PREFACE

(First Edition)

This treatise titled 'New Techniques of Prediction' is brought forth in two parts for certain conveniences of reference. The first part contains all the rudimentary elements and rules under general Astrology arranged in a systematic manner enabling easy reference. In addition to what is available in standard classic works, I have included very many new and unknown secrets after long research. My object is to render my treatise useful for both the beginner and the advanced student of astrology. As far as possible I have avoided unnecessary and hazy ides, retaining only those that have stood true by research. This part II edition is designed to contain chiefly predictive portions, the elementary ones being included in Part I. This is a rare and valuable publication containing precious dictums not known to many so far - 'A Million Dollar Worth' as one of the readers has expressed. I have tried to handle the subject in a mathematical way winnowing all alternatives and doubts. On application of my theory you will yourself realise its merits. There is nothing new - no new invention. As I have once before expressed no human being of ordinary intellect can add on even an atom to it as his own. What an intelligent astrologer should do is to merely digest the proper meaning of our classic dictums and apply them diligently. That is what I have done and that is what I expect of you all. Added to it long research work is needed. It is only by way of research that I have been able to place before you the wonderful effects of Thithi, Weekday, Star, Yoga etc. The Division Chart or Phala Kundali is a unique product of my long research which is a tangible foundation for correct

meticulous predictions. A number of illustrative horoscopes cited in this treatise is a special advantage to the students. They are all a collection of well-known charts investigated by me in detail.

The Chapter on Dasha Bhukti is exemplary. Gochara is treated by me in a new style which gives better results than the traditional method of reckoning from moon. No where you have seen the wonderful Daily and Hourly reading I have narrated. Lastly, very many controversial and misconceived subjects, which have been more or less traditional sayings without tangible truth in them are discussed at length with illustrations.

In short, this treatise is a revelation of hidden truth. I feel satisfied if the public digest these principles well and try to apply them in their future handling of horoscopes.

If a set of enthusiasts of any place in India or abroad desire to be coached on these and other lines I am prepared to honour their invitation. My chief object is to spread my theory round about India and if possible the world over.

H.R. Seshadri Iyer, M.A.
Author.

Preface to Second Edition

This Edition is an enlarged one over the first one. As some of the readers and students desired to have a ready made Table of Divisional Amshas we have added it and combined the appendix also to this book. Some of the printer's errors are set right. The book is brought up with a better get-up. See our latest edition Part III on *Race Astrology.*

Contents

Chapter I - Thithi and Yoga (07-22)

Preamble and Definitions - Yoga and Avayoga - Positive and Negative Signs and Planets - General Enunciations

Chapter II - Novel Method of Dasha Bhukti Reading (23-43) :

Preamble -Dasha Chart -Starter - Dasha Chart - Calculations of Starter - Ruler - Dasha Yogi -Evolution of one Dasha Chart from another, - Easy way of working out a Dasha Chart - How to read Dasha Chart - Rules to judge the effects of Bhukti Lords - Special effects of Dasha Lord on Ascendant .

Chapter III - Phala Kundali or Division Charts (44-81)

Preamble - Theory of Division Charts -Basic principles to frame Division Charts - Evaluation of Division Charts and their portfolios - Table of Amsa parts of D-Chart - How to use the D-Charts ? -Illustrations of D-Charts Reading .

Chapter IV - Dasha Bhukti (classical)- (82-104)

Preamble - Dasha Reading -Mathematical Navamsha Chart -Bhukti Reading -Illustratoins, .

Chapter V - Gochara (Transit) (105-118)

Preamble -Gochara as part of Astakavarga - Judgement of Transit - Secondary Directions to help transit. -Other Theories of Transit -Illustrations .

Chapter VI - Varshapravesh (solar map) (119-141) :

Preamble - Panchavargi Bala -Hadda etc. Charts -Table of

Pancha Vargi Bala - Varshapravesh - Determination of Varshapa -Harsha Balam - Year Lord -Dasha System - Sahamas - Timing of Sahama effects - Table of Sahamas - Shodasha Yogas - Illustrations.

Chapter VII - Daily and Hourly Readings and Misconceptions and Blind Beliefs - (142-155)

Preamble - Striking points guiding Day Reading -Hour of Event - Illustrations -Misconceptions and Blind Beliefs -Rahu Kalam -Thithi, New moon and full moon day -Kalasarpa Dosha -Kuja Dosha -Kalachakra Dasha -Nakshatra Dosha - Marriage Alliance Tests - Single survey of one Horoscope -Mutal Verification of both charts - Muhurtham .

Appendix (1) : Illustrated Horoscopes (155-179)

Ready-made Table to erect Division Charts - Illustrative Charts :

Appendix (2) : (180 - 184)

Fundamental Elements

NEW TECHNIQUES OF PREDICTION -II

Chapter I

Thithi and Yoga

Those that have not read my Articles on this subject may feel surprised to know that for correct predictions Thithi, Week day, Star, Yoga and Karana which form the five fundamental parts of a Panchanga (meaning Pancha Angas i.e., five limbs) are as important as other things. All of us use the star, that too under limitations; and most of us leave off the rest, with the result we are left in the lurch and the sacred science decried by our folly or ignorance. Is it not a common say that one is born a Yoga-Purusha (fortunate person)? But few know its real significance as we had not known so far the mode of using both Yoga and Thithi for Predictions. For the benefit of my friends, I disclose below the Golden Truths in Astrology. First I dwell on Thithi and Yoga, the rest will be dealt with later. In Sanskrit Thithi means Subtraction, while Yoga means Addition. *The difference in position between Moon and Sun gives thithi while the sum-total of them gives yoga.* There are 30 Thithis and 27 Yogas. Each yoga is controlled by a star in the chronological order, the first Vishkamba Yoga starting with the star Pushyami. The lord of the yoga is its stellar lord. In addition to this chief birth yoga planet, the lord of the Rasi containing the birth yoga point will also become another yogi called 'Duplicate Yogi'. [For calculation of Thithi and Yoga, please go through Chapter I of Part I.]

As for anything there is a negative for every positive, there is Avayoga planet (Adverse) for every Yoga planet and they are as shown here :

Yogi	Avayogi or Enemy	Triple sets of planets
Sun	Shani	
Moon	Budha	
Kuja	Ketu	① Ketu, Moon, Guru
Budha	Kuja	② Shukra, Kuja, Shani
Guru	Sun	③ Sun, Rahu, Budha
Shukra	Guru	
Shani	Moon	
Rahu	Shukra	
Kethu	Rahu	

As per this theory there is only one enemy for each planet and all the 9 planets are grouped into 3 sets of 3 each. The 3 planets in each set belong to one group of common friendship. Thus when any one of the three planets becomes a yogi the other two automatically imbibe yoga character and this is specially noticed in the case of Rahu. When Sun or Budha becomes yoga planet, Rahu becomes yoga like planet.

Effects of Lunar Day or Thithi

In addition to the laid down broad principles of judgement, Thithi has a predominating influence on the life of a person. Except on full moon and new moon days every Thithi has at least two Rasis called 'Dagdha' or burnt ones. For details please see Chapter-1 Part I. For the sake of convenience I call these Dagdha Rasis as Zero Rasis hereafter. Bhavas counted by them, their lords and

planets in such Rasis lose their power, unless retrograde. That is why sometimes predictions go wrong. Add on to the usual canons of judgement the theory of Zero Rasis and Yoga and then predict. You will never fail. Effects of birth in a year, month, day, thithi, star, yoga and karana are cited in several books. Of them it is only yoga effect that stands to test. So I have narrated yoga effects in Chapter I of Part I.

I now lay down the canons of judgement relating to thithi and yoga effects. To make the subject easy, I give my own Nomenclatures as follows :

Positive Rasis : Own house
Negative Rasis : Zero Rasi or house of debilitation
Positive Bhavas : Auspicious Bhavas (1,2,4,5,7,9,10,11)
Negative Bhavas : Dustana (3-6-8-12)
Positive Planets : Lords of Positive Bhavas which are not Zero Rasis and Birth Yogi and Duplicate Yogi.
Negative Planets : Lords of Negative Bhavas, Lords of Zero Rasis, Birth Avayogi.
Positive Stars : Stars of Positive Planets.
Negative Stars : Stars of Negative Planets.

Note : Just as in mathematics :

+	X	+	=	+
+	X	-	=	-
-	X	+	=	-
-	X	-	=	+

Even here the same theory holds good.

(1) Positive Planet in Positive Bhava or Rasi or Star becomes positive.

(2) Positive Planet in Negative Bhava or Rasi or Star becomes negative.

(3) Negative Planet in Negative Bhava or Rasi or Star becomes positive.

(4) Negative Planet in Positive Bhava or Rasi or Star becomes negative.

Positive Planets give favourable results while Negative planets cause distress.

The above cited formula will suffice to judge the effects correctly. For clearer understanding, I cite the following corollaries with illustrations.

General Enunciation

(01) Yoga planets though attaining negative character still retain their yoga character.

(02) Yoga planets or those that are in their stars give beneficial effects while Avayoga ones give malefic results.

(03) Yoga planet must be in positive Rasi, Bhava or Star while Avayogi must be in negative Rasi, Bhava or Star or Eclipsed.

(04) If 6, 8 and 12 Bhavas are Zero Rasis, good results arise; viz. no enemy, no debt and no loss.

(05) Positive planets in negative Rasis give tolerable good results when retrograde.

(06) Negative planets should not be retrograde as they become more powerful to do evil.

(07) Rahu and Ketu are natural negatives. When they are in Zero-Rasis they become extremely good. Of them Rahu is exceptionally good.

(08) Weigh your judgement from the position and condition of the steller lord.

(09) Negative planets in Zero-Rasi or negative Rasi or Bhava are good but become bad if they are retrograde.

(10) Of the 2 Rasis owned by a planet (except sun and moon who own only one Rasi) that Bhava which is Zero-Rasi suffers and not the other. If that planet is powerfully and positively situated it does more harm to the *Zero-Rasi-Bhava* but may give good of the other Bhava. If on the other hand such a planet be negatively placed or eclipsed the effect of the Zero Rasi-Bhava becomes good while the other goes bad.

(11) Planets in conjunction with or aspected by Yoga or Avayoga planet imbibe their character also in addition to their own.

(12) Duplicate Yogi in the star of birth yogi or *vice-versa* confers high yoga.

(13) Avayogi in enemy's star is good.

Illustrated Theories

A detailed discussion on the principles involved in the theory of Thithi and Yoga effects is made hereunder citing examples. Schedule of charts appended hereto and in all the discussions their serial numbers only will be quoted. Readers will please verify from the respective charts.

Theory (1-7)

(1) Positive planet in positive Bhava and positive Rasi -*good*

(2) Positive planet in positive Bhava but negative Rasi *-reduced good*

(3) Positive planet in negative Bhava or negative Rasi or Eclipsed but not Retrograde *-bad*

(4) Positive planet if under 3 above, it be Retrograde *- a little better*

(5) Positive planet in positive star *-good*

(6) Positive planet in negative star *- bad*

(7) Positive planet though in negative Bhava or Rasi if it is in its own star *-good after hurdles*

Illustrations

Chart : 1-Sun, lord of 9 (Father) though in 7th with many good planets has neither lifted his father's status nor conferred paternal good to the native for the very reason of being in Zero-Rasi. Guru, lord of 1 and 4, with all the best traits could not give him full satisfaction of education or bodily strength as he is Zero-Rasi.

Chart : 3-Budha, lord of 2 and 11 though in 5 killed his elder brother and disturbed his finance being in Zero-Rasi.

Chart : 6-Guru, lord of 9 is in Aridra (Rahu's star) and Shani, lord of 11 though in 11 being in Shathabhisha (Rahu's star) both proved very bad during their Dashas.

Chart : 33- Guru, lord of 1 and 4 in 5, being in Ashwini (Ketu star) showed his bad during his Guru Dasha though not to a great extent as both belong to one group.
