few who remain as independent members. As marriage and married life is held sacred in India D-9 is very important for females. If this Navamsha Chart is good, all the rest are good.

(29) A Karaka in bad position in D-8 kills the relative connoted by the Karaka. *Example :* Sun in 8 in D-8 kills father, Moon-mother, Shukra-wife and so on.

(30) Any Yoga in a D-chart is no doubt operative throughout life time but particularly felt during their periods.

(31) Even a debilitated planet in good position in D-chart does good if he is a Yoga planet.

(32) In D-11 the effect of the Bhava occupied by the planet counted from D-lagna happens, one in 7 causes marriage, in 4 property etc.

(33) Parivarthana Yoga (mutual exchange of planets) existing in D-chart has its due effect.

(34) What are all said of the planets in D-charts will be felt during their periods.

(35) If the lord of D-lagna is Birth Yogi or Duplicate Yogi he gives Yoga effects even in ordinary position.

(36) If the lord of D-lagna is in Dusthana the result will be bad on and after its Dasha.

(37) Karaka in Bhava is bad as per general astrology. How to apply it to D-charts? Karaka in the corresponding D-lagna is bad. *Example :* If Budha is in Lagna in D-24, Education gets spoiled. Guru in Lagna in D-7, issues are affected. Shukra in D-9 lagna affects the wife. Sun or Moon in D-12 lagna affects father or mother respectively. Kuja and Guru in D-3 Lagna affects the younger and elder co-borns respectively and so on.

(VII) ILLUSTRATIONS OF DIVISION CHART READINGS

Note : For charts see pages from 160 to 179

(01) Chart-1 : In D-9 Rahu is in lagna as Vargottama. So he was married in Rahu Dasha with a high family girl and that was to his benefit. This cannot be read out from D-1.

In D-10 Guru and Shukra are on either side of lagna and Budha too in lagna with Rahu (Birth Yogi). So all good though this Yoga is operative throughout the life; it is specially felt in Guru Dasha when he rose up in rank and status.

In D-11 Lagna is Vargottam and its lord Guru is in 9th but in ordinary sign. Yet because of Vargottam lagna his income during Guru Dasha was bigh enough and he had a credit balance.

In D-4 Rahu, Birth Yogi is Vargottam in 5. So in Rahu Dasha he acquired a good property and in Guru Dasha it was bettered and had net assets as that Guru is in lagna and own house.

D-7 is powerful only in Shani Dasha as Shani is exalted in 9. His children's prosperity to be read in Shani Dasha.

D-24 Shani in 7 is exalted and has Digbala a very powerful combination. So in Shani Dasha his real education came to lime-light.

(02) Chart-5 (PMB) : His D-1 is very deceptive. See how good is his D-10.

In D-10 : Budha is in 5 in exaltation. In Budha Dasha he was an officer drawing Rs. 800 p.m. Shukra in 3 caused his retirement. Can you read this from D-1 where Budha is in 12?

(03) Chart-7 (PR) : This is also a very difficult Rasi chart to perdict.

In D-10 : Guru as exalted with Digbala and Moon in own house are together powerfully situated in Lagna causing also Gajakesari Yoga. In Guru Dasha he rose up to the rank of an officer on Rs. 600 p.m. in a Firm though an S.S.L.C.

His D-4 is equally powerful which gave him a Bungalow at Madras and other properties of high value more than a Lakh.

His D-11 is also powerful where Guru is in 7 in his own house. So during the same Guru Dasha he had high help from his wife side relative.

(04) Chart - 8 (KGV) : His Rasi Chart is wholly deceptive. Moon, Kuja, Sun and Rahu are all in Dusthanas and their Dashas operated in succession and now Rahu Dasha is running. What good can be said from D-1?

In D-10 Sun in 10 (Digbala), Moon in 9 (Vargottam), Kuja in 8 bad, but in his own house and lord of this lagna. Rahu is his Birth Yogi in 10th with strong Shani.

So of all Dashas that ran to some satisfaction his Rahu Dasha is best earning Rs.700 p.m. in a firm as consulting Engineer.

In D-6 Rahu is in 8th, but his own sign. He is also Birth Yogi. So with all ill-health caused he is maintaining health as Guru aspects Rahu.

In D-12 Moon and Ketu are in 8th causing widowhood to mother in Ketu Bhukti.

(05) Chart-10 (Abhijit)

In D-9 Lagna is Vargottam, Shukra is there as Vargottam and lord of Lagna Budha is in 4 as Uccha. In Shukra Dasha he married a girl of a higher family and lived happily with her.

In D-10 Shukra in Lagna as exalted with Moon (Benefic). In Shukra Dasha he became a Gazetted Officer. Sun in 9 in ordinary condition had no perceptible change. In D-1 Moon is in 6th and Neecha, so appears to be bad. But that Dasha was good to him when he became Head of Department. In D-10 he is in Lagna with exalted Shukra. Though Kuja occupies an ordinary 4 in D-10, his being in own house in D-1 gave him a far higher position. Though Rahu is in 10 in D-1 being in 12th in D-10 got him out of service as he died in Rahu Dasha.

D-8 Rahu is in 8th. He died in Rahu Dasha.

(06) Chart-11 (Mrs. Rath)

This is a female horoscope. So her D-9 has to be chiefly examined. Here all planets except Kuja and Shani are good. Shani is also Birth Avayogi. So she lost

her husband in Shani Dasha being in 3rd (death house). Her Guru Dasha was excellent. See Guru in 10th in his own house, Retrograde and Vargottam. Her husband was a State Officer drawing Rs. 2000 p.m.

(07) Chart-12 (MSS) :

D-4 : Shukra in 4 (Digbala) in his own house and with Shani (Birth Yogi). Too many qualifications. By his father's death he acquired patrimony in Shukra Dasha about a lakh worth.

D-11 : His Shukra in 9 as Vargottama gave him easy money of his father (9th house) in Shukra Dasha.

D-10 : Shukra in 4 with Digbala. In Shukra Dasha he became a Gazetted Officer.

(08) Chart-14 (MV)

D-9 : Moon (Birth Avayogi) in 6 with Ketu caused paralytic stroke to his wife. As Guru aspects this Moon she survived.

D-4 : Note one permanent Avayoga acting here. Kuja and Rahu, the two malefics are on either side of lagna. So with all and any amount of income he cannot lay-by any savings.

D-6 : A similar good Yoga is here guarding his health always. Budha, Guru and Shukra are in 6, 7 and 8-good. Though Sun is with Shukra as that Sun is in his own house does good.

D-10 : Sun in 11 is exalted here and in his own house in D-1. So doubly strong. He occupied high positions in Sun Dasha.

D-24 : Among all planets Sun in 10 (Digbala and

Uccha with Swabala in D-1) is of high brilliancy. In Sun Dasha he attained highest Degree in M.I.E.

(09) Chart-16 (Sri Krishnaraja Wadeyar)

D-10 : Guru, though in ordinary position here, is exalted with Digbala in D-1 and also is the lord of this lagna and more than all this Lagna falls in the Rasi of Birth Yogi. So in Guru Dasha his fame spread far and wide as Raja-Rishi learned in all subjects. Shani though in 9 here is with Ketu and worse with Avayogi Sun. So he died in Shani Dasha severing kingship.

D-8 : Here again Shani in 7 (maraka house) with Avayogi Sun and Guru in 8. He died in Shani Dasha Guru Bhukti. As Guru is both a benefic and Birth Yogi he will have gone to a higher world.

(10) Chart - 17 (Sri Jayachamaraja Wadeyar)

The Rasi Chart (D-1) is highly misleading. See the D-charts. How splendidly facts are nakedly visible.

In D-4 Budha in 8 and he is lord of this Lagna. Added to it Budha and Shukra on either side of VII and Moon (Birth Yogi) in 7th as Vargottam. Thus the 6,7 and 8 from Lagna are occupied by benefics. Also you know that Budha in 8 in D-4 Chart gives good. So in Budha Dasha he got the throne and what not and that too quite unexpectedly. This cannot be read out in D-1.

In D-12 : The same 8th position of Budha (Avayogi) killed his father.

In D-10 : Shani is ordinary and Budha too except that he is lord of this Lagna. But he is Avayogi. Even Ketu, Shukra etc. are all placed here in ordinary positions and yet he is a great personality of the day. How to account for this ? This shows that he is blessed with a

good past karma the results of which he will enjoy in this birth. Such events have to be foretold from D-11. So see his D-11.

In D-11 : All the planets are happily and very powerfully situated. Hence the effect.

I have already said that one's professional income has to be judged by D-10 while free and voluntary opportunities are to be seen in D-11. Even as Governor he did not earn by profession as he surrendered the entire pay to the Government. But he had enough of D-11 good things.

In D-16 : Lagna is Eswara. So by Eswara kripa he had conveyance since birth. See all the planets in the Zodiac are superb. So he enjoyed best of comforts.

(11) Chart-8 (Sir Mirza Ismail)

In D-10 : Shukra is extraordinarily bright, exalted in 5 here and in own house with Digbala in D-1. In Shukra Dasha he became the pet of His Highness and occupied a key position. Except that Sun is Birth Yogi otherwise he has no superior power. Moon in 10 here and in own house in D-1 made him a renowned Dewan.

Kuja, lord of this lagna, is in 9th but with his enemy Ketu and in Neecha. He is also Neecha in D-1. So he met his retirement under unhappy circumstances in Kuja Dasha. This is to prove that Vargottama Neecha is no good.

In D-8 : Rahu in 8 killed him in Rahu Dasha though with Guru as that Guru is also there submerged.

(12) Chart-19 (Sir P.N. Krishna Murthy)

His D-1 is not remarkable. See his D-10.

In D-10 : All the planets are extraordinarily powerful. Moon in 2-neutral, but in D-1 Uccha : Kuja and Rahu in lagna with its lord Guru, there alone with Digbala and Swabala, Shani in 11 in own house aspecting lagna, Budha in 5 as Vargottama, Ketu in 7th in the house of Budha and aspected by powerful Guru; Shukra in 4 as Vargottama and Digbala; Sun in 10 with Digbala. What else is needed? He was a very capable Dewan.

(13) Chart-20 (Wealthy High Officer)

For wealth and status we have to look to D-4; and D-10

In D-4 : Kuja in 7 with powerful Guru. Also this Kuja is here in own house and D-1 with Digbala. Rahu is Birth Yogi in 5th in his own house with its lord Shani. So Shani also has become powerful. Guru is Vargottam in 7. Budha is Vargottama in 4 here with Digbala in D-1. Ketu in 11 with good aspects. Shukra in 9 though ordinary is exalted in D-1. Sun is Neecha, not so good. Moon in 10 in own house. What else is needed ? All the good and powerful Dashas intervened at proper ages. So he had huge wealth at his command.

In D-10 : Guru in Lagna as Vargottam with Digbala with exalted Sun. Kuja and Budha are the only bad planets here. But their Dashas did not come in time. So the other happy Dashas lifted him up in life and status.

(14) Chart-21 (Leading Statesman)

For the Statesmanship D-10 to be looked to. In D-10 Rahu in 11, Guru in Lagna as Vargottama and Digbala himself Duplicate Yogi with a similarly powerfully placed Birth Yogi Budha. Shani as lord of this lagna is also there. Rest are also well placed. But we

are chiefly concerned with planets whose Dashas intervene at proper age. At birth he ran Rahu Dasha for 17 years, then Guru Dasha till 33, then Shani Dasha till 52 and later Budha Dasha till 69 by which time he was sufficiently old. See how to his good luck the highly powerful and yogaic planets have ruled him in succession. So all round from birth to lifetime he was famous.

(15) Chart-22 (TGR)-(A powerful and intelligent Head of Department)

In D-10, Rahu in 5 Vargottama, Guru as lord of this Lagna in 9 as Retrograde and Vargottama (extraordinarily powerful) and he is also Duplicate Yogi. So he started as a Gazetted Officer in Rahu Dasha and became a very powerful Head of the Department. Shani in 3 caused his retirement from service.

In D-4, Guru in 8 made him sell away his house. Shani in lagna as Vargottama gave him a Big Bungalow worth a Lakh in his Shani Dasha.

In D-8, Shani in 2 *maraka* house killed him in Shani Dasha.

(16) Chart-23 (Sri Kasturi Srinivasan of Hindu)

See his D-10 is worse till the end of Ketu Dasha, i.e. till his 45th age. On and after Shukra Dasha there is some light but even that is not satisfactory. But he was wealthy and notable, all due to past karma effect for which see his D-11.

In D-11. Even here planets till the end of Ketu Dasha are bad. See his Shukra in 4 as Uccha with Digbala and Sun in 9 in own house. These two Dashas blessed him very highly when he enjoyed all comforts of finance

without exerting for the same. Thus it is enough if in one's life a long period Dasha is good as in this case.

In D-12, Guru as lord of this lagna in 10 in his own house is highly powerful. Shani in 7 has Digbala. So during these two Dashas that ruled him from birth to his 21st age his parents were in high status.

In D-8 : Note Sun in 8. He died in Ravi Dasha.

(17) Chart-24 (AVR): (A civilian officer who was a minister)

In D-10 : Rahu in 5, Guru lord of lagna in 10 aspected by Birth Yogi Sun were good during their Dashas that ran till his 53rd age when he became the Head of Department. Shani in 11 as Uccha lifted him as minister in Shani Dasha. But as he is Avayogi and with Ketu he retired in Shani Dasha alone.

In D-11 : All are good and strong. So his finance is good.

(18) Chart-25 (Prof. B.V. Raman):

D-10 : Till the end of Rahu Dasha (25th age) his professional aspect is mediocre. Guru is in 9 as Vargottam. In his Guru Dasha his profession improved. As he is Avayogi his Guru Dasha is not a period of smooth walk-over. He had to face many anxious periods but finality would be good. Shani being in 2 as Neecha he has to slow-down his profession in Shani Dasha. Budha Dasha is better.

D-11 : Here Guru, Shani, Budha are all well placed. Shani in 11 and in his own house is excellent. During Shani Dasha he will have plenty of profits and financial felicity with least trial.

D-4 : All planets are good and powerful. So he is blessed with high valued property and net assets.

(19) Chart-26 (KPJ): (An officer with good paternal inheritance and property through wife)

D-9 : See how powerful is this chart. Shukra is in 4 both here and D-1 with Digbala. Moon is also in 4 here with Digbala. Sun in 1 is exalted aspected by Birth Yogi Budha. Note that Moon is also Duplicate Yogi. Shukra, Ravi and Chandra Dashas ruled till his 36th age all happy and highly prosperous ones for wife and marital happiness. He has a handsome wife through whom he had much gains too.

D-10 : Sun is Vargottam in 5 and he is the lord of this lagna too with Moon the Duplicate Yogi aspected by powerful Birth Yogi Budha. Kuja in 6 in exaltation is excellent but not without rubbing as he is Avayogi. Rahu in 3 causes retirement in Rahu Dasha. Thus you see the Dashas of Sun are excellent. He is an officer drawing Rs. 600 p.m.

D-11 : All planets are happy here. So he has gains in all directions. He is good for a lakh of rupees today. Budha is bad but his Dasha does not intervene.

D-4 : As before Moon and Shukra have Digbala here, Sun Vargottam, Guru Vargottam and own house. Shukra, Ravi and Moon Dashas that ran till his 36th age gave high surplus assets. Here after it falls down as Kuja is in 8 and Rahu with Neecha Shani. Note as Kuja is also Avayogi he will lose plenty of surplus assets.

(20) Chart-27 (MKR) :

This is a case to show that if a Birth Yogi or Duplicate Yogi is well situated in D-chart he will confer

Yoga even in ordinary Rasi. See his D-10. Budha is very ordinarily situated in 9th. As he is duplicate Yogi in Budha Dasha he is drawing Rs. 500 p.m. as an Engineer in a firm.

(21) Chart-28 (KSK) :

Guru in 10 being Duplicate Yogi fixed him up in a decent job to start with. Shani who is Birth Yogi is here in 7th with Digbala. So in Shani Dasha he is a Gazetted Officer drawing Rs. 600 p.m. His D-11 is good which gave him many financial promotions.

In D-12 : Guru is in 10 in own house. He is also Duplicate Yogi. During his Guru Dasha his father fared well. Shani in 7 with Digbala caused name to his father. As it is maraka house father died in Shani Dasha.

(22) Chart-29 (V.P.N.) : (Patrimony in Lakhs but not successful in professional status)

D-4 : Except Sun and Moon the rest are good. In Guru Dasha he assumed mastery over paternal good. Shani in 9 as Vakra and in own house and also in exaltation in D-1 showered in Shani Dasha good property and income out of it. See its conjunction with Kuja and Avayogi. During the same period one of his younger brother (Kuja-Karaka) dwindled the jointly held ancestral good. Budha in 8 in D-4 is good-more so as he is Birth Yogi.

D-10 : The only planet that is good here is Shani in 7 with Digbala, Vakra Bala and Uccha Bala in D-1. In Shani Dasha he became a Gazetted officer.

D-3 : As before Shani is here exalted, in 5 and Vakra and Vargottam. In Shani Dasha his brothers prospered

well. Budha, lord of this Lagna who is Birth Yogi and Retrograde is here in 5 and in D-1 in own house. In Budha Dasha one of his brothers shot out into Public Name and held a high position in life.

(23) Chart-30 : (Sri B.N. Vijaya Dev)

D-10 : Rahu, Birth Yogi is here in 7 with Digbala. In Rahu Dasha he was public prosecutor. Guru is in 12. In Guru Dasha his profession failed and he left off practising as a lawyer.

D-11 : Better than Rahu, Guru is powerfully placed here in 11 in exaltation. He is also Vakra. With all these powers he had free flow of income without exertion.

D-7 : Putrakara Guru though exalted is in 12 with Ketu and Avayogi Shukra. The Dashas of operative nature for this aspect were Rahu, Guru who are in 6 and 12 respectively. So he died childless.

D-8 : Guru in 10 (Karmasthana) killed him in Guru Dasha.

(24) Chart-32: (TR)

In D-10 : Vakra Shani is in 5th with Kuja (Birth Yogi). Also Shani himself is Duplicate Yogi in own house in D-1. So in Shani Dasha he rose to the rank of an officer on Rs. 1000 p.m. Shani is good in D-11 too.

In D-24 : All planets are good. He possesses multiple qualifications.

In D-7 : The lagna is hemmed in between the two malefics Rahu and Kuja. So no issues.

(25) Chart-33 : (V.N)

D-10 : Rahu is good enough being in 9 but its lord

Budha is in 12 not very good. See Guru is in 5 with exalted Moon forming thus Gajakesari Yoga. He became a Gazetted officer in Guru Dasha.

D-11 : Guru in Lagna as lord of Lagna very powerful giving high income without trials. But see Shani Avayogi with him and malefic Kuja. All that will be spent away on questionable matters.

D-4 : Lagna is Vargottam. Moon, Kuja, Rahu and Guru are all good and their Dashas also appeared. So since birth he had property. Among them Guru being lord of this Lagna and Vargottam has given him some more substantial asset.

26. Chart-34: (Dr. K.)

D-10 : His Rasi Chart is a mess. But see D-charts. In D-10 Budha in 6 no good. Ketu in 4 its lord Sun in 1 good. Ketu Dasha was good for profession. Shukra in Lagna in own house is excellent. He is aspected by Birth Yogi, Kuja better.

D-11 : Ketu in own house and Shukra in 4 (Digbala). During these Dashas he earned thousands and is showing heavy credit balance.

D-4 : Shukra, though in 12, is in own house aspected by Birth Yogi Kuja. During Shukra Dasha he made several properties worth more than a Lakh.

(27) Chart-36 : (M.S.S.)

This is a very important illustration to show that even a minute's difference in birth time works wonders. See his D-11 chart. Here Sun is exalted, Moon in own house, Guru exalted, Budha exalted, Rahu own house, Ketu and Shani normal places. With all these superior

powers he is after all a Second Division Clerk. See all these powerful planets are submerged in 3, 6, 8 and 12. Of them Rahu and Shukra are good. But their Dashas have not yet operated. Just see his lagna is 6^0 - 16' of Kanya. After 5^0 - 27' the Lagna of D-11 enters Kumbha. Suppose the lagna was before 50^0-27' i.e. 49 before the present point-after all about 3 minutes before the present birth time-then D-11 lagna would have been Meena and the entire chart would have been splendid. He would have become multi-millionaire. It is here that the skill of an Astrologer lies. No useful purpose would serve by the mere mathematical accurate calculation of Lagna point for a given time of Birth however accurate it be. By verification of past incidents in one's life, verify the lagna in all the D-charts and then fix up the correct lagna point. Then by reverse process calculate the Birth time. This is the correct way and the only way for rectification of Birth time I have spoken of before. By this method you will be able to fix up the Lagna point to the minute.

Incidentally this chart also proves that exaltations in 3-6-8-12 (Dustanas) is of no avail.

(28) Chart-37 : (Sri Narasimha Bharathi Swamigal)

D-9 : Rahu Dasha ruled from 15th to 33rd age. Rahu as Neecha is in 6 here. So in Rahu Dasha of proper age marriage is out of question. You should not look to other Dashas as by that time *ascetic life* is embraced. Then we must see D-5.

D-5 : At birth Moon Dasha ruled, Moon in 5 good but with Ketu submerged. Next Kuja in 6 in own bouse. The spiritual element in the Swamiji was rooted powerfully in Kuja Dasha. Rahu here is in 11 but in D-1 in his own house. In Rahu Dasha the Swamiji was

spiritually elevated further. See Guru in this chart in 9 and exalted, Guru Dasha has to be worshipped. It is pure Brahmathwam of a high order. The Swamiji's attainments during this period was of a far superior order not at all attached to earth but solely of the real and spiritual. He had even *'Sakshaathkara'*. See the vision of God direct. Shani is here in 8. You know that Shani in 8 does not kill a Native. Then what has happened here? But such an elevated Swamiji if survives in Shani Dasha the Swamiji would have been pulled down to earthly touch. To avoid it the Swamiji attained *Niryana* before coming under the sway of Shani.

(29) Chart-38 : (Sri Chandrasekhara Bharathi Swamigal)

D-9 : Shukra in 6 Neecha, Sun in 7 Neecha, Moon in 3. These three Dashas cover up 31 years. For a saint D-9 should go bad.

D-5 : Shukra in 2 - Neutral till 22nd age. Sun though in 9 is Neecha. Even Sun Dasha is not so promising for spiritual elevation. Moon, Birth Yogi is in Lagna. This Moon's Dasha was the best period for spiritual development. Next followed Kuja Dasha from 38 to 45 age. Kuja is in 5 here but exalted in D-1. So further rise in Kuja Dasha. But note that this Kuja is aspected by Avayogi Budha. Side-by-side there were inimical obstructions.

Rahu is in 6 here-quite an unhappy condition. So it was with the Swamiji finally attaining *Niryana* in Rahu Dasha Kuja Bhukti. Why? See D-8.

D-8 : Lagna is hemmed in between Rahu and Kuja. In Rahu Dasha Kuja Bhukti the Swamiji attained *Niryana.*

On the whole the Swamiji's life is not smooth.

(30) Chart-39 : (Sri Ramana Maharshi)

D-9 : This is permanently marred by Kuja, Rahu and Shani being in 12, 1 and 2 from this lagna an essential condition for a true Spiritual Sanyasi.

D-5 : Shani is here in 4 in own house. Shani Dasha ruled from 5th to 24th age. In the early part of Shani Dasha itself he left his home in quest of *'Who am I ?* As it is Shani that caused this Yoga there was the material touch in addition to high philosophy. Next followed Budha Dasha. Budha is in 9 in own house. He developed *Gnana* and surpassed the rest in matters of realisation of self. Ketu a planet helpful to attain salvation (Mukthi) is strong in 7 in own house aspected by Guru. It is now that *Brhmajnana* dawned to guru's touch. The coming Ravi Dasha would have pulled him down as Sun is Neecha. But the Maharshi attained *Niryana* before Ravi Dasha. In D-8 Shukra is in 8.

31. Chart-40 : (Sri Abhinava Vidyathirtha Swamigal)

D-60 : Swamiji is born in Devamsha. The very name is indicative of a birth more of the celestial plane than of earthy plane. Getting into the seat of Sharada Peeta is a gift of God and only those that are destined shall occupy. As per the above moment of birth, the seat was earmarked for the Swamiji. All that social talk of selection to the Peeta is a myth.

D-9 : Lord of this Lagna (Guru) is submerged in 3 and his Dasha itself operated in right age from 16th to 32nd. So the question of marriage did not arise. By that time the Ashramam is changed. One way, it may be concluded that if the lord of the lagna of a D-chart is badly placed the effect of the D-chart will be bad from

and after the Dasha of the lord of the Lagna of that D-chart.

D-10 : It is only Shani that is first powerful being in 7th (Digbala) and exalted. Swamiji's name is spread far and wide in Shani Dasha only. In fact, coronation as Jagadguru happened in Shani Dasha.

D-24 : Guru in 2 is exalted with Shukra. In Guru Dasha itself the Swamiji acquired tremendous Vedic Knowledge. Shani in 7 with Digbala is still more powerful to have mastery over all languages of the day and Shani Dasha is an affluent period for high scholarship; especially in philosophy on the material plane.

D-12 : A Swamiji should sever relationship with parents. Guru in 2 is neutral. Shani in 6. In Shani Dasha no relationship at all.

D-5 : Guru with Moon is in 5 with Gajakesari Yoga. Note: Guru is also Retrograde. In Guru Dasha itself Swamiji has attained high spiritualism. Shani is in 4 as exalted with Shukra in own house. So in Shani Dasha attainments under this head are very high. As the combination is Shani-Shukra the Swamiji has the supreme power of attracting a number of Devotees.

This chapter is exceedingly useful to students. This is author's original research work which is unique in Shodasha Varga interpretation -Ed

Chapter IV
Dasha Bhukti Classical

As I have been repeatedly emphasizing on the importance of Dasha Bhukti, I now deal with the subject as per classic principles but in a modified form to facilitate definite and candid predictions.

Dasha Bhukti is a clock to show the time of occurrence of an event existing in the horoscope. As stated before, even a poor horoscope backed up by good Dashas is worth more than a powerful horoscope with poor Dashas. I have seen some Astrologers banking their conclusions mainly on the horoscope without coupling up the Dashas and the result would be a thorough disappointment to the consultant and a rebuke to the Astrologer. We are not satisfied to know the mere existance of the static elements in a horoscope but are more eager to know its dynamic results as to when the yoga formed by the planets at birth would become operative and fruitful. Is one's thirst satisfied at merely looking at the tender cocoanuts on top of a tree? Any of us would be anxious to know how the present time is or the future day would be. To answer these questions Dasha Bhukti- in particular Udu Dasha- is the only guiding factor.

You might have seen several books, sometimes written in volumes on Dasha Bhukti, I quote for instance *Sarvartha Chintamani* in Sanskrit and *Krishna Misram* in Telugu which seem to be exhaustive on this subject; but on application you realise that you are exhausted and not the subject. To judge an issue by one definite rule is easy. When there are more than one the trouble creeps in and worse with multiple considerations. The

rules mentioned in those texts take us from the earthy plane to the ethereal and sometimes heavenly too. The innumerable factors, alternatives and sometimes seeming contradictions lead us to wilderness. One way this may be helpful to a *one rupee*-Astrologer to quote any rule to fit in the result. They are all very general in character. If they are applied to a horoscope many things may go wrong and by sheer chance one or two may fit in over which some may gloat. It is just like a punter getting overjoyed at the winning of his horse in the last Race on which he has staked his last coin after having lost hundreds before.

Such chattery sayings that all things are good, bad or mixed will not help us much. It is like periodical predictions in newspapers and magazines for all people born in a sign of the Moon or Sun. What is needed is the correct reading of all aspects of life of an individual at a particular period. This requires a thorough scrutiny of the intrinsic merits of the horoscope. At a particular period of one's life all aspects may not be simultaneously good or bad. Invariably they will be of varied nature some good, some bad and some middling.

In Chapter III-Part II, I have already discussed a novel method of evaluating the Dasha Bhukti Readings though it is unique and in a way definite. It has yet an element of uncertainty when particularisation of effects is attempted. In this method you can definitely say that a Bhukti is generally good or bad and also go a little further to attempt at particularisation. Even then only a few directly related to the planet would be particularised. What happens to other matters cannot be gauged here. Thus it is not an exhaustive method. These diverse effects cannot be read out from the superficial positions

in Rasi Chart (D-1). These differential readings are to be read out from my Division Charts only. I construe that all planets give all effects and the particular portfolio ones give their effects more strikingly perhaps. The fact that at all times we experience all effects is itself an evidence to confirm the above inference. Now you will appreciate the importance of Division Charts which not only help us to evaluate the intrinsic merit of a particular aspect but also to read the periodical effects. Let us now go to the subject proper.

Dasha Reading :

In Chapter III-Part II while discussing the merits of a Division Chart, I have fully discussed the good and bad positions and traits of planets with respect to each Division Chart. I have also said that those results will happen only during the Dasha and Bhukti of the planet. Thus if you wish to know the Dasha effect of a planet see how its lord is disposed in all the D-charts and read those effects during its Dasha. As such there is no necessity to repeat them again here only to fill up the pages.

Bhukti Reading :

Before I discuss Bhukti Reading I feel I must show you an important chart not known to many so far but which has abundant revelation and that is the *'Mathematical Navamsha Chart'* I have referred to before. Now I discuss the general theory of all the mathematical D-Charts. In the evaluation of all these charts the chief controlling guiding factor round which other things move is the Vargottamamsha, i.e., the Amsha that stays in the same Rasi as in D-1. Now I define the other principles as follows :

To find the distribution of all the Amshas of a Division in a particular Rasi or Mathematical Division Charts.

(1) First Fix up the position of the Vargottam Amsha (of that Division) in that Rasi. You know that 30 degrees divided into so many parts as that of the division gives the span of an amsha of that division.

(2) The immediate next Amsha in that Rasi (i.e., next to Vargottama Amsha) will be occupied by the Amsha given by the next bestowing sign to this sign and so on. What is a bestowing sign? All signs do not contribute their Amshas to a particular sign. In Such cases the immediate next sign of productivity must be taken overlooking non-productive sign. Such feeding signs which contribute their Amsha to a Rasi are called the *Bestowing Signs.* As there are different orders followed in the erection of Division charts the same order should be followed to locate the Amshas in the 'Mathematical Division charts. By this method you may fix up the position of a planet in degrees and minutes in each Division Chart and thus know three important positions that help the Dasha Reading. They are :

(1) The star in which a planet is situated in Rasi Chart (D-1).

(2) The star to which this planet gives its Amsha in the D-Chart and

(3) The star that comes and falls at the Amsha occupied by the planet in D-1.

These three stars and their lords play a very important role in both the shaping of the Dasha and the Bhuktis that get related to Dasha lord. These will be explained later.

As we are chiefly concerned with Udu-Dasha and of all the Division Charts the Navamsha Chart (D-9) is the only one having full padas (Quarters) of stars well knit into the twelve signs of the Zodiac. We confine ourselves at present to the mathematical Navamsha Chart and see how far it helps us. Leaving the more elaborate and complicated other mathematical charts to my friends to labour I devote my attention to mathematical Navamsha Chart only (Math. D-9).

Let us take a concrete example - the Amshas that fall in Vrishabha Rasi :

You are aware that Vrishabha Rasi has the stars Krittika 2, 3 and 4 padas, Rohini 1-2-3-4 padas and Mrigasira 1 and 2 padas in successive order (in D-1). What are the stars that fall on each of these padas is what we must know. As stated before the star that stays both in D-1 and D-9 in the same Vrishabha Rasi is Rohini -2. This is called Vargottam pada. Please note this strict definition of Vargottam pada; it is the Amsha of a Division occupying the same Rasi both in D-1 and in that Division. After locating its position in degrees and minutes i.e. Rohini 2 is from 13^0 - 20' to 19^0-40' of Vrishabha-look to the next bestowing Rasi. After Vrishabha the next sign is Mithuna. It is a bestowing Rasi as it feeds an Amsha to Vrishabha and that is Punarvasu 2. This Punarvasu 2 should be located next to the previous Vargottam pada. i.e. on Rohini 3. Similarly the Rasi next to Mithuna being Kataka as no Amsha is fed from this Rasi to Vrishabha you must ignore it as it is not a Bestowing Rasi and go to the next. i.e. Simha from where Makha 2 comes and falls on the next position, i.e. Rohini4. Likewise Hasta 2 of Kanya falls on the next Amsha. i.e. Mrigasira 1. Vishaka 2 falls on Mrigasira 2

the last part of Vrishabha. The next Amsha in this Rasi to be reckoned is Krittika 2 that starts the Rasi. So Moola 2, Sravana 2, P. Bhadra 2 and Ashwini 2 fall on Krittika 2, Krittika 3, Krittika 4 and Rohini 1 respectively. Thus you find that only the 2nd padas of stars of Ketu, Moon and Guru are situated here. If you work out fully on this basis you find the following peculiarities.

1. There are three varieties of star-padas.

(a) One set of padas that move in succession for six times before they get back to their original position-called the moving set-6 in each Rasi totalling 72 in all.

(b) One set of padas that exchange themselves and they are 2 in each Rasi totalling 24 in all.

(c) Vargottam padas - one in each Rasi totalling 12 in all.

Thus the three totalled gives 108 padas corresponding to 9 in each Rasi.

Planets in each set gives varied readings which will be explained later.

2. There is a symmetry in the formation of this chart.

(a) Mesha to Kataka contains the padas of stars of Ketu; Moon and Guru in the same order also and the 1st, 2nd, 3rd and 4th padas falling in Mesha to Kataka respectively.

(b) Similarly, Simha to Vrischika contain 1-2-3-4 parts of stars of Shani, Shukra and Kuja respectively.

(c) And finally Dhanus to Meena contain those of Rahu, Budha and Sun.

3. By working this chart you will also see the group planets being sets of friends as stated in previous chapters.

(a) Ketu-Moon-Guru.

(b) Shani-Shukra-Kuja and

(c) Rahu-Budha-Sun

belonging to a set of friendship among themselves. For diagram proper see next.

Bhukti Reading :

Before viewing a planet as Bhukti Lord (Sub Lord) find out its merits as Dasha Lord (Major Lord) and then proceed as follows : All the following rules are to be applied with reference to the respective Division Charts and the particular effect of that chart has to be read out during the Bhukti.

(A) If the major Lord is good, then :

(1) Sub Lord who is also good will add on his good effects to the major Lord if they are mutually related. Mutual relations are *(Vide Verse 30 Ch. XV of Phaladeepika).*

(a) Mutual occupation of each other's sign.

(b) Mutual aspect or conjunction.

(c) Mutual Kendra or Kona position; and in addition

(d) Being situated in any of the star padas of major Lord in mathematical Navamsha Chart or

(e) Mutual occupation of each other star in D-1.

(2) A good sub Lord not related to the major Lord remains Neutral when the good effects of the Dashanatha only will be felt.

(3) A bad sub Lord related to the good Dasha Lord modifies the Dasha Lord's effects depending on their relative strengths in that chart.

(4) A bad sub Lord not related to the good major Lord remains neutral and major Lord's good effect only will be felt with traces of evil effects of the Bhukti lord.

(B) If the major Lord is bad in a Division chart then :

(1) A good sub lord mutually related with the Dasha Lord will modify the bad effects of the major Lord depending, of course, on their relative strengths in that chart.

(2) A good sub Lord not related to Dasha Lord will give worse results.

(3) A bad sub Lord whether related or not with a bad Dasha Lord does worse.

(C) Now about one-sided relationship between the two Lords in a Division Chart :

1. A sub Lord in the house (or star in D-1) of Dasha Lord becomes the guest of the latter and thus subjects itself to the orders of the Dasha Lord whose powers alone predominate.

2. Similarly a Major Lord in the house (or star in D-1) of sub Lord becomes the latter's guest or tenant - at- will. As such it gets its trait changed by its sub Lord. If that sub lord be good no worry; but if it be bad, the major Lord, though good by himself, would be obliged to give bad results modifying its good effects. If in the above

case the major Lord is also bad, owe be to the fate of the Native; worst results happen during the period regarding the particular effect of the D-chart. If that malefic sub Lord is weaker than the Dasha Lord (good) in that chart it is something tolerable; but if he becomes stronger than the Dasha Lord, worst results happen even if the latter be good; if bad it needs no further say.

3. If only one of them aspects, the other one not reciprocating, then the character of the Aspector should be added on to that of the Aspectee and then the combined or modified reading given. If in such a circumstance the Aspector be Dasha Lord his effects alone will be felt. If on the other hand the sub Lord aspects the major Lord then the former effects get mixed up with that of the latter.

4. In the case of conjunction the effects of the more powerful planet predominates.

(D) It has been a general conception that the good effects (Yoga) of a Dasha Lord does not commence in his own Bhukti, if so, the rest of the Dasha period will go bad. Every rule has an exception. If that exception is not pointed out along with the general Rule the very Rule is likely to be refused to be followed. The exception in this case is that such Yogas will surely start in its own Bhukti if that Dasha Lord is either in his own Rasi or more candidly in his own star in D-1 or if his star - pada moves to any of his own star in the Mathematical Navamsha Chart. For example in chart 1 of 1907, Guru is in Punarvasu 2-his own star. So he got elevation in Guru Dasha-Guru Bhukti alone and the Yoga continued till the fag end of the Dasha.

(E) The relative positions of the two lords are of very great importance. Both may be independently good in the chart. But if their relative positions are 3, 6, 8 and 12 the period may not be congenial.

(F) In the mathematical D-9 chart, if a planet gives its Amsha to Dustanas from itself the result is bad, otherwise good. Such effects are felt during the Dasha of that planet and the Bhukti of the planet owning the star to which the Dasha Lord gives its Amsha. But if they are Parivarthana padas the effect felt first gets rectified later.

(G) The Dasha Lord attains the qualities of the planet owning the star whose Amsha falls in math. D-9 chart on the Radix position of the Dasha Lord. If per chance it be the star of Birth Yogi, the Dasha becomes Yogaic, if of Avayogi the reverse.

Thus the triple stars of math. D-9 chart play very important role in shaping the effects of Dasha.

ILLUSTRATION

To illustrate the Dasha Bhukti Reading as per my theory, 1 take up Chart 1 of 1907 of which I am fully conversant.

At Birth the balance of Ravi Dasha was only 13 days. So I leave off Ravi Dasha.

Moon Dasha : In D-1 it is lord of 8 in 10 but in Zero-Rasi; so mixed effects. What is good and what is bad we shall discern from D-charts. In D-10 he is in 6 but aspected by Guru. His profession and status (as he is only a child say his protectors- in this case father's status and profession) was first bad but later got slightly

better. Note the word Protector about which I have fully dealt with its real significance when I have dealt with female Horoscope in Part I. In D-11 Moon is in 2- a neutral position. His father's financial position was neither good nor bad. In D-3 Moon is in 6 aspected by Shani. His co-borns were not in happy circumstances. In D-4 he is in 10 in an ordinary position aspected by malefics Sun, Kuja and Shani. He had little ancestral good. Note in D-6 he is in 6 in debilitation. Throughout he was sickly. Being in 11 in D-24 his education was good. His body strength was weak as Moon is in 6 in D-27.

Kuja Dasha : In D-1, as lord of 5 and 12 Kuja is in 2nd Bhava with many aspects. Even here mixed effects are felt as follows. Kuja being Retrograde in 6th (an exception to Kuja), in D-10 father's profession bettered. In 8 debilitated in D-11 bad for finance, good in D-3 being in 5 aspected by Guru.

D-4 also good, D-6 (health improved) good being in 4; D-12 good. In D-24 Kuja is powerfully situated in Lagna aspected by Duplicate Yogi, Shani who is in 7 exalted with Digbala. During Kuja Dasha he always stood first in the class and was recognised as a brilliant student. Note Kuja is in Poorvashada star (Shukra). So the two are related. In D-24 Shukra is exalted with Guru in own house both being in 2nd from Moon and twelfth from Lagna forming Sunapha Yoga. He passed L.S. creditably in Kuja Dasha-Shukra Bhukti.

Rahu Dasha : Rahu is Birth Yogi. That itself gives a clue that it has some inherent good qualities. In D-1 Rahu is in 8th; so no substantial good can be read there.

In D-1 Rahu is in Guru star - so the two are related. In D-9 Rahu is in Lagna as Vargottam and Guru in 11 both from lagna and Rahu. So in Rahu Dasha Guru Bhukti he married a girl of higher family by which he was profited much. Also Rahu being in Lagna as Vargottam his wife was quite healthy throughout Rahu Dasha. Marriage at the 21st age (Guru No).

In D-10 Rahu in lagna with Neecha Budha but protected on either side by Guru and Shukra forming Shubha Karthari Yoga. These indicate some good of profession in Rahu Dasha. Please note that Rahu and Ketu give the effects of the planets in conjunction or its Aspectors and the lord of the star and sign occupied by Rahu. In this case Rahu is with Neecha Budha and its positional Rasi Lord Guru is in 12 - all indicating not one of higher order. In fact he caught a good job in Rahu - Budha, but the same terminated in the same Bhukti - the pay being Rs. 50 (Budha's number). As Guru, Budha and Shukra are in 12, 1 and 2 in this chart good effects of profession arise in the Bhuktis and Antharas of these planets in Rahu Dasha. In Rahu Dasha-Budha Bhukti , Budha Anthara he got the first Govt. job which terminated in Budha Bhukti alone as he is Neecha. Please recollect that anything starting at a badly placed planet's period will not be finally good. Again he took to independent business in Rahu - Budha - Guru which also failed as Budha is Neecha and Guru in 12. Lastly he started his real life of continuity in Rahu-Shukra-Rahu. Note this Shukra is in 2. As Shukra is Avayogi he could not give him much. Guru Antara improved his status which stagnated till the end of Rahu Dasha.

In D-11 Rahu is in 5 good. During Rahu Dasha his financial condition was good enough. Being aspected by

Guru (Karaka for elder Brother) he had the advantage of his brother's aid. In this chart Guru and Shukra are very happily posited both from lagna and mutually among themselves-all being in Trines. So the Bhuktis and Antharams of Guru and Shukra in Rahu Dasha should be good for finance. In Rahu Guru he got merit scholarship and money through his wife. In Rahu Shukra he enjoyed easy money. Kuja being Neecha in 8 caused financial stringency in Kuja Bhukti though he is in 4th from Dasha Lord as Rahu is in Kuja's house.

In D-3 Rahu being in 4 as Vargottam one of his brothers born in Shathabhisha star (Rahu star)rose up to a high order of prosperity from nothing in Rahu Dasha.

Note one special *reading* here :

Those born when the Moon or Lagna is in the star of the Birth Yogi of the other, prove helpful to the latter while those of Birth Avayogi cause distress. If per chance they are born in the actual Yoga star it is certain. In this case the actual Yoga star of the Native is Shathabhisha and his brother is born with Moon in Shathabhisha. So his brother was very helpful to the native. In Rahu-Shukra his brother got into trouble but later on saved by the native. Though Rahu is well placed here, Shukra is in 6 as Neecha and also in 3rd from Dasha lord -so the result.

In D-4 : Rahu is in 5 as Vargottam and similarly Ketu in 11. So in Rahu Ketu his father-in-law purchased a house meant to be gifted to the native which ultimately was gifted. As it is Vargottam Yoga-Rahu the property is worth today more than Rs. 30,000.

In D-6 : Rahu being in 5th with exalted Shani his health was good throughout Rahu Dasha.

In D-7 : Rahu being in 12 with Avayogi Shukra it was not a happy Dasha for issues. Some born died and others sickly etc. The survival of the others is due to the fact of Shani the lord of the sign occupied by Rahu being exalted in 9. Ketu, Shukra, Sun Bhuktis were bad.

In D-12 : Rahu in 4 Vargottam and aspected by Guru-good for parents.

In D-24 : Rahu is in 5 in ordinary position. Since he is Birth Yogi he gives good education. As the Rasi-Lord sun is in 2, there are some mishaps. See in this chart Shani is very powerfully placed but in 3rd from Dasha Lord Rahu. So with first class pass in optionals he scored a third class in languages. Again though Budha is powerfully situated in his own sign and in 11th from Dasha Lord though his performance at M.A. Examination was super first class. Due to a clash among the authorities the native was on the point of being declared failure, but on a subsequent thought was declared a third class all due to Budha being in 3rd from this lagna. This confirms that for best effects the Bhukti lord should be in auspicious positions both from Lagna and Dasha Lord. Budha being in 3rd house (death house) his education closed in Budha Bhukti.

Guru Dasha : In D-1 Guru as lord of 1 and 4 is in 7 with Sun and Budha (lords of 9, 7 and 10) aspected by Kuja (Lord of 5 and 12). Also Guru is in Zero-Rasi. So all his good Yoga is reduced. The only remedial feature is his being in Punarvasu 2 in his own star. In fact what little attainment he had was obtained in the second quarter of Guru Dasha (being in 2nd part of Punarvasu) which was the only best part of his life in Guru Dasha.

Now let us see the D-charts.

In D-9 : Guru is in 11 aspected by Shani, Sun, Kuja - all malefics. So in Guru Dasha his wife's health was not good- anaemic and blood pressure patient. Guru-Shukra was very bad. For Guru is in Shukra's house who in turn is in 12th from Dasha lord.

D-10 : Lord of Lagna (Guru) is himself a constituent of Shubhakarthari Yoga and Gajakesari Yoga aspected by Moon, Kuja and Shani (Duplicate Yogi). But note that Guru occupies only a friendly Rasi here. Due to these factors he became an independent Head of an office since the advent of Guru Dasha and enjoyed a good status quo. Due to the ordinary strength of Guru it was one of upper middle class.

As Guru is in his own star the Yoga started in his own Bhukti. Shani and Guru are in Parivartana (Rasis of mutual exchange - hence related) and also Shani is in 10th from Lagna and 11th from Dashanath, also being Duplicate Yogi. So in Guru-Shani his position bettered. Budha being here in Dasha Lord's Rasi and in D-1 in the star of Dasha Lord has become a total subject of Guru. So this Budha Bhukti was excellent since he is with Yogi Rahu.

Guru and Shukra forming Shubhakarthari Yoga their Dashas and Bhuktis are good. So Guru-Shukra was very good for profession.

Guru-Ravi is not satisfactory as Sun is in 6th from Dasha Lord. An enemy started campaigning against the Native in matters of profession and caused a lot of distress.

Guru-Moon is a special period to be read out here. Moon being 6th from lagna though in 7th from Dasha Lord forming Gajakesari hurt his profession a bit. In D-1 you do not see the relationship between the two but look to the Mathematical Navamsha Chart. Punarvasu 2 gives its Amsha to Rohini 3 which again falls back on Punarvasu 2. Thus the two are exchanging padas. Guru who is in Punarvasu 2 gives its amsha to Rohini 3 situated in 12th Rasi from Guru and also in the star of Moon (lord of 8 in 10). So the two are related to do bad to profession. In fact in Guru-Moon his prospects were hampered which was later on got rectified due to Parivarthana effect. If there was no exchange of Amshas there would have been a permanent setback. That is how Parivarthana to be read out. I have already dealt with this aspect of the Math. D-9 chart in this chapter.

Kuja in 6 being good, Guru-Kuja was good.

Rahu being Yogi on one side and with Neecha Budha on the other side. Guru-Rahu was both Yogaic and disruptive too.

In D-11 : Lagna is Vargottam and its Lord Guru (Dasha lord) aspects lagna being in 9th. Hence Guru Dasha *in toto* was excellent for finance. Shani being in 8th from Dasha lord Guru-Shani should have been bad. But that Shani is controlled by Guru (Dasha lord) as he is in the latter's house. So Shani Bhukti was good enough. See Budha powerful in 7th from lagna and 11th from Dasha Lord. In D-1 Budha is in Guru star so they are related. Guru-Budha was excellent. Ketu and Shukra Bhuktis were equally good as they are in trines from Lagna and also in mutual positions. Guru-Ravi is bad being in 8 from Dasha Lord though in 4 from Lagna caused heavy marriage expenses in the family.

Guru-Moon is bad by the 6th position from Guru. For reason of the trinal position and being also Yogi Guru-Rahu was good.

In D-4 : Guru (own house), Shani (Vargottam) and Budha (Neecha with Bhanga by reason of Guru being there with Digbala too) are in Lagna. Of these Guru and Shani are very powerful. So in Guru Dasha he made some Assets. In Guru-Shani he had a property as well as savings. So also in Budha and Ketu. As Shukra (Avayogi) is in 6th from Guru he spent away a lot in Guru-Shukra on wife and pleasures and marriages at home. Sun, Moon and Kuja Bbuktis were as usual. When Rahu Bhukti came he improved his property as Rahu (Birth Yogi) is here in 5 both from Lagna and Dasha Lord and also is Vargottam. Moreover in D-1 Rahu is in Guru star and thus the two are related. I trace the relationship between the Dasha Lord and Bhukti Lord either in D-1, Math. D-9 or in the particular Chart as without such relationship no results happen.

In D-6 : Guru being in 3 was not conducive to his health, but nothing serious happened as the Lord of that Rasi (Sun) is in 11 exalted.

In D-7 : Guru is well placed. Children prospered then.

In D-12 : Guru in 12 killed the parents in Shukra Bhukti (Sbukra Neecha and in 6th). As Guru is here in his own house in 12 with Budha in 2; Guru killed in latter portion being in 12.

In D-27 : Though his health was not good as revealed in D-6 he was strong enough in body and mind as here Guru is in 7 exalted. He had a good pbysical strength specially connotative of sex virility as Guru is here in 7th and also in D-1.

Thus I have explained all intricacies of the subject by way of illustration of a known life. I hereinafter quote some special instances that have happened in the case of the Charts appended to this text. Refer pages (160-179).

Chart-18 : (Sir Mirza) In D-1 Rahu is with Shukra and in latter's house. Also being in Swati-1 gives amsha to P-Shada 3 (Shukra star)i.e., to 3rd house (death house from itself and 6th from Lagna. So he died in Rahu - Shukra as in D-8 Shukra is in 10 (Karma Sthana) and Rahu in 8 (death) and further Shukra is in 3rd (death) house from Rahu (Dasha Lord).

Chart-13 : (H.S.V.) In D-1 his Shani is in Shatabhisha 4 which goes to Revathi 3 which again gets back by Parivarthana to Shatabhisha 4. Thus Shani Lord of 4 gives Amsha to 2 from himself and 5th from lagna. So Shani and Budha are related. In D-4 Shani in 10 and Budha in Lagna with Digbala aspected by Birth Yogi Sun. Shani is Retrograde and in own house in D-1. He is also Duplicate Yogi. So he built a big house in Shani Dasha at a cost of Rs. 50,000 (Budha's number).

Chart-10 : In D-9 Rahu is in 5th both from lagna and Dasha Lord Shukra and also in major Lord's house. Shukra (Dasha Lord) is powerfully situated in Lagna as Vargottam, Lagna also being Vargottam all superior qualifications for D-9 chart. He married a higher class girl in Shukra Dasha - Rahu Bhukti.

In D-1 : Rahu is in U-Bhadra 3 going to Swati 3 (Rahu Star) which is in 8th Rasi from Rahu. In D-8 Rahu is in 8th from Lagna. So in Rahu Dasha - Rahu Bhukti he died; so his profession also terminated on the same day as Rahu is in 12 in D-10.

Chart-11 : In D-1 Rahu is in Pubba (Shukra's Star). She was married in Rahu-Shukra. In D-9 Shukra is in 10th exalted with Birth Yogi, Sun with Digbala and Guru in own house. Rahu is in 5th in Shukra's house. Though Bhukti Lord is in 6th from Dashanath the marriage has happened then with one who got up to high status in life. How then being in 6th this good has happened ! The reason is simple. Dasha Lord Rahu being in Bhukti Lord's house and the latter being more powerful the effect of Bhukti Lord predominated. But still is there not the effect of this 6th position in her life time? Yes, the couple used to be often on misunderstandings for petty reasons and worse even at the distant age of 50.

Chart-5 : (P.M.B) In D-1 Sun is in Aslesha 3 which gives Amsha to P.Bhadra 3. Thus it gives Amsha to 8th Rasi from itself. So there is something bad in Sun Dasha and that to life itself as he is lord of Lagna. As per our theory it should have happened in Guru Bhukti (Lord of P.Bhadra). He died in Sun-Moon and not in Sun-Guru as it should have been. Why? This Guru is with Moon who took the role as his Bhukti came first. Also in D-8, Sun is Neecha and Moon in 8th from this lagna and he is Lord of this lagna. So he died in Moon Bhukti. Another reason for Sun Dasha going bad is that as per Math. D-9 chart Ashwini 4 (Ketu Star) falls on the radix position of Sun (Aslesha 3). As Ketu is Birth Avayogi, Sun assumes the malefic character of Ketu during his Dasha.

Chart-23 : (Sri Kasturi Srinivasan) This is akin to Chart-5 above in matters of Death. He also died in Ravi Dasha. In D-1 Sun in Aslesha 3 as above giving Amsha to 8th and assuming the trait of Ketu who is Birth Avayogi even here. Here the test is fulfilled he having died in Sun-Ketu as Ketu star falls on its Radix position. In D-8

Sun in 12 and Ketu in 8 from lagna though their mutual position was good (9th from Dasha Sun) their bad positions from lagna predominated.

Chart-8 : (KGV) In D-1 Shukra is in Ketu star (Ashwini), so the two are related. In D-12 Shukra in lagna and Ketu and Moon in 8. In Shukra Dasha-Ketu Bhukti-Moon Anthara he lost his father. Note here Moon is with Ketu-indicating widowhood to mother. In the same D-14 Rahu and Shani are in 2 (maraka house). His mother died in Rahu-Shani. Why mother? Shani is Lord of 4 in D-1. See his D-10. Rahu as Birth Yogi is in 10 with Shani own house. Shani is also a duplicate Yogi. So Rahu Dasha-Shani Bhukti was his best professional period.

Chart-38 : (Sri Chandrasekhara Bharathi) In D-1 Rahu is in 7 (maraka house) in Kuja's house aspected by powerful Kuja. So the two are related. In D-8 they are on either side of lagna forming Papa Karthari Yoga. So the Swamiji attained Niryana in Rahu Dasha-Kuja Bhukti.

Chart-17 : (Sri Jayachamaraja Wadeyar) In D-12 Budha is in 8. Though he is in his own house being Birth Avayogi killed his father in Budha Dasha. In D-1 Budha and Sun are together-hence related. In D-11, Budha in Lagna with Digbala and own house strength while Sun is exalted in 11th both from Lagna and Dasha Lord. So his accession to throne happened in Budha Dasha-Ravi Bhukti.

Chart-2 : (RKM) In D-1 Moon being in Krittika 1 gives Amsha to Moola 3. Thus it jumps to 9th house which is also the 7th from lagna. Thus Moon and Ketu (Moola Lord) are related. In her D-9, Moon is in 7 and Ketu in Lagna with Budha in own house. So her marriage happened in Moon Dasha-Ketu Bhukti. Note

here that Ketu absorbed the good of Budha and gave himself the effect as Budha with Ketu lost his power.

I could cite plenty of instances I have personally dealt with. But fearing the bulkiness of this volume I have confined for the present to the above few instances which I hope are enough to impress about my theory. Let me proceed to the next subject of planetary state (Graha Samayam) or Disposition.

In addition to the intrinsic effects of planets the above outward general characterisation arising from their Samayams may also be added on and the results given out during their Udu Dasha periods. For Samayams or state of planets see Part I.

For example in chart-I when he was running Guru Dasha he would at any moment, day or night go to sleep in spite of being criticised by all as Guru is in Athinidra Samayam (No. 26). When he caught Shani Dasha he left off that habit.

I will also show the mode of working here for Guru; From Mesha to Lagna (Dhanus) there are 9 Rasis. From Lagna to the Rasi occupied by Guru (Mithuna) there are 7 Rasis. Adding the two we get 9 + 7 =16. Doubling this we get 32. Multiplying this by 16 (Dasha year of Guru) we get 32 x 16 = 512. Dividing this by 27 (The total no. of Samayams) the remainder is 26. From the order of Samayams the 26th is Athinidra; hence the effect during Guru Dasha only.

Concept of Virgottam Padas, Parivarthana Padas of Shatchalana are clearly explained. -Ed.

Chapter V
Gochara (Transit of Planet)

Inherent qualities of a planet are to be read out from its static position as at birth time while its deliverance of goods has to be estimated from its dynamic condition such as Dasha Bhukti and Gochara. Rice or wheat as it is, is not useful unless it is properly cooked. Likewise a Yoga visible in Radix chart may not fructify in his life time unless its Dasha intervenes and a favourable transit of that Lord occurs. Thus you see that the Radix position, the Dasha and Gochara are all mutually linked together. It is only when all these three factors are reckoned you will be able to fix up the timing of an event correctly.

The Dasha has a wide span of years to time an event. Even considering Bhukti the range is still wide enough- a couple of years. For reasons explained in Part I on the rectification of Birth Dasha there may be difference in the balance of Dasha at birth which really upsets all timings. Gochara will therefore remove these ambiguities and thus gives a finishing touch to the timing of events.

It is a pity that this subject is handled in all manners setting aside the genuine method. It has been the habit of Astrologers to consider the position of all the 9 planets (Uranus and Neptune also being added by some) from radix Moon or Sun and then give the Gochara effect. On the face of it, it is a great fallacy for two obvious reasons. Firstly, see the very wide range of persons born with Moon or Sun in a Rasi. So you have no consideration for the moment of Birth (Lagna) and the other planetary situations. Secondly, amidst the push

and pull of the forces of planets in different directions what can an Astrologer conclude ? Is that Astrology or Dupology? He can only guess and give out his mind and not prediction. This age old practice (like other practices and blind conceptions I point out later) of reckoning the transit from Moon or Sun is exhibited in all News Papers and Magazines. In fact it has become an attractive feature of the day tempting the purchasers for this bit of information. It should be taken for what it is worth for obvious reasons. The genuine method of daily and even hourly prediction is elsewhere which you will know from me later (vide Chapter VIII-Part II). Experience warns you not to be misled by such fallacious predictions. The reckoning from Radix Moon is nothing but $\frac{1}{8}$ part of Astakavarga in this way. In the Bhinnastaka Varga of all planets find their favourable positions from Moon. That gives their favourable Gochara positions. How? In the Astakavarga of Sun the planet's favourable positions from Moon are : 3, 6, 10 and 11. Hence in Gochara when Sun transits these positions from Moon it is said to be favourable. Next in Moon Astakavarga its favourable positions from itself are 1,3,6,7 and 11. So Moon's transit here is good.

In Kuja Varga, it is auspicious from Moon in 3,6 and 11.

Likewise, Budha in his Varga 2, 4, 6, 8, 10 and 11.

Guru in his Varga in 2, 5, 7, 9 and 11.

Shukra in his Varga in 1, 2, 3, 4, 5, 8, 9, 11 and 12.

Shani in his Varga 3, 6 and 11

Tabulating the above we have the following favourable Gochara positions :

Sun	....	....	3, 6, 10 11
Moon	....	....	1, 3, 6, 7, 10, 11
Kuja and Shani	....	....	3, 6, 11
Budha	....	....	2, 4, 6, 8, 10, 11
Guru	....	....	2, 5, 7, 9, 11
Shukra	....	....	1, 2, 3, 4, 5, 8, 9, 11, 12

If then it was so easy to assess the transit effect from Moon's Radix position. Astrology could have been simplified and written in a line or two. In my experience I have found that except *Sade-Sat* ($7\frac{1}{2}$ yrs.) Shani other predictions reckoned from Moon do not tally. Even in the case of *Sade-Sat* Shani there are exceptions as some other conditions are to be satisfied which will be explained later.

My mode of handling Gochara is unique but classical with novel touch. I take Lagna as basis instead of Sun or Moon and it is supported in Slokas 34 to 38, Chapter XX of *Phala Deepika* and apply it chiefly to Dasha Lord. So in all my future discussions by planet I mean Dasha Lord unless specifically stated otherwise. I now delineate the method.

01. First judge the inherent trait of the planet at birth. It is this static character that is of primary importance. For a planet of bad trait at birth cannot give good effects even transitting favourable positions. Similarly one good at birth may not give out its good effects while transitting bad position but never does harm even in such b a d positions. Thus you see that its birth qualities play the vital role. Ignoring this fundamental truth astrologers assure the distressed consultant with false hopes by mere Gochara.

02. See the Bhava transitted by the planet. Care must be taken to differentiate Bhava from Rasi. By Bhava is meant the range from its commencement to end. Sometimes even 2 or 3 Bhava-Ranges may fall in a Rasi. When the planet transits such a Rasi see in what Bhava it is transitting. For example : in the case of a birth at 30^0 of Dhanus with its tenth cusp at 9^0 Thula let as consider a planet transitting Vrishabha and Mithuna signs. If you blindly treat them as 6th and 7th Bhavas you go wrong. In Vrishabha 5th Bhava terminates at $19\frac{1}{2}^0$ and the 6th Bhava ranges from $19\frac{1}{2}^0$ of Vrishabha to $16\frac{1}{2}^0$ of Mithuna with its cusp(central point) at 3^0 of Mithuna.

Thus you note that a planet moving from 0^0 to $19\frac{1}{2}^0$ of Vrishabha will be in 5th Bhava and not 6th, while when moving from 0^0 to $16\frac{1}{2}^0$ of Mithuna. It does so in the 6th Bhava and not the 7th as it appears to be in Rasi chart. As in the dissection of Bhava Phalams the Bhava Chart is important; even for Gochara it holds good.

(a) A planet good at birth transitting good Bhavas gives good effects of the Bhavas it owns at birth and the Bhava it transits or aspects in transit.

Note : (1) By ownership of Bhavas is meant both the Sthoola and Sookshma Bhavas explained in Part I.

(2) A planet approaching the cuspal degree of a Bhava gives formative and developing effects while one receding away from the cuspal point gives fading and diminishing effect. But at exact cuspal point it gives the maximum effect of that Bhava. This has to be read out both at birth and transit time.

(b) When the planet of trait (a) transits bad Bhavas (Dustanas) they may not show off any of their good qualities but try to remain neutral.

03. Note the Nature of the Rasi it transits.

(a) A planet good at birth transitting its own; exaltation or friendly sign gives good while in Debilitation and enemy's sign he may remain neutral.

(b) A planet bad at birth transitting debilitation, enemy's house and Zero Rasis may turn out to be neutral (but never good) while in other signs may prove bad.

04. Note the star it transits:

(a) A good planet transitting the star of a good (functional) planet, of Birth Yogi, of Dasha Yogi and of Dasha Raja Yogi gives good while in the contrary gives bad.

(b) As per Mathematical Navamsha Chart see if the planet transits any of the three stars or their trikona stars: Viz., (1) One in which the planet is situated, (2) One to which it gives Amsha and (3) One which falls at radix position. These are sensitive points where the transitting planet gives out its effects corresponding to the nature of the lords of these stars. If perchance they belong to any of the Yogi group-good results, if Avayogi-bad results.

05. If it gets combust, retrograde, fast movement (Athichara), slow movement (Manda) or stagnant (Sthambana) its effects are :

(a) A combust planet becomes totally ineffective for the moment if he be good at birth and gives out worst effect if bad at birth.

(b) Retrograde planet becomes very powerful for the moment whether for good or bad depending on its birth trait.

(c) Fast moving planet likely to give very dangerous effect.

(d) Slow moving one is slow in action and

(e) Stagnant one is neutral in effect.

06. See if they pass Zero Rasis :

(a) All positive planets at birth transitting Non Zero Rasis give good while in Zero-Rasis they get submerged unless Retrograde.

(b) All negative planets and Avayogi give good while transitting Zero-Rasis unless Retrograde.

(c) Rahu and Ketu transitting Zero-Rasis give good.

07. Judge from other planets that joins or aspect the planet in question.

If during transit a planet join or is aspected by a friendly and benefic planet results are happy, otherwise bad.

08. Like the Dasha Lord treat the Birth Yogi also, but this is subsidiary to Major Lord transit.

09. A planet transitting exact cuspal points of Bhava gives out its timely effects. Of these the 10th cusp is of utmost importance, next comes Lagna, next the fourth and lastly the seventh - The other cusps may not be much effective for transit.

10. Lastly, if you so desire consider the Gochara of Bhukti Lord also.

11. Thithi, Weekday, Star and Yoga and Lagna at the time of events :

Any event should happen in the Thithi, Weekday, Star, Yoga or Lagna of the Dasha Lord or Bhukti Lord and sometimes by Anthara Lord according to the powers of the three.

Find the ruler of the Dasha Lord. On the day when the Yoga planet synchronises with this Ruler good effects happen and also when the Dasha Lord passes through this Ruler's star, good will happen. When any two or more of the above elements are satisfied by a planet then that day is certain.

12. So far we have dealt with the transit of Dasha Lords. If they are quick-moving planets like Sun, Budha and Shukra difficulty may be felt to fix up the time of event as in the course of their Dasha periods they will have circled the zodiac several times. Likewise, if they are slow moving planets like Guru, Shani, Rahu and Ketu the span in a sign or star will be wide enough. To solve this riddle I take the progression of Moon as per western system of Secondary Directions as via media. This progressed Moon gives the effect of the Bhava and the star it transits in the same way as said of the Dasha Lord. When she touches Yogi Star, Yoga is formed vice-versa. In most of the cases progressed, Moon treated this way has given me satisfaction.

13. I have researched on the theory of Western progression both primary and secondary. That which has impressed me I give below leaving the rest to yourselves. The only candid rule is about meridian progression to planets and planetary progression to meridian. Even here you do not get the exact time. You may have to allow a year's interval.

14. Those who wish to have Annual Readings may look to Solar Birth Day maps narrated later.

15. For Daily and Hourly guide I will narrate a very successful method in the ensuing chapter.

For Gochara the above-stated theory gives authentic results. I have also gone through the other theories which though appear sometimes true and fail at other times. They are cited below for academic interest.

(a) Instead of reckoning from Moon-Sign readings are based on Tharabala. Please refer to *Jyothis Payonidhi* for details, if you are interested. At any rate I am not interested, so leave it here.

(b) Another system that is followed by some is based on the nature of the foot (pada) of the planet when it steps into a sign. There are four padas :

1. Suvarna Pada (Golden Foot)

2. Rajatha Pada (Silver Foot)

3. Thambra Pada (Copper Foot)

4. Loha Pada (other metallic foot chiefly Iron)

These Astrologers construe that all planets stepping into a sign with (1) and (2) padas give *good* results while the planet stays in that sign, with 3 *mixed* and with 4 *bad*. But my Guru treats it slightly differently. Natural Benefics give results as above but natural malefics give contrary results i.e. with 4 *good*; 3 *neutral*, 1 and 2 *bad*. This seems to be logical and fact by research.

How to determine the Padas ?

Count from Birth Moon-Sign to Gochara Moon-Sign at the time of the planet stepping into a sign. If it be :

01-06-11 it becomes Golden Foot

02-05-09 it becomes Silver Foot

03-07-10 it becomes Copper Foot

04-08-12 it becomes Metallic (Iron) Foot

For example in Chart 1, Shani entered Makara on 07-10-1961 at 26-36 hrs. At that time Gochara Moon is in Simha, Birth Moon Sign is Kanya. So Kanya to Simha is 12. So Shani enters Makara with Iron Foot which is good and since then it has been really good to him being bad till then. I have elected Shani here as he had Shani Dasha. So even here only the Dasha lord may be taken coupled with the Bhukti Lord also.

So far the principles of transit are discussed. Now I cite a few illustrations: Chart 1 of 1907

Let us see his Rahu Dasha.

Birth Yogi = Rahu (Shathabhisha)

Dasha Yogi = Shukra (Pubba)

Raja Yogi = Shani

Rahu Starter = Kuja (Mrigasira)

Rahu Ruler = Rahu (Aridra)

On 13-7-1927 he was married when Rahu (Dasha Lord) transitted Mrigasira being its starter in seventh Bhava. Note the day's Yoga was Aridra Rahu, the exact Ruler of the Dasha Lord. Again when Rahu touched Aridra (his own or Ruler star) he passed creditably. Note Rahu in Zero-Rasi (Mithuna) is good. Progressed Moon was then at 12^0 of Mithuna, the exact cusp of the seventh Bhava.

Progressed Guru was at Radix Budha.

Progressed Sun was at Radix Guru.

All happy for Bhavas 1, 4, 5, 7, 9 and 10.

Again when progressed Moon was at 14^0 of Thula (near the 11th cusp) in Swathi star (Rahu star) he started his profession.

Now you follow how to read a mixed effect. At this time say in April 1937, Dasha Lord Rahu was in Jyesta (Budha star) but in 12th Bhava. So he had a fall in his previous calling being in 12th Bhava but that being his exalted sign as well the star of Budha (Lord of 10) he was fixed as a permanent employee.

Then see his Guru Dasha :

Birth Yogi=Rahu (Shathabhisha)

Dasha Yogi = Ketu (Makha)

Raja Yogi = Moon

Guru Starter and Ruler = Moon

Guru in Punarvasu 2 gives Amsha to Rohini 3 (Parivarthana padas).

At the advent of this Dasha though Guru was in

Aridra (Yoga planet's star) he did not give any good to him though some promises were made to him. You know why it happened so. Mithuna is a Zero-Rasi and transit there, has neutralised the good effects of Guru.

When Guru touched Makha in 9th Bhava and Makha being the exact star of Dasha Yogi he got promotion. In January 1944 when he was retrograde in Makha he got a substantial lift in life. Again when Guru touched Makha in direct motion his active and real prosperity started.

Progression : We may also corroborate the above readings from progression also. The above Yogas happened when progressed Moon was at Sravana (Moon star-Raja Yogi) in Dhana Bhava giving financial felicity and again when in Shathabhisha exact Birth Yoga star. The rest of Guru's transit in Kanya is not significant as it is Zero-Rasi except when he retrogrades on 13-1-1945 when he gave better results. Remember that retrogression even in Zero-Rasi is good. During this period Birth Yogi Rahu was in 7th Bhava in Zero-Rasi good for Rahu.

In May-June 1947 Guru was in Vishaka his own star, in 11th Bhava when he got special good opportunity by itself. Then progressed Moon was in conjunction with Radix Shani (Lord of 2 in 4). He was both happy and financially better. The western theory discredits the conjunction and opposition of Moon and Shani. But that is not always true. Functional traits play more prominence for Yogas than natural traits which may act on other superficial and bodily matters. Note here Shani is a Duplicate Yogi also and conjunction with him is good.

On 14-2-1948 Guru entered Moola in Lagna and his own house. Moola is the Star of Dasha Yogi Ketu. Progressed Moon was at 4th cusp and progressed meridian trine to Radix Budha (Lord of 10). He was confirmed in a higher post.

In May 1956 Guru was again in Makha (Dasha Yoga star). He had a change for better. Immediately Guru touched Pubba (exact Birth Avayoga Star) he suffered. When Guru was in Swathi (Rahu star) he had double effect mostly bad in Rahu Bhukti. For there is a particular nature with Guru Dasha as a whole. Rahu is born Birth Yogi and Dasha Avayogi. So during the entire Guru Dasha he had mixed feelings.

Thus I have illustrated one chart in detail. I quote important events of some horoscopes.

(a) Chart 35 (Rahu and Shani Dasha)

Birth Yogi -=Sun

When Dasha Lord Rahu transitted Krittika 4 (Birth Yoga star) in 4th Bhava on 9-11-1928 he got into Government service.

In Shani Dasha when he was transitting meridian and his own star (Anuradha) he gave him Gazetted Rank on 22-11-1957.

(b) Chart-16 : Sri Krishnaraja Wadeyar (Rahu Dasha)

Birth Yogi = Guru (Purvabhadra 2)

Dasha Yogi = Budha (Jyesta 2)

Raja Yogi = Guru

At his coronation time Dasha Lord Rahu was at Vishaka star of both Birth and Raja Yogis.

In his Shani Dasha Ketu was his Ruler. So when Shani transitted Ketu star Ashwini, he died.

(c) Chart-10 : (Rahu Dasha)

Birth Yogi - Guru (Punarvasu)

Birth Avayogi - Sun (Uttarashada)

At birth Rahu is in U-Bhadra 3 on which Uttara 4 sits (Star of Birth Avayogi and Lord of 3). He died when Rahu transitted Uttarashada 3 in 8th Bhava.

(d) Chart-11 : (Rahu Dasha)

Birth Yogi = Sun (Uttarashada)

Her marriage took place in June 1916 when her Dasha Lord Rahu transitted Uttarashada 3 exact Birth Yoga Star in Kutumba Bhava.

(e) Chart-14 : (Ravi Dasha)

Birth Yogi = Shani (Pushyami)

He got a good job on 29-11-1951 when Dasha Lord Sun was at Anuradha in 7th Bhava - the star of Birth Yogi.

(f) Chart - 18 : (Sir Mirza)

He died in Rahu Dasha when Rahu touched exact cusp of 3rd Bhava (House of Death).

(g) Chart - 5 : (Ravi Dasha)

Birth Avayogi = Ketu

He died in Sun Dasha when Sun was in Moola (Birth Avayogi star) on Sunday (week day of Dasha Lord) in Sravana star (Star of Bhukti Lord Moon).

(h) Chart - 23 : Sri Kasturi Srinivasan

Ravi Dasha

He died on Sunday in Ravi Dasha when Sun was in 8th Bhava.

(i) Chart - 2 :

Moon Dasha

Moon in Krittika-1 giving Amsha to Moola 3. So her marriage happened in Moon Dasha-Ketu Bhukti when Dasha Lord Moon was exactly at Moola 3 in 7th Bhava.

(j) Chart - 1 :

Guru Dasha

Guru in Punarvasu 2 giving Amsha to Rohini 3. They are Parivarthana Padas. When Guru was in Rohini 2 and Guru Dasha - Moon Bhukti was running he had a setback in profession as that Moon as Lord of 8 is in 10.

I hope that the above illustrations suffice to bring forth the merit of my method of Gochara.

Author has stressed in Sukshma Gochara which is noteworthy and also the position of planets at birth and position in transit have to be compared which the author has done. -Ed.

Chapter VI
Varshapravesh (Solar Birthday Map)
THE ANNUAL READINGS

In the previous chapter, I have dealt with Bhava Phalam, Dasha Bhukti Phalam and Gochara Phalam (Phalam means Readings). From Bhava Phalam you get the general sum-total effects in one's life which may not sometimes fructify in his life period for want of proper Dasha. The Dasha Phalam gives the total effects spread over a wide span of Dasha years. The Bhukti also ranges for sufficiently long span and confines only to particular affairs of life. Gochara only helps in fixing the time of events indicated by Dasha and Bhukti. Even in Gochara the range is either too short or too long. If any one wishes to know the detailed effects during any short period the only better source is Varshaphal or Solar Birthday map or the Annual Chart. In Northern India many Astrologers follow this method only. This theory is elaborately dealt with in *Tajaka Shastra.* The authoritative text book on this subject is *Tajaka Neelakanti* by *Neelakanta Daivagna.*

The author has in various chapters dealt with

(1) Characteristics of Planets, Rasis and Bhavas.

(2) Panchavargi Balam (five fold strength of planets)

(3) Varsha Pravesha (Annual Birthday Map)

(4) Determination of Varshapa (Lord of the year)

(5) Bhava Phalams.

(6) Dasha and Bhukti Readings.

(7) Sahamams and their effects.

(8) Shodasha Yogams(16 Yogas)

Instead of repeating the text, I will cull out only tangible truths that have stood the test leaving out the rest. Even here I add some note-worthy facts established by research.

1. In the Chapter on characteristics of planets and Rasis the author has said some additional traits that are not found in other books especially of Rasis. Personally I do not attach much importance to these additional informations as those said by *Varahamihira* and *Parashara* are enough for horoscopy. For details please refer to Part I. So I dispense with this chapter in toto.

2. Panchavargi Balam (Five fold strength) : This is a very easy method of assessing the strength of a planet when compared with the Shadbala of Varahamihira or Sripathi. Be it known that the planetary strengths worked under the two systems will not be alike. So, when you deal with Tajak system you have to adopt this method while working under other systems you must follow its appropriate one. You should not blend one with the other merely because a system is easy to handle. As in Tajaka the chief aim is to find out Varshapa (lord of the year). This system will do here.

Panchavargi Balam

The five fold strength of a planet is evolved out of its situation in (1) Rasi (2) Hadda (3) ThriRasi and (4) Navamsha or otherwise called *Musallaha*. These four strengths couped with (5) its Ucchabala (exaltation strength) constitute the Panchvargi strength of the planet.

The strength is measured in Rupas and the total maximum strength is only twenty Rupas called Vimshopaka Balam. Tables of Hadda and Thrirasi are given below with the other necessary ones. Though Drekkana and Thrirasi are of the same category yet the mode of working is here different. There is a separate Table of Thrirasi to find out the year lord. Though *Thrirasi* and *Trirasi* sound the same, one is used to find out the strength while the other to find the year lord. This subtle difference must be properly understood. Now I give the Tables reffered to above.

Exaltation Degrees of Planets

Sun	Moon	Kuja	Budha	Guru	Shukra	Shani
10	3	28	15	5	27	20

Harsha Balam : Harsha Balam is composed of four varieties : (1) Sthana Bala, (2) Swochadi Balam, (3) Diva Ratri Balam and (4) Pum-stree Balam.

(1) Sthana Balam (Positional Strength): The positional strengths of planets from Lagna are :

Sun	Moon	Kuja	Budha	Guru	Shukra	Shani
9	3	6	1	11	5	12

(2) Swochadi Balam : (Strength in own or exaltation house)-A planet in own house of exaltation has Harsha Balam.

(3) Diva Ratri Balam : Male planets have Harsha Bala when the Solar Birthday falls in Day time and

Female planets during nights.

(4) Sex Strength : Female planets situated in the first three signs from Solar Birthday Lagna and also from 7th to 9th have Harsha Bala, while Male Planets in 4th to 6th and 10th to 12th from Lagna have Harsha Bala i.e. Triplets of signs from Lagna give Harsha Bala to Female and Male planets alternatively in succession.

Note : In Tajaka Sun, Kuja and Guru are Male and the rest are Females. There are no neutrals here.

Table of Panchavargi Bala

(Table - 6)

(Five-fold Strength)

Nature of Signs

Vargas		Own	Friends	Neutral	Enemies
	Rasi	30	$22\frac{1}{2}$	15	$7\frac{1}{2}$
	Hadda	15	$11\frac{1}{4}$	$7\frac{1}{2}$	$3\frac{3}{4}$
	Thrirasi	10	$7\frac{1}{2}$	5	$2\frac{1}{2}$
	Navamsha	5	$3\frac{3}{4}$	$2\frac{1}{2}$	$1\frac{1}{4}$

The cage figures are strength in Rupas.

How to use these Charts?

Chart-1 : Hadda: Here notations as explained in Chapter I Pt. I for planets are RV., Ch., KJ., BD., GR., SK., SN. for Sun on in order. Suppose you want to find

1. Hadda Chart

Rasis from Mesha numbered from 1 to 12

Hadda Lords with Ranges in Degrees

1	2	3	4	5	6	7	8	9	10	11	12
GR-6	SK-8	BD-6	KJ-7	GR-6	BD-7	SN-6	KJ-7	GR-12	BD-7	SK-7	SK-12
SK-6	BD-6	SK-6	SK-6	SK-5	SK-10	BD-8	SK-4	SK-5	GR-7	BD-6	GR-4
BD-8	GR-8	GR-5	BD-6	SN-7	GR-4	GR-7	BD-8	BD-4	SK-8	GR-7	BD-3
KJ-5	SN-5	KJ-7	GR-7	BD-6	KJ-7	SK-7	GR-5	KJ-5	SN-4	KJ-5	KJ-9
SN-5	KJ-3	SN-6	SN-4	KJ-6	SN-2	KJ-2	SN-6	SN-4	KJ-4	SN-5	SN-2

Note : Sun, Moon, Rahu and Ketu have no Hadda Lordship

2. Thrirasi Chart

Rasis from Mesha numbered from 1 to12

Lords of Divisons

1	2	3	4	5	6	7	8	9	10	11	12
KJ	BD	GR	SK	SN	RV	CH	KJ	BD	GR	SK	SN
RV	CH	KJ	BD	GR	SK	SN	RV	CH	KJ	BD	GR
SK	SN	RV	CH	KJ	BD	GR	SK	SN	RV	CH	KJ

Note : Starting with Kuja it runs in continuous weekday order till the end.

3. Thrirasi Chart (To determine Year Lord)

Rasis from Mesha to Meena

	1	2	3	4	5	6	7	8	9	10	11	12
Day	RV	SK	SN	SK	GR	CH	BD	KJ	SN	KJ	GR	CH
Night	GR	CH	BD	KJ	RV	SK	SN	KJ	SN	KJ	GR	CH

the Hadda lord of a planet at 15° of Vrischika (8th Rasi from Mesha). Under Col. 8 the first 7° of Vrischika are ruled by Kuja, from 8 to 11 by Shukra and from 12 to 19 by Budha. So the 15° of Vrischika is ruled by Budha who becomes the Hadda Lord.

Chart-2 : To find the Thrirasi of the above planet under Col. 8 the first 10° are ruled by Kuja and the next from 10 to 20 by Sun. So, 15th degree of Vrischika is ruled by Sun as Thrirasipa. In this chart there are three equal divisions for each of 10° span.

Chart-3 : (Thrirasi) This is meant to determine the lord of the Year. This chart is self-explanatory. For signs happening to be Birthday Lagnas during Day and Night times find out from the particular square. For example if the Solar year Birth falls in Vrischika Lagna and during night time look to the square between Col. 8 and Row 2 (Night). You get Kuja as Thrirasipa one of the *Panchadhikaris.*

The other charts are self-explanatory.

Evaluation of Five-fold Strength

In Table 6 the strengths of planets in Rasi, Hadda, Thrirasi and Navamsha are given according as they are in Own house, Friend's house, Neutral's house and Enemy's house. So we must know who are friends etc. In Tajak friendship etc. of planets are judged by a different canon. It is more or less the same as treated in Western Astrology. Planets that are in : 3, 5, 9 and 11 from another are friends. Among them those in 3 and 11 are secret friends while in 5 and 9 are open friends.

1, 4, 7 and 10 are enemies. Among them those in 1 and 7 are open enemies while in 4 and 10 secret enemies; 2, 12, 6 and 8 are neutrals.

On this basis find the four-fold strength in Rupas as per Table 6. To this add Ucchabala (Exaltation strength). How to measure this ? At highest exaltation point, its strength is 20 Rupas and at its opposite end (Debilitation) it is zero. For the intermediary positions find out by Rule of Three. If you divide the number of degrees advanced or receded by the Debilitation point by 9 you get the strength in Rupas. Add this fifth strength to the above four and divide the sum by 4 you get its Vimshopaka Balam - its maximum being 20 Rupas. Now you may judge the strength of a planet on this maximum measurement.

One aspect that I wish to point out here is about the superiority of 'Hadda Chart'. Its strength is assigned next to Rasi strength. Here you will please note that a planet in its own Hadda attains superior strength and gives out its good effects during its Dasha in the year.

Varshapravesh

Just as there is a day and moment of birth of a new year for the world, called Ugadi or the New Year Day, there is a similar moment of a new year dawning in the life of an individual and that is usually called his Birthday. Though one's Birthday celebrations have to be observed according to this strict definition there is a time old practice of reckoning the day of Natal Star in the Month of Birth (some reckoning Solar and others Lunar). Let them observe as they like but we shall go to the subject proper. One must know how to erect the Birthday map. There are some spoon-feeding like ready-

made tables as *'Solar Return'* published in some books and Ephemeris. If you work as per strict definition of Solar Return these tables will be found to be far from fact. So my advice is not to resort to those tables. What is a Solar Return? The exact moment when the Sun in his revolution touches the same point as at birth is *Varsha Pravesh.* Treat as if one is born at that moment and cast the chart. That would be the most authoritative Solar Birthday Map for the year under review.

Again here are some side-trackers. Some suggest to cast the chart for the place of then residence. You know that the point of Ascendant varies from place to place for the same moment. Just see how far it is logical. It means that one can go on changing his fate every moment by changing places as apart form Annual Chart there is Monthly Chart (Masa Pravesh) and Day Chart (Dina Pravesh) and similar other charts of minute divisions. This is impossible. If it be so, then how to read in advance the future of those who will be often moving from place to place like an Executive Officer or a Canvassing Agent. My opinion is that it should be always worked out for the Birth place only.

I solve another doubt here. Worked with Sayana Sun, both at Birth and the year of revolution the moment of Solar Return would be different from that worked out from Nirayana positions. By research I bank on only Nirayana calculations. To be successful in this system special care has to be taken to workout the correct position of Sun at Birth as all the future Revolution Maps mainly depend upon this chief factor. You must note that one minute difference in its longitude causes the Lagna to move by about 6 to 7 degrees as Sun takes about a ghati (24 minutes) to move a minute in the Zodiac. If perchance the Lagna be on the margin of a

sign, the sign of Lagna gets changed and the entire readings get topsy-turvy as in a Solar Map the Lagna-Rasi is of major importance for the determination of Varshapa selected by his qualification of aspecting Lagna Rasi. Please note that by referring to wrong Epbemeris or following a wrong Ayanamsha these errors arise. So an efficient Astrologer should be all careful.

Determination of Varshapa (Year Lord)

(1) Lord of Birth Lagna, (2) Lord of Varsha Lagna (Year Lagna), (3) Muntha, (4) Lord of Tri Rasi and (5) Lord of the sign occupied by Sun in Day birth and that of moon in Night birth.

These five are titled as 'Pachadhikaris'. They are the five ministers administering over the Native for the year. Their term of life is only one year. Afterwards they will all retire and some of them may be re-elected in the coming year. But once tbey are elected there is no question of pulling them down by no-confidence or other means as on the material plane. In some years all these five ministers may be independent bodies or sometimes their number may get reduced when one will have more than one portfolio. At any rate we always reckon them as five. Once these five ministers are elected (there is no question of selection here) the immediate duty is to appoint one among them as the chief of cabinet. Naturally it is always desirable to have the strongest of them becoming chief. Thus among the five members (Pachadhikaris) whoever gets the highest strength (by Panchavargi Bala) and aspects Lagna becomes the chief called Varshapa (Lord of the year). During the year the effect of this chief planet will be felt predominantly.

Muntha : In the language of Western Astrology Muntha is no other than the progressed Ascendant at 30^0 (a Rasi) a year. Its point is obtained by adding to the Longitude of Lagna as many Rasis as the number of years have elapsed from birth. The lord of sign in which this point falls is Muntha. It has to be calculated mathematically and not grossly by merely counting Rasis.

Harsha Balam

Details of working out Harsha strength are given in Table 5. Allot 5 Rupas for each of the 4 kinds of Harsha Bala and find out the total Harsha Bala. Even here the maximum is 20 Rupas.

This Harsha Bala should be applied to the Panchadhikaris only as during the year they are the chief part-takers. If they are strong enough both in Varga Bala and Harsha Bala they give very happy results. The good or bad resulting should be judged as in General Astrology.

Year Lord

In fixing up the Year-Lord three conditions are to be satisfied :

(1) He must be one of the Panchadhikaris.

(2) He must aspect Lagna, and

(3) He must be strongest, aspecting (the Lagna) planet among the Panchadhikaris.

So, it follows that not always the strongest of five becomes the lord of the year. If perchance the strongest of them does not aspect Lagna then the next in strength among them that aspects Lagna will be selected. If none

of the five aspects Lagna then *any planet other than these five who aspects Lagna and is the strongest among the rest will be the Year Lord.* If none aspects Lagna take the strongest of the 7.

P.S. : By aspect here I always mean Rasi aspect only. Here I love to break the precedence and say that I prefer to select one who aspects Lagna as per general canons of *Varahamihira* as the Lord of the year. In the absence of such aspects you may then resort to Tajaka Aspects.

In one of the slokas describing the effect of the year Lord, the text says that the year when the Varshapa goes to 6, 8 and 12 from Varsha Lagna would be bad. Commentators are confounded how such a thing can happen when planets in 6, 8 or 12 can never become the Year Lords as they do not aspect lagna. The real sense of it is this. As the primary qualification is Rasi Aspect , we select the most powerful planet aspecting Lagna Rasi as the Year Lord. When the Bhava chart is worked out he may fall in 6, 8 or 12th Bhava. Thus you see the importance of Bhava chart even here.

Bhava Phalam

As there is nothing special here those stated by me in Part-I, may be gone through.

Dasha Phalam

This is the salient part as any one is interested to know the timing of events. Unfortunately the Dasha system narrated in *Tajaka Neelakanti (Heenamsha Pathyamsha)* does not work to satisfaction. I have laboured for more than 20 years with all kinds of Dasha systems and finally come to the conclusion that of all of

them Udu Dasha is the best. Distribute 365 days of Solar Year in the proportions of 6, 10, 7, 18, 16, 19, 17, 7 and 20 (being Udu Dashas of Sun on in years) and they will be spans of Dasha periods in days of Sun onwards to Shukra in order or measured by the progression (Gochara) of Sun they are 18, 30, 21, 54, 48, 57, 51, 21 and 60 degrees respectively i.e., when Sun moves 18^0 in the Zodiac by Gochara the Sun's Dasha rules, Moon Dasha for 30^0, Kuja Dasha 21^0 and so on the total of 360^0 representing a Zodiac.

Just as you work out the balance of dasha at birth from Moon's Radix position, work out for the position of Moon at revolution. You get the balance of Dasha at Revolution followed by the successive Dashas in the order of Udu-Dasha. The Dasha reading has to be done in the usual general way described by me under the chapter on General Dasha Bhukti.

Sahamams

By *Sahamam* is meant particular effects. In the method of locating Sahamam there are two schools-one advocating 'Saikatham' (adding one) and the other discarding 'Saikatham'. By research I belong to the first class of advocacy. If the final additative element is not in the range starting from subtractee to subtractor in clockwise order (the two factors that decide a Sahama) then one Rasi should be added further; otherwise not. For example Vivaha Sahamam; Day and Night its formulae is *(Shukra-Shani) + Lagna.* Here Shukra the top planet is Subtractor and Shani the lower planet is Subtractive. Lagna is final Additative Element. If lagna is not situated within the range starting from Shani to Shukra in clockwise order you must add one Rasi to the above

result. That is (Shukra-Shani) + Lagna + one Rasi. But if lagna be in between the two, no Saikatham. Then (Shukra - Shani) + Lagna only will do.

Timing of these Sahamas

I have tried the method of these Sahamas as stated in Tajaka Neelakanti, but they have all failed. So I have found a way out. Find the lord of the star occupied by Sahama as well the lord of the sign occupied by the Sahama i.e., Sookshma and Sthoola lords of Sahama. During the Dasha periods of these planets the Sahama effects are felt.

How to judge the Sahamas?

For everything judgement of Radix chart has to be made first and then the Revolution map. Unless a Sahama is good at birth it does not become good in any year. Hence, estimate its worth first from Birth chart and then from the Annual chart. A Sahama is good if it falls in good places from the Lagna and its Sthoola and Sookshma lords are well placed. If badly placed they give bad and if mixed they give mixed effects. Likewise you yourself guess the rest of the combinations as per general astrological principles:

For the ready reference of my readers I give below the table of Sahamas. In this table the formula for Day is usually given except in cases where the night birth formula differs. Otherwise you must take it for granted that for night births the formula gets reversed. Only the Subtractee and Subtractor elements get reversed, the third Additative element remaining constant for both. Note also some exceptional differential formula in the case of some Sahamams.

Sl. No.	Sahamas	Day or Night	Formula
1.	Punya (Virtue)	D	(Moon-Sun) + Asc.
2.	Guru (Preceptor)	D	(Sun-Moon) + Asc.
3.	Vidya (Learning)	D	(Sun-Moon) + Asc.
4.	Yasha (Fame)	D	(Guru-Punya) + Asc.
5.	Bala (Strength)	D	(Guru-Punya) + Asc.
6.	Deha (Body)	D	(Guru-Punya) + Asc.
7.	Asha (Ambition)	D	(Shani-Shukra) + Asc.
8.	Brathru (Brother)	D&N	(Guru-Shani) + Asc.
9.	Gowrava (Respect)	D	(Guru-Moon) + Sun
	Gowrava (Respect)	N	(Guru-Sun) + Moon
10.	Raja (King)	D	(Shani-Sun) + Asc.
11.	Thatha (Father)	D	(Shani-Sun) + Asc.
12.	Matru (Mother)	D	(Moon-Shukra) + Asc.
13.	Putra (Son)	D&N	(Guru-Moon) + Asc.
14.	Jeevitha (Living)	D	(Shani-Guru) + Asc.
15.	Karma (Vocation)	D	(Kuja-Budha) + Asc.
16.	Roga (Disease)	D&N	(Asc.-Moon) + Asc.
17.	Manmatha (Cupidity)	D	(Moon-Lord of Asc.) + Asc. ; or if Moon be lord of Ascendant.
		D&N	(Sun-Lord of Asc.) + Asc.
18.	Sastra (Science-Vedic)	D	(Guru-Shani) + Budha
19.	Mritha (Death)	D&N	(VIII Bhava Cusp-Moon) + Shani
20.	Artha (Money)	D&N	(II Cusp-Lord of II Bhava)+ Asc.
21.	Anyadara (Other's wife)	D&N	(Shukra-Sun) +Asc.

22.	Vanic (Trade)	D&N	(Moon-Budha) + Asc.
23.	Vivaha (Marriage)	D&N	(Shukra-Shani) +Asc.
24.	Vyapara (Business)	D&N	(Kuja-Budha) + Asc.
25.	Bandhu (Relative)	D&N	(Budha-Moon) + Asc.
26.	Deshantara (Foreign Land)	D&N	(IX cusp-Lord of IX) + Asc.
27.	Kanya (Unmarried girl)	D&N	(Shukra-Moon) + Asc.
28.	Karyasiddhi (Success)	D	(Shani-Sun) + Lord of Rasi occupied by Sun.
		N	(Shani-Moon) + Lord of the Rasi occupied by the Moon
29.	Paniyapatha	D	(Shani-Moon) + Asc. (Watery grave)
30.	Ripu (Enemy)	D	(Kuja-Shani) + Asc.
31.	Daridra (Poverty)	D	(Punya-Sahama-Budha) + Asc.
32.	Jaladva (Journey on water)	D	(3 Rasis 15 Degrees-Shani) + Asc.
33.	Ashva (Horse)	D	(Punya Sahama-Sun) + X cusp.

Some peculiarities only will be explained here:

(1) Item 16 (Raja Sahama) : Here Moon to Ascendant is counted in clockwise order. As one of these two constituents of the Yoga is (Ascendant) the third Additative element Saikatham is not needed.

(2) Item 17 (Manmatha Saham) : During Day Revolution it is (Moon-Lord of Asc) + Asc. If per chance Moon becomes the Lord of Asc then this formula reduces itself to (Moon-Moon) + Asc. i.e., mere Ascendant-meaningless. In such case the formula for both Day and Night as given next stands.

(3) Item 19 (Mritha Sahama) : Counting from Moon to 8th Bhava cusp if the additative element (Shani) is not situated, add one Rasi (Saikatham) else not.

(4) Item 32 (Jaladva Sahama) : The longitudinal distance from Shani to 15 degrees of Kataka has to be calculated. If Lagna is not in this range 1 Rasi to be added.

(5) Item 33 (Ashva Sahama) : Find the distance from Sun to the point where Punya Sahamam falls in clockwise order. If the 10th cusp is not in that range add one Rasi.

(6) In the above table, formula for Day is given in some cases. The night formula in such cases will be in the inverse order. For example, item 33 Ashva Sahama during day is (Punya Sahama-Sun) + X cusp while during night it becomes (Sun-Punya Sahama) + X cusp. Note it is only the first two elements that get reversed while the third additative elements remain constant at both day and night revolutions.

The rest may be worked out by yourselves easily hereafter.

Shodasha Yogams

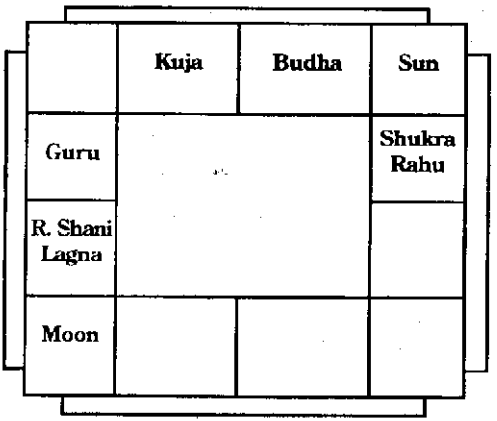

The Yogams stated here are special and peculiar. Of them the primary Yoga is 'Muthusila Yoga', its opposite one being called 'Isaraph Yoga'. The former is formed by

applying the aspect between any two planets while the latter by separating aspect as per western theory of Aspects. The rest of the Yogas revolve round the above two primary Yogas with Moon playing an additional part. I find that these Yogas are more useful in Horary than Horoscopy. Hence I do not deal with this any more.

As usual to make the subject more clear, I cite the following illustrations tested practically.

Let us consider the Annual Birth day map of chart No.1 as stands on19-6-1962 at 9-55 p.m. Bangalore. This is the date and time when the Sun comes to Nirayana position of 4 degrees 34 minutes of Mithuna-the exact Nirayana position of Sun at Birth on 19-6-1907 at 7-09 p.m. Bangalore. The positions of Planets and Lagna are :

Rv.	Ch.	Kj.	BD.	GR.
4-34 Sk. 9-32	24-53 R.Sn. 17-25	22-42	18-32 Rh. 17-41	19-6 Asc. 21-0

Panchadhikaris

1. Lord of the Birth Lagna (Dhanus) is Guru.

2. Lord of the Varsha Lagna (Makara) is Shani.

3. Munthadipathi being the chart of 56th year the 56th sign counted from Birth Lagna Point (10 of Dhanus) is 10^0 of Kataka whose lord is Moon.

4. Thrirasipa as per Chart 3 Varsha Lagna being Makara and Night look to Col. 10 against Night Row. You get Kuja.

5. Being Night revolution the lord of the sign occupied by Moon is Guru.

Thus the *Panchadhikaris* are Guru with two portfolios Shani, Moon and Kuja. Having found out the Panchadhikaris we must next look to the year lord. Of these Guru and Moon do not aspect Lagna. So they cannot become Year Lord on page - 122.

The race is now between Kuja and Shani. Let us now work out their five-fold strengths. First let us take up Mars; vide Table No. 6 on page - 122.

He is in own Rasi gaining	30 Rupas
He is in own Hadda gaining	15 Rupas
He is in Shukra Navamsha, Shukra being in 4th from him becomes enemy.	
So in enemy's Navamsha	$1\frac{1}{4}$ Rupas
Shukra Thrirasi (enemy's)	$2\frac{1}{2}$ Rupas
His uccha bala gives	$10\frac{3}{4}$ Rupas
(Kuja being 95^0 behind Neecha point)	
Total.....	$59\frac{1}{2}$ Rupas

Quarter of this gives about 15 Rupas. The maximum being 20 Rupas you can estimate how strong he is. He is 75% strong - good enough.

Similarly if you work out for Shani, he gets 12 Rupas. So between the two, Kuja being more powerful he becomes the Year Lord. At birth Kuja is lord of 5. In the year chart he is in 4th house. So the year records the happiness of children. In fact the long pending marriages of his two daughters happily occurred during the year Sept.1962.

Next, we go to Harsha Balam : (Table 5)

	Kuja	Shani
Sthana Balam	-	-
Swochadi Balam	5	5
Diva Ratri Balam	-	5
Sex Balam	5	5
Total	10	15

Thus Shani has 75% of Harsha Balam while Kuja has only 50%. As preferred by me I wish to place Shani as Year Lord as he aspects Lagna as per *Varahamihira.*

Bhava Phalam :

Rahu is in 7th (house of marriage) aspected by the two chief Panchadhikaris Kuja and Shani. So marriages in the family were celebrated in Rahu Dasha.

P.S. - While aspects are considered I prefer the usual special aspects as per general theory to this western mode of aspect. Kuja being the lord of the year aspecting 7th finalised the alliance, but the function was celebrated in Rahu Dasha. Like this, judge the other Bhava effects. Of

all those effects belonging to Panchadhikaris will be definitely felt.

Dashas :

Calculating the balance of Shukra Dasha at birth for the Moon's position at 24°-53' we get 8 days. Then the order of Dashas will be Shukra 8, Sun 18, Moon 30, Kuja 21, Rahu 54, Guru 48, Shani 57, Budha 51, Ketu 21 and again Shukra 52: total 360 days, the measurement being one degree movement of Sun as one day. If you want, they may be taken as ordinary days for rough estimate, the correct one being (365/360) of each as per English days of 24 hours. Accordingly his Rahu Dasha started on 7-9-1962 and the marriages happened on 9th and 10th September 62.

Let us take up the daughters' charts. The Solar map of one daughter fell on 23-5-1962 at 24-7 hours, Salem. Rahu is in 7th Bhava and her Rahu Dasha ruled from 4-8-1962 to 17-9-1962. Her marriage happened on 10-9-1962 in Rahu Dasha only. Even here her Year Lord Kuja in 4th aspects Rahu (Makara Lagna).

In the Solar Birth day map (hereafter called S.B. map) of another daughter on 28-8-1962 at 15-1 hours, Salem. Dhanur Lagna, Budha, Lord of 7 is in 10 exalted and her Budha Dasha ruled from 28-8-1962 to 9-9-1962. Her marriage happened on 9-9-1962 last day of Budha Dasha.

Sahamam :

As per Sahamam Table 7 the distribution of some of the important Sahamas in the above chart are as follows :

1 Rasi	2 Rasi Lord (Sthoola Lord)	3 Sahamas	4 In Degrees & Minutes	5 Star Lords (Sookshma Lord)
Mithuna	Budha	Raja	08-0	Rahu
Kataka	Moon	Punya	00-41	Guru
		Yasha	02-35	Guru
		Asha	13-0	Shani
		Vivaha	13-8	Shani
Simha	Sun	Kanya	06-0	Ketu
Kanya	Budha	Vanick	21-21	Moon
		Vidya	11-0	Moon
Dhanus	Guru	Vyapara	17-0	Shukra
Makara	Shani	Roga	17-0	Moon
		Shastra	19-19	Moon
Kumbha	Shani	Manmatha	14-0	Rahu
		Jeevitha	23-2	Guru
		Artha	27-35	Guru
Meena	Guru	Putra	15-13	Shani
		Anya Dara	26-0	Budha

The effect of a Sahama is felt either during the dasha of the lord of the Rasi in which it is situated otherwise called Sthoola Lord (vide Col.2 above) or during the dasha of the lord of the star occupied by the Sahama otherwise called Sookshma Lord (Vide Col. 5 above).

To read the Dasha effects of a planet find out the (I) Bhavas of which he is the lord, (2) Bhava he is situated or aspects, (3) the Sahamas of which he is the Sthoola or Sookshma Lord and finally (4) Couple with aspecting or joining planets with similarly established traits. During the Dasha period of that planet all these effects are felt. If two are three synchronise it may be predicted as dead-cert. *For example take Shani in the above chart :*

Shani is lord of 1and 2 powerfully placed in Lagna, aspects 7 and 10 and is aspected by Shukra, Lord of 5 and 10. He is the Sthoola lord of Roga, Shastra, Artha, Sahamas and Sookshma Lord of Asha and Putra. So during Shani Dasha he experienced all these effects (Beneficial as Shani is well placed with Harsha Bala). He is the lord of 2 (house of finance) and also lord of Artha Sahama. Thus there is synchronised effect of finance by two methods. So it is dead-cert that during his Shani Dasha his financial conditions will be superb.

Another Example : In the S.B. map of his daughter of 23-5-1962 Vivaha Sahama is 18-52 of Mithuna-i.e., Aridra Star. Its Lord Rahu being also in the 7th house caused her marriage in Rahu Dasha.

Another Example : In the case of the other daughter with S.B. map of 28-8-1962 Vivaha Sahamam is 29½ of Kanya. So her marriage took place in Budha Dasha-more so as Budha is in Kanya alone in the Sahama sign.

Thus the Annual Readings have to be read out.

Varshajathaka readings have been explained in a condensed form -Ed.

Chapter VII
Daily and Hourly Reading

In the preceding chapters I have narrated the methods to evaluate the static merits of a chart (Bhava Phal) and the dynamic effects by Dasha, Bhukti, Gochara and Solar Birth Day Map. From these you are able to assess the summary worth of a chart, read Dasha Bhukti effects and also fix up the time of occurrence by Gochara and further deal with the annual detailed readings. In short you can predict the Life Reading, Periodical Reading and Annual Reading. If you know how to read a Day's and Hour's reading you become a perfect Astrologer in Horoscopy. I may take up Horary Science in a later edition if there be an urge by the Readers. Even there my method is unique and very definite and easy too. Let me now deal with the minutest time reading of Day and Hour. Many such forecasts you have been seeing in most of the Dailies and Magazines but alas they are after all glamour writings not fitting to any particular life. This goaded me to find a way out. At last I am blessed with a novel method and feel happy to communicate it to you through these pages. Please note that whenever I quote a method it is always after deep research and verification. This system has given me proper satisfaction and I am also confident that you will also appreciate it heavily. Now to the subject proper.

Just as you are now able to cast a Dasha Chart with Starters and Rulers (Vide Ch. II, Pt. II) cast the chart for the day (of course without Lagna) treating the day's Moon-Star-Lord as the Lord of the Dasha. Note also all the variations in the movement of planets, if any, on that day. For you will have to work out a fresh Dasha Chart for the

variations. Find the day's Yoga and Avayoga planets and the Zero-Rasis. Remember the Birth Yoga Planet. These are factors needed for the evaluation of the day's results.

Similar to the method of estimating the merits of a Bhukti Lord from its Starter and Ruler, work out in the Day's chart the merit of Birth Yoga planet. The result indicates the Day's value. This is the sum and substance of this theory. Still for the benefit of those that cannot fully digest this theory stated in a line or two, I try to explain it further with illustrations where necessary. By research I have found one peculiarity here. In the case of males, the Rulers play more important part than the Starters while Starters predominate in female charts.

A Few Striking Points to be Noted

1. Day's Yogi being the Ruler of Birth Yogi - *good day.*

2. Day's Yogi being group planet of the above Ruler - *Good.*

3. Day's Avayogi being the Ruler or his group planet- Bad day except when the Birth Yogi is a Negative planet when the day becomes excellent.

4. In the above cases if the said Ruler or the Day's Yoga planet falls in Zero-Rasi, Negative signs or set the good effects get nullified and the bad effects get submerged.

5. If the said Ruler belongs to the group different from either the Day's Yoga or Avayoga planet, the effects will be normal depending upon its characteristics at birth.

6. The day when Birth Yogi or its Ruler transits the star of the Day's Yoga Lord in a good Bhava (in Birth

Chart) the day will be good. Contrary will be the case with Star of Day's Avayogi in Bad Bhava.

7. Similarly look to the transit of Day's Yogi in the Star of Birth Yogi in good Bhava.

8. Counting from Birth Lagna see in what Bhava the Day's Yoga point and the Day's Yoga Lord transit. It is the effect of that Bhava that would be felt that day.

9. If Birth Yogi is a negative planet at birth or Rahu or Ketu then their crossing the Day's Yogi gives Yoga after rubbing; but if such a planet crosses the day's Avayogi as Ruler brilliant effects happen on the day quite unexpectedly (Viparectha Raja Yoga) except when the Day's Avayogi is Birth Yogi's enemy.

10. Just as you read from Birth Yogi, read also from the other planets the effects of the Bhavas they own etc. In my experience this has not given me proper satisfaction. So I confine only to Birth Yogi.

11. As already suggested the Ruler seems to work well with the males while the Starter in the case of females.

Hour of Event

The above Rules will aid to estimate the day's worth. We may further fill up the house. These events fall during the Hora of (1) the Day's Yoga or Avayoga planet as the case stands or (2) the Ruler of Birth Yogi or (3) their group planets. For Hora see Ch.1 Pt. 1. If Rahu be the indicator the results will be felt during Rahu Kalam. Here please note that Rahu and Shani are kiths and so Ketu and Kuja.

A Few Illustrations

(a) The marriage of the native of Chart 1 cited here happened on 13-7-1927 on Wednesday when the day's Yoga was Aridra-Rahu. His birth Yogi Rahu crossed Shani as Ruler that day. Rahu was then in 7th Bhava (being Dhanur Lagna). The day's Yoga point being Aridra it also falls in 7th Bhava. Thus both the Yoga point and Yoga Lord of the day are transitting the 7th Bhava and happily Birth Yogi Rahu crosses Shani as Ruler. You know that Rahu gives effects like Shani being kiths. So the day is good indicative of 7th house effect - marriage.

(b) See his wife's chart. Her Birth Yogi is Shukra who crosses Rahu as Starter and Kuja as Ruler. In the case of females the Starter becomes powerful. The day's Yogi being Rahu it was a good day for her too being in Lagna.

(c) Being Wednesday the third Hora ruling between 8-5 to 9-5 is governed by Shani. As the indicators are Rahu and Shani (like planets) the event happened during Shani Hora.

(d) On 20-2-1960 the native had a very good day. Day's Avayogi was Guru. His Birth Yogi Rahu crossed Guru as Ruler on that day. Rahu being a natural negative planet crossing Day's Avayogi is excellent.

(e) On 17-6-1956 in the case of a male born with Budha as Birth Yogi, Budha crossed Guru as Ruler. On that day Guru was Avayogi. Still he earned plenty that day. Reason is that his Birth Yogi Budha is a negative planet at birth owning 3rd and 12th Bhavas.

(f) On 18-1-1962 when the Day's Avayogi Shukra became the Ruler of Birth Yogi, Rahu the native was

trapped for bribery. In Rule 9 above when Rahu a natural negative and Birth Yogi crosses the day's Avayogi (Shukra in this case) a sudden Yoga should have happened; but the contrary has happened. Why ? See the last exception to that Rule that when on such days Avayogi is Birth Yogi's enemy it is bad. As Shukra is Rahu's enemy the evil has predominated.

Misconceptions and Blind Beliefs

All I had to say about the horoscopic side of Astrology have been detailed in the several chapters of Parts I and II of this Treatise. I now touch upon some of the topics which are in daily usage but under heavy misconception or blind faith in the time old sayings which have more or less become dictatorial dictums unchallengeable even by the mighty. But I try to show the fallacy and see how they would be welcome.

(1) Rahu Kalam

This I take first as it is followed by all and at all times. A period of $1\frac{1}{2}$ hour or $3\frac{3}{4}$ Ghatis called muhurtham is taken as the span of Rahu Kalam at prescribed parts on all the week days and they are :

Week Day	Time	Part of Day
Monday	7-30 a.m. to 9-00 a.m.	2
Tuesday	3-00 p.m. to 4-30 p.m.	7
Wednesday	12-00 noon to 1-30 p.m.	5
Thursday	1-30 p.m. to 3-00 p.m.	6
Friday	10-30 a.m. to 12-00 noon	4
Saturday	9-00 a.m. to 10-30 a.m.	3
Sunday	4-30 p.m. to 6-00 p.m.	8

This table is not quite correct. The correct one is to divide the duration of the Day into 8 equal parts and count against the week day its duration in the part of the day assigned across it, counting always from the Sunrise of the place. The above rough table is shown presuming that both the Sunrise and Sunset are at 6 a.m. and 6 p.m. respectively. For any changes in the time of Sunrise or Sunset necessary alterations should be made as stated above. Many do not know this fundamental thing; yet they are so scrupulous in its observance that sometimes they get themselves pratically cheated in that they will have done an act in Rahukalam alone though they think they have avoided it. This I attribute to destiny.

It is not logical to ascribe good or bad traits to certain elements such as Weekday, Thithi, Star and moments like Rahu Kalam, Gulikakalam etc. I will show you that all times are good or bad depending solely on the individual Birth chart. The general conception of good or bad may be applicable to world events and certainly not to particular individuals. Rahu Kalam is not bad for all and at all ages. In fact I advise some to undertake only in RahuKalam and have also predicted that some events have happened only then at which my consultee was wonderstruck as it was so in his life then. He said he was for that reason called *Rahukalam Krishna Murthy.* Though he tried his best to avoid Rahu Kalam circumstances would force him to do then alone or he would hear the results only then all happy events in his case. The secret of this lies not in its general character but in its static quality at birth. If at birth Rahu is well placed and Yogakaraka and his Dasha operates; all the good effects happen only during Rahu Kalam. It is only when he is badly situated at birth we say that Rahu Kalam is bad-coincides. In fact this may be generalised in the case

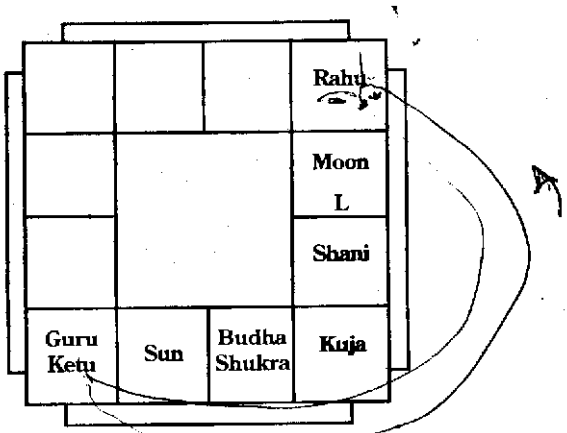

of all planets and their effects read out during their periods (Horas).

(II) Thithi (New Moon and Full Moon Days)

In Kerala New Moon day is held precious and likewise by the Muslims too. All the rest are afraid of it. The fact is different. New Moon is caused by the conjunction of Sun and Moon. If they are Yogakarakas at birth and the native runs these Dashas, New Moon days falling in good bhavas are the best for the native. For the same reason a Full Moon Day may be bad if either of them is badly placed at birth as on that day they will be in direct opposition. Thus such conclusions of good or bad should always be derived from birth chart and not by blind application of the general say.

(III) Kaalasarpa Dosha

Even this is not properly understood by many. If all planets are hemmed in between Rahu and Ketu in any order they seem to opine the existence of Kaalasarpa Dosha. This is not always correct. You know that Rahu is a Cobra with poison in the mouth while Ketu a Scorpion has it in his tail. The movements of these being anti-clockwise, planets in-between the mouth of Rahu and the tail of Ketu only get hurt. It is here that Kaalasarpa Dosha exists and not when they are between the head of Ketu and trunk of Rahu for the elementary reason that scorpion cannot hurt by its mouth and cobra by its tail. To be more clear if all the planets are from Ketu to Rahu in clockwise order the Dosha is formed and not when in the space of anti-clockwise order. If a planet be with Rahu or Ketu in the same sign then unless by degree position he falls inside the above clockwise direction this Dosha will not be formed.

For example, in Pandit Nehru's chart :

Some may opine that it has Kaalasarpa Dosha. It is wrong for two reasons. (1) The planets are not in clockwise order from Ketu to Rahu, (2) Guru is out of even this anti-clockwise order as he is in advance of Ketu in the sign. Even if this Dosha is formed in a horoscope as per my strict definitions it will not be always bad. Its effect will be felt only when Rahu or Ketu Dasha or that of the planet in their star intervenes. Even then if Rahu and Ketu are Yogaic and in good positions at birth no harmful effect will be felt. Unless all these conditions are satisfied you should not pronounce its bad effects.

(IV) Kuja Dosha

Angaraka Dosha is another great misconceived subject. Mere position in 1, 2, 4, 7, 8 and 12 from Lagna, Moon or Shukra is supposed to cause widowhood or widowerhood. I have witnessed many horoscopes being discarded for marriage alliance on this ground. If it exists in one chart they require one with a similar dosha to counteract the evil. What a wonderful illogical

statement it is! As per their own fear that the existence of this dosha in one is likely to kill the other then I argue that both die due to the dosha of one another. If really there be such a dosha in a horoscope you must look to the longevity of the other and not a similar dosha. Merely because Kuja is there how can you mark his real quality? If suppose he be in 8, is he there to harm the partner, his younger coborns, his lands or the effects of the bhavas he owns or not at all to harm but to give Yoga? For Simha Lagna Kuja in 4 is Yogakaraka. Thus I say there is Kuja Yoga and not Kuja Dosha. If Kuja is Birth Yogi then he always does good whereever he be. Astrology is not so easy to handle. Let the old school revise their concention at least hereafter.

(V) Kalachakra Dasha

It has become the hazy notion of some to resort to all sorts of Dashas if they are not able to progress with Udu Dasha which is always upheld by me. One of the alternative Dashas is Kala Chakra. Be it once-for-all understood that all Kalachakra Dashas do not reveal proper readings. This system may be used only to find out the time of changes in life. The periods when there are jumps like Mandooka Gati (Frog), Ashwa or Thuraga Gati (Horse) and Simhavalokana (Retrospection) caused at the end of Kataka, Vrischika and Meena are important. Texts say that these periods are bad. It is not so always. If the sign to which it jumps be a good bhava good results happen; otherwise bad. Thus Kalachakra Dasha helps only at the period of jumps.

(VI) Nakshatra Dosha

This is another fallacius conception. Even a lady in the house objects at the very thought of charts of Moola, Rohini and Aslesha birth stars. The star as a whole does

not harm. If at all there be affliction, it is the minutest division in it that may show off such symptoms not even its padas as some books narrate. Readings should never be based on birth stars only. The Bhava and its Karaka have to be first judged and then the starry effect suplemented to them. Birth in Rohini star alone will not kill the maternal uncle as in the case of Sri Krishna (born in Rohini) unless the sixth Bhava (House of maternal uncle) and Budha (Karaka) are badly situated at birth. If they are good, Rohini in birth will have no such malefic effect. Thus you see that the Radix planetary effects play primary part and not the stars.

(VII) Marriage Alliance Tests

This is a big issue. No two astrologers agree on the point of *marriage alliance* with two horoscopes with the consequences of the father of a daughter tending to become desperate in his hot and weary pursuit of a Son-in-Law. Though marriages are made in heaven and the tie is already settled our searching for the partner and comparing the horoscope are mere toy-plays of Almighty. Even so we do not do the job well. In most of the cases the family purohit who does not know much of this science becomes the Demi-God of the family and his version is sacred and final. It has become a very necessary factor (I say necessary evil) to judge the merit of the alliance by marks of Kootams which are after all very very secondary. There are many instances recommended as per these marks which have proved otherwise. After all to verify as per marks-system it needs no technical man. It is meant to be resorted to as a last measure in case there be no Astrologer in that place.

The next question is how far to rely on the accuracy of the chart of an outside party when it is

difficult to strike the correct birthtime of our child. In fact all conclusions may be inferred from any one chart alone using the other one for formal verification and confirmation and also to estimate the destiny of *Tie.* I am going to show that effects of Kootams can be seen in the chart itself singly or with the other chart.

Single Sided Surveying one Horoscope only :

(a) Rasi and Graha Mitram : See how the lords of 1 and 7 are mutually situated and see their mutal cordiality etc. If they are in 6, 8 and 12 (inutually) they differ. In such case the destiny drives the native to join a similar partner with any amount of careful comparison of the two horoscopes. Even if they are mutual enemies if they are posited together or mutually aspecting each other they live together even with differences of opinion. Here one thing has to be noted. Suppose the lord of the 7th is the enemy of the lord of lagna, it then means that the partner is the native's enemy. If the lord of Lagna is not the enemy of the lord of 7th then the native will not reciprocate the illwill. In such a case it is only the native that becomes the sufferer. Similarly regarding the aspect : The aspector has affinity towards the aspectee and the reverse. So in such a case there is single sided affinity. Further, of the two the more powerful rules over the other.

(b) Yoni Kootam : Conjugal happiness to be judged by the 7th house.

(c) Stree Deergam : Judge from Shukra and the 8th house.

(d) Ganam : Compare the gunas of the lord of 1 and 7.

(e) For all the rest of the Kootams contributing to happiness of the couple look to the 4th and 7th Bhavas.

(f) If the lord of the seventh house is birth Yogi or in the star of Birth Yogi or with Birth Yogi then there is general happiness and prosperity *vice versa.*

(g) If the lord of the 7th Bhava aspects lagna or is with lord of lagna there is amicability.

(h) Finally and for definiteness judge from the effects of Dasha lords from the Navamsha Chart.

Judged this way the nature of the partner may be ascertained from one chart only. Destiny forces this native to marry only such a partner. Then where is the human hand and discrimination to select the one of our wish ?

Mutual Verification of both the Charts

(a) See how the lords of the lagnas of both are disposed. Even if they are enemies, if they join or aspect each other in either of the charts they live together.

(b) If the lord of the 7th Bhava or its cuspal star-lord is the Birth Yogi of the other or is in the star of the Birth Yogi of the other, *happy-match.*

(c) If one's lagna is in another's Yoga star - *Yogaic.*

(d) If the two lagnas are mutually in good positions other than 6-8-12-*Good.*

(e) If the Birth Yogi of the other aspects the Native's lagna- *Good.*

Judged in this scientific way you will arrive at correct conclusion. In fact when I am consulted I will first scrutinise the horoscope in the above manner and at the last stage of recommendation see the most important kootams only such as *Ayur Kootam, Nadi Kootam and Raju Kootam* leaving the rest to others to look into if they feel so anxious.

(VIII) Muhurtham

Lastly I touch upon the subject of propitious times for undertakings. Texts on this subject prescribe the Day, Thithi, Star, Yoga etc. differently for different acts. Even they have not proved true. For they are again general rules. What is needed is with reference to a particular individual. In my opinion all days have auspicious moments irrespective of season etc. and they must be properly selected. The criteria to select such muhurthams are as follows : If you cast the chart for the moment selected, the following conditions should be satisfied for propitiousness.

(a) The current Dasha Lords as per birth and muhurtham should be in happy positions from both the Birth Lagna and moments Lagna. At least the former Dasha Lord counted from Birth Lagna and the latter from moment Lagna should be in happy positions. Likewise the current Bukti lord of muhurtha should be in happy position in muhurtha chart both from Lagna and Dasha Lord.

(b) The functional and natural Karaka of the particular issue for which the muhurtham is fixed should be in happy positions both from Birth Lagna and Muhurtha Lagna-at least from the muhurtha Lagna.

(c) The current Dasha Lord of the moment chart and its succeeding ones should be happily placed in moment chart. If the current Dasha is good and the succeeding one is bad the issue stands good during the current Dasha which gets affected in the succeeding Dasha.

(d) See how the muhurtha Lagna and its current Dasha Lord are related to moments Yoga and Avayoga planets.

(e) See how the Lord of the Lagna of the moment is situated in the chart.

These and similar other considerations decide the propitiousness of a moment for an undertaking more correctly than the mere superficial wordly general canons. Thus ends this short eulogy on misconceptions.

With these I stop here till I think of producing the next volume wishing the blessing of Almighty on the faithful readers of my chapters, the ability to digest my sayings properly and enable them to even surpass me in intellect and researches overlooking omissions, commissions or criticisms. I will be much obliged if the readers furnish their opinions on this text.

- God Bless You All -

Om ! Shanthi !!! Shanthi !!! Shanthi !!!

APPENDIX - 1

Illustrated Horoscopes

Ready-Made Table to Erect the Division Charts

As some of our students desired to have a ready made Table to aid the erection of our Division Charts (D-Charts) we have now added on this extra matter which will be beneficial to the readers.

Mode of using this Table :

Under each D-chart table there are 13 columns and as many rows as the number in that Division is.

In each row the 1st Col. shows the maximum part of that Amsha in Degrees and Minutes.

In each row from 2nd to 13th column Rasis from Mesha to Meena in order are represented.

The numerals inside the body of the Table stand for the Rasi counted always from Mesha.

For example you wish to know where a planet situated at 13°50' in Mithuna goes in Navamsha (D-9). 13° 50'falls in 5th Row and Mithuna falls in 4th Col. In between them is No. 11 which is Kumbha counted from Mesha. In this way understand all the other Divisions.

DIVISION CHART (9) :

03-20	1	10	7	4	1	10	7	4	1	10	7	4
06-40	2	11	8	5	2	11	8	5	2	11	8	5

ILLUSTRATIVE CHARTS

In this part, I give forty illustrative horoscopes that I have practically handled to enable the readers to follow my theory well. I give only the Prominent Division Charts under each life. Instead of giving in regular chart forms, I have used tabular forms. The readers are requested to convert them to the type of charts they are accustomed to as there are varying types of charts at different places. Planets are shown by Notations as stated in Part I. The Rasis (signs) in which they are posited in the Division Charts are represented by Numerals 1 to 12 to denote Mesha (Aries) to Meena (Pisces) in order. For ready Reference the Notations of Planets are given below.

Rv, Ch, Kj, Bd, Gr, Sk, Sn, Rh, Kt and Asc represent from Sun onwards to Lagna in order. In each chart Thithi, Week day, Birth Star, Birth Yoga, Birth Yogi, Birth Avayogi, Duplicate Yogi, the planetary positions in degrees and minutes, the Running Dasha Chart with Starter and Ruler, Zero Rasis and the D charts with Birth Details are given, omitting some when not needed.

Note : R-Retrograde; S-Set

Chart 1

19-6-1907 at 7-09 p.m. (Bangalore Dt.)

Astami-Wednesday-Uttara-Vyathi Patha X Cusp. 17-30 Kanya.

Birth Yogi=Rahu; Avayogi=Shukra;

Duplicate Yogi=Shani.

Balance of Sun Dasha at birth = Yrs. 0-0-13.

Yoga point 17-49 of Kumbha,
Zero Rasis=Mithuna-Kanya.

READ

(i) New Techniques of Prediction - Part I

(Parts I and II of NTP are complementary)

(ii) How to Read A Bhava ? - *By Dr. T.S. Vasan*

Appendix - (2)
Fundamental Elements

Zodiac : It is an imaginary circular belt divided into twelve equal parts of 30°each called *Constellations.* The width of this imaginary belt (path) is 8^0 on either side of the apparent ecliptic path of the sun.

Ascendant : The point of inter-section of the eastern horizon and the ecliptic path of the sun at sun-rise. It is the first house in the horoscope of a person.

Descendant : The point of inter-section of the western horizon and the ecliptic path of the sun at sun-set. It is the seventh house in the horoscope of a person.

Constellations : These are the twelve divisions of the zodiac, each division being of 30^0 . Each division represents a particular *sign* or *house. These signs are* -

(1) Aries *(Mesha)*
(2) Taurus *(Vrishaba)*
(3) Gemini *(Mithuna)*
(4) Cancer *(Kataka)*
(5) Leo *(Simha)*
(6) Virgo *(Kanya)*
(7) Libra *(Tula)*
(8) Scorpio *(Vrischika)*
(9) Sagittarius *(Dhanus)*
(10) Capricorn *(Makara)*
(11) Aquarius *(Kumbha)*
(12) Pisces *(Meena)*

Further, these twelve divisions are divided into twenty seven *asterisms* called *Nakshatras.* Thus each division or sign is having two and a quarter Nakshatras. Each Nakshatra is further divided into 4 parts called *padas.* The twenty seven Nakshatras are divided into 3 groups called *Triads.* Each triad is ruled by a planet. These planets are nine in number and they are as follows :

(1) Sun *(Surya)*
(2) Moon *(Chandra)*
(3) Mars *(Mangala)*
(4) Mercury *(Budha)*
(5) Jupiter *(Guru)*
(6) Venus *(Shukra)*
(7) Saturn *(Shani)*
(8) Dragon's Head *(Rahu)*
(9) Dragon's Tail *(Ketu)*

The twelve divisions or houses in the Zodiac are numbered from 1 to 12 in the counter clock-wise direction. A particular planet is taken as the Lord of the House occupied by a particular Sign of the Zodiac. (Refer Page -83)

Note : The planets are represented by the following symbols.

☉ stands for Sun	♃ stands for Jupiter
☽ stands for Moon	♄ stands for Saturn
☿ stands for Mercury	☊ stands for Rahu
♀ stands for Venus	☋ stands for Ketu
♂ stands for Mars	

Trine : Two planets which are separated by 120^0 in the Zodiac are said to be in *trine*. This is only a geometrical relationship.

Square : Two planets which are at right angles are said to possess *square* aspect.

Opposition : Planets which are diametrically opposite in the Zodiac are said to be in *opposition*. They form a straight angle between them.

Conjunction : Planets in the same house in the Zodiac are said to be in *conjunction*. In otherwords, they occupy the same degree of a Zodiacal sign.

Cusp: It is the dividing space between any two signs of the Zodiac. It is equal to plus or minus 1^0 on either side of the dividing line.

Mid Heaven: It is the zenith or the top most degree of any horoscope.

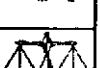

Nadir: It is the opposite of zenith. It is the lowest position in the birth chart which is opposite to Mid Heaven or Zenith.

Lord of the House: The planet which is closely connected to a house or a sign is termed as the Lord of that House. In otherwords, a particular planet is treated as the Lord of a House occupied by a particular sign. For example, the planet Mars is the Lord of the House occupied by Aries.

Thithi and Yoga: Thithi in Sanskrit means *subtraction* and Yoga means *addition*. With particular reference to astrology, the difference in position between the Moon and the Sun is *thithi* while the sum total of them is the *yoga*.

Ephemeris: Ready-made Tables of certain astronomical data which are very useful in finding the celestial positions of the planets is known by the name *Ephemeris*. Now a days advanced ephemeris are available with daily positions of planets.

SIGNS OF THE ZODIAC : REFER TABLES ON PAGE 183

House	Sign of the Zodiac	Lord of the House	Symbol	
			Greek	Hindu
1.	Aries	Mars	♈	
2.	Taurus	Venus	♉	
3.	Gemini	Mercury	♊	
4.	Cancer	Moon	♋	
5.	Leo	Sun	♌	
6.	Virgo	Mercury	♍	
7.	Libra	Venus	♎	
8.	Scorpio	Mars	♏	
9.	Sagittarius	Jupiter	♐	
10.	Capricorn	Saturn	♑	
11.	Aquarius	Saturn	♒	
12.	Pisces	Jupiter	♓	

EDITOR'S NOTE :

I being a serious student of astrology since more that four decades, was not satisfied with the general theoretical books on Astrology flooded in the market. Though I have great esteem for all classical works, which I methodically assimilated with the help of great scholars with whom I was associated for several years, still my mind was always in search of more secrets & the missing links of this great science. Fortunately, I had the blessings of God almighty to have many secrets from great pandits of this country whose names I always think and remember in my morning prayers. Of these great pandits, Mr H.R. Seshadri Iyer, the author of "NEW TECHNIQUES OF PREDICTION" (Parts i, ii, iii) has highly influenced my mind in understanding this age-old science with many missing links, with proper perspective. After going through this system & techniques which I applied for more than two decades, I can confidently say that no student of astrology should miss his works & study them carefully to understand his techniques which will be very useful in our day today astrological analysis. I have taught these techniques to all my students in India and abroad & all my students are very happy as they found it very useful.

I was over-joyed when I heard that Mr B.K. Mahipal of Janapriya Prakashana, Bangalore undertook the task of publishing these books which are out of print today. I was also pleased to make here & there some notes to make the students understand properly ; my intention was not to change anything in the books the author has written. I hope that the student community and the general public who are interested in astrology will make use of these books which are very useful not only for beginners, but also for students who wish to make higher studies in astrology.
